Environmental pledge

The company interpret their industrial activity as being carbon neutral due to the savings in terms of environmental impact through the use of and ongoing management and maintenance of the schemes.

Despite this fact and to make a bold statement of policy and commitment in support of Environmental Awareness, in March **welters[®]** acquired Ellery Hill in Cumbria. Yes, the fencing and 'long gone' ancient hedgerows are being re-established but additionally Galloway herds of 'Green' single suckler cattle, outlying and feeding from not only natural grasses but heathers, mosses and water meadow plants will be introduced. This is indeed an Agricultural food production policy for Beef which is not encouraged by Government Policy. Quite predictably, the Ellery Hill model will become an example from which Government Policy will be changed in around fifteen years time!

The Ancient Sessile Oaks of Whithaugh

welters[®], are the creators of the Cemetery Village[®] Systems which embrace the best use of land and environmentally sensitive solutions for burial and cremated remains interment and will maintain free of charge a commemorative register and password protected virtual cemetery for 'rights owner' use. **welters**[®] will also make an absolute commitment to plant and maintain one tree for every 'burial rights owner' or deceased from at maximum 6 months following the date of interment into a **welters**[®] facility or registration which ever is the later.

Tree planting schemes are currently in the Scottish Borders and Cumbria.

In addition to the commitment to plant the renewable tree resource, **welters**[®] will also, at no cost to the rights owner, stock the burns and becks within the tree planting scheme areas with Brown trout smolt and parr thus protecting this most important British indigenous species.

Galloway Heritage Herd

The establishment of the **welters®** 'Heritage' Pedigree Herd of Galloway cattle is and will continue to be one of the enduring and most rewarding aspects of the Land Based enterprises. The Genetic design of the Native Scottish outlying breed with countless benefits was in danger of diminishment.

The 'Heritage' Herd has Gene design from the finest Global Pedigrees to protect and perpetuate the finest Scottish Native breed which thrives on the hill land, heathland herbs and water meadows of our diverse landscapes.

Galloway Heritage Herd

welters® continues to own and develop the Heritage Galloway Herd of single suckle cattle. This magnificent family has a historic pedigree feeds from natural grasses, heathers mosses and water meadow plants. The Galloway is one of the oldest and purest of our native cattle breeds. They are famed for their hardiness and can live off the poorest of land. The Galloway female is the ideal suckler cow and will produce an excellent beefy calf which is in great demand by people requiring the highest quality, natural grown beef. Galloway Cattle have a great deal to offer and will fit into any agricultural system, either a traditional hill farm or low land management plan. Galloway popularity is growing due to the increased interest in British Native breeds and environmental issues.

At the 2009 Royal Highland show, the Galloway breed won all the major trophies including the individual, native interbreed, interbreed and pairs competitions. Never before has one breed dominated all the cattle championships at Scotlands premiere event.

White Galloway Heritage Herd

The White Galloway Heritage herd is a recent addition to **welters®** agricultural programmes. As part of their commitment to protecting native species and resources in the UK the White Galloway has a heritage that stretches back to the white wild cattle of ancient Britain.

welters® are members of the Rare Breeds Survival Trust

White Galloway Heritage Herd

The colour pattern of the White Galloway is mostly white, with its colour restricted to its ears, feet, and around its eyes. They will also often have colour on their poll, tail, and udder. The White Galloway breed originates from the Wild White cattle of ancient Britain.

The Galloway is naturally hornless, and instead of horns has a bone knob at the top of its skull that is called a poll. This breed's shaggy coat has both a thick, woolly undercoat for warmth and stiffer guard hairs that help shed water, making them well adapted to harsher climates.

welters[®] Galloway herds of Whithaugh forms part of their mission and drive for research and development in the protection of native species and natural resources

The **welters**[®] White Galloway Heritage Herd and the Green Agriculture and Land Management programmes are elements within the Biodiversity and Specie Protection and Enhancement Programmes.
