

15th National Games Fencing test event concludes

The National Games Coordination Office (Hong Kong) (NGCO) said today (June 1) that the 15th National Games (NG) Fencing test event held at Kai Tak Arena, Kai Tak Sports Park on May 31 and June 1 has concluded.

The two-day test event, which was also the Challenge Cups Fencing Championships, consisted of men's and women's épée, foil and sabre competitions featuring the open and veteran divisions. Over 500 athletes competed in all six event categories.

The test event covered a wide array of testing areas, including event operations and procedures, competition organisation, venue setup, sports and prize presentations, information systems, medical services, volunteer services and broadcast arrangements.

The Head of the NGCO, Mr Yeung Tak-keung, said that this test event is the first fencing event ever held in the Kai Tak Sports Park. Both venue facilities and competition arrangements have achieved the expected results. Since last November, Hong Kong has completed test events for all eight NG competition events. The General Administration of Sport of China has recently announced the competition schedule for the 15th NG, and the competition events in Hong Kong will be held from October 31 to November 20. The NGCO is making thorough preparations for the events. Mr Yeung also expressed gratitude to all related government departments and organisations for their assistance and support.
