Cemetery Village® Phasing

Burial Chamber Installations

As part of a multi-phase installation a further 18 burial chambers with associated memorial housings in a combination of granite and decorative stone have been installed. This is an ongoing service to a large Local Authority and the latest installation will be finished off with the addition of tarmac pathways.

Cemetery Village® Phasing

Burial Chamber Installations

Phase One of twenty chambers where installed for a Burial Authority in the Midlands. The project is part of a multi-phased development on newly reclaimed land within the cemetery and included the provision of granite memorial housings, pathways and drainage.

Burial Chamber Installations

welters® have been consulted by a major Scottish Burial Authority to provide burial chambers and associated memorial housing systems to complete a phase of a large cemetery development on land that was previously unsuitable for earthen burial due to high water tables.

Cemetery Village® Phasing

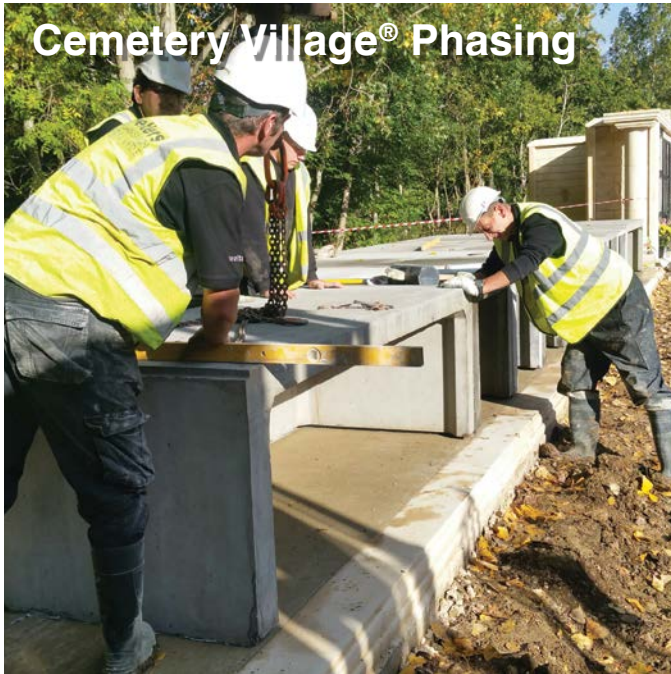

Phase 10 Burial Chambers

In continuation of our long standing service provision to a large London Burial Authority spanning over 16 years, **welters®** have recently completed Phase 10 consisting of 58 burial chambers with memorial housings and associated resin bound pathways.

Cemetery Village® Phasing

Contract Extended

welters® have received an extension to their current contract and continue to provide products and services to a large Midlands Burial Authority.

These products and services include the supply and installation of community and family mausolea and burial chambers and associated memorial products.

Muslim Burial Sections

welters® provide Muslim chambers to many Burial Authorities across the nation. This primarily is in the supply and installation of single interment vaults, although in recent times, as burial land becomes more precious, there is a growing interest in the provision of family double chambers.

Muslim Burial Sections
welters® installed two further phases of Muslim burial chambers in separate cemeteries for a Midlands Burial Authority.

This is a continuation of a long term provision of facilities for Muslim Communities served by the Council.

Single Chamber Installations

Quite often **welters®** will be called upon to install a single chamber for a private grave. This type of installation is usually at short notice due to the death of a family member and typically a team will be sent to prepare the chamber for the pending interment and be on hand to seal it up afterwards.

Stone Memorial Orbs

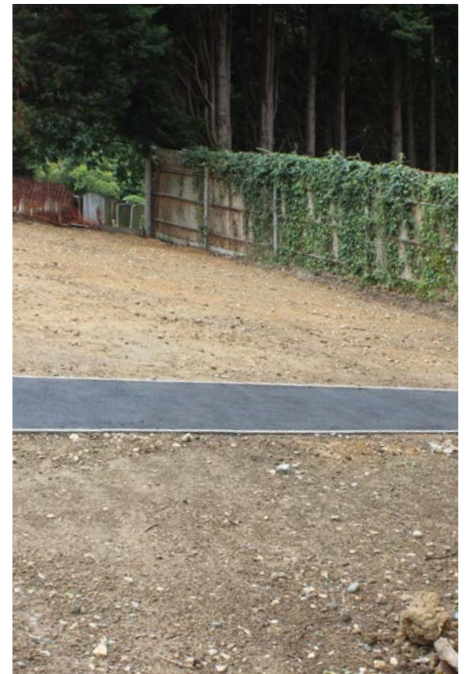

welters® Stone Memorial Orbs continue to be a successful alternative to the traditional above ground niche interment facility. The Orbs are equally suitable in a formal or natural setting and available with a range of associated products.

