

# Acting Chief Executive meets Director-General of Food and Agriculture Organization of United Nations (with photo)

The Acting Chief Executive, Mr Chan Kwok-ki, met with the visiting Director-General of the Food and Agriculture Organization of the United Nations (FAO), Dr Qu Dongyu, today (February 10). The Secretary for Environment and Ecology, Mr Tse Chin-wan, and the Director of Agriculture, Fisheries and Conservation, Mr Mickey Lai, also attended the meeting.

Mr Chan welcomed Dr Qu's visit to Hong Kong with his delegation. Mr Chan said that the FAO has 194 Member Nations launching work worldwide, leading international efforts to eradicate hunger. It plays a pivotal role in global food security, promoting the development of distinctive agricultural products in various countries and regions, advancing the development of fisheries and aquaculture, and preventing and controlling major animal diseases. Its achievements are widely recognised.

Mr Chan said that Hong Kong is promoting the upgrading and transformation of the overall agriculture and fisheries industry towards modernisation and sustainable development. The Blueprint for the Sustainable Development of Agriculture and Fisheries formulated in Hong Kong earlier has also set out specific work targets in this regard. In addition, Hong Kong has consistently engaged in various collaborations with the FAO. For example, the Agriculture, Fisheries and Conservation Department earlier participated in the drafting of a series of FAO guidelines on African Swine Fever (ASF) to assist smallholder pig farmers in the Asian region to respond to ASF, and the relevant guidelines have now been widely adopted by Asian countries/regions.

Mr Chan further said that he looks forward to greater co-operation between Hong Kong and the FAO to strengthen knowledge exchange, promote regional co-operation, and make further contributions to global food security and sustainable development. Dr Qu thanked the Hong Kong Special Administrative Region Government's support of the FAO and said he looks forward to engaging in closer collaboration in the future.