Land Reclamation

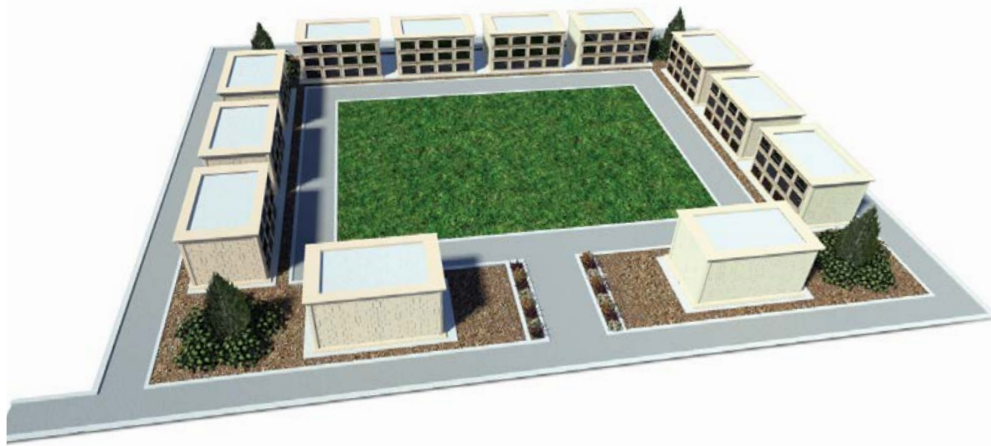

The project included the clearance, levelling and grading out of a disused and overgrown area of land within a London cemetery in preparation of earthen grave burials. Pathways were then installed and the area will receive a final layer of topsoil prior to seeding out.

Family Mausolea

welters® have recently introduced a new exclusive design to their range of family mausolea. The design is available for two or four interments, blending traditional and modern styling in an attractive monument.

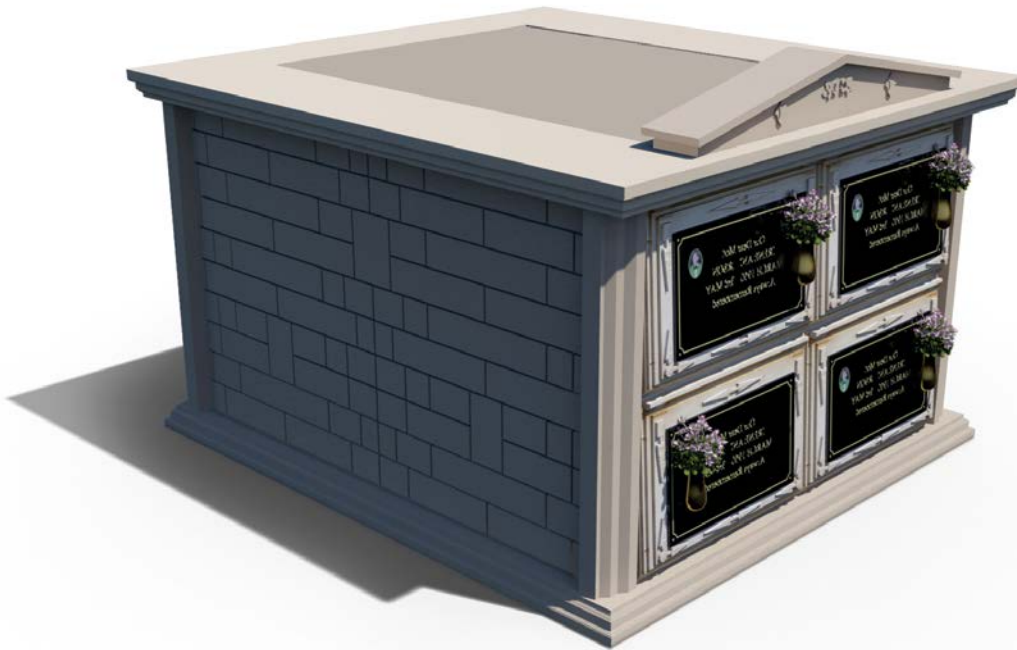

Mausoleum Courtyard

This newly awarded contract includes the installation of 12 community mausoleum units within a courtyard arrangement for a North London Burial Authority.

The courtyard will include hard and soft landscaping and a possible burial chamber installation within the central area.

New Family Mausoleum Design

welters[®]

ORGANISATION WORLDWIDE Design and Innovation Four Interment Mausoleum

Family mausoleum for four interments comprising of:

- Architectural decorative base plinth set on a concrete foundation
- Precast concrete interment cell super-structure
- Decorative stone corner posts
- Natural stone cladding to sides and rear
- Decorative 900 front tablets
- Decorative stone pediment with fleur-de-lis

The mausoleum will be fitted with blank granite tablets. The granite front tablet inscriptions and bronze ornaments shown here are examples for display purposes only and not included in the specification. All inscription work and bronzes selections will be made and quoted for separately at the time of need after the installation is complete.

Module 2

Module 3

Chiltern Stone and Timber Bench

The new Chiltern Timber Memorial Bench is now available in a range of five modules that include memorial plaques and cremation niches.

The bench is manufactured using sustainable resources and replenishable stock and is marketed as both a memorial bench and street furniture item.

Chiltern Stone and Granite Bench

The **welters®** Chiltern Memorial Bench provides a range of affordable solutions for commemorative and memorial seating arrangements.

The memorial bench collection includes a range of options beginning with the standard bench and plinth arrangement with two inscription plaques. Upgraded versions include end planters and extended base plinth.
