

CHP investigates probable case of botulism

The Centre for Health Protection (CHP) of the Department of Health (DH) is today (November 1) investigating a probable case of botulism, and again reminded the public that botulinum toxin injections should only be prescribed and performed by registered doctors.

The female patient, aged 41 with underlying illness, developed generalised weakness, difficulty in swallowing and hoarseness since September 28. She was admitted to Pamela Youde Nethersole Eastern Hospital on October 29. The clinical diagnosis was suspected iatrogenic botulism. She is now in a stable condition.

"According to the patient, she received botulinum toxin injection in both calves at her home on September 24 from a beautician who came from the Mainland. Investigations are ongoing," a spokesman for the CHP said.

"When botulinum toxin is used for cosmetic purposes, its cosmetic effects after injections are temporary and will gradually disappear. If referred to a doctor for the procedure, customers should look for his or her full name against the [list of registered doctors](#) of the Medical Council of Hong Kong as well as his or her professional qualifications and relevant experience," the spokesman added.

Due to the weakening of associated muscles and the fact that botulinum toxin may spread and affect other areas beyond the injection site, affected patients may have drooping of the eyelids, double vision or blurred vision, problems with chewing, hoarseness or even difficulties in swallowing, speaking or breathing, which may happen in hours, days or weeks after the injection.

The DH urged the public to observe the health advice below before receiving botulinum toxin injections:

- Injections should only be performed by locally registered doctors;
- Understand the procedure, potential risks and complications before receiving injections. Consult a doctor for an informed decision;
- Do not receive an injection in case of history of allergy to botulinum toxin, or infection or inflammation on the injection site;
- Request the full name of the doctor in writing if referred by a beauty service provider for the procedure, as well as the professional qualifications and relevant experience; and
- If symptoms develop, such as fever or feeling unwell, seek medical attention immediately.

The public may visit the DH's webpage on the [differentiation between medical procedures and beauty services](#), the [Drug Database](#) of the Drug Office

and the CHP's [botulism page](#) for more information.â€‹

HKMA in Tokyo promotes Hong Kong's leading platform as international financial centre and gateway of China (with photos)

The Chief Executive of the Hong Kong Monetary Authority (HKMA), Mr Norman Chan, was in Tokyo today (November 1) to promote Hong Kong's leading platform as an international financial centre and gateway of China.

The seminar, led by Mr Chan on "China Growth Story: What's Next and Where the Opportunities are", attracted an audience of over 200 attendees from Japanese financial institutions and corporates.

Mr Chan said, "Hong Kong has all along been an intermediation hub for trade and financial flows between Mainland China and the rest of the world. There are abundant opportunities as China's reform and opening-up further progress. Besides, as China's economy is transitioning from high speed growth to a more sustainable and consumption-driven model, it presents tremendous opportunities to Japan, home to a range of high quality goods and services. With its strategic positioning and all-rounded international financial centre platform, Hong Kong can serve as the bridgehead for Japanese corporates and investors as they seek to tap the opportunities in China and other parts of Asia."

The seminar featured a panel discussion joined by senior representatives from financial institutions and the professional services sector from Hong Kong and Japan to discuss the intermediation role and various advantages of Hong Kong in serving Japanese corporates and investors that are developing their markets in Mainland China and the region.

The seminar was part of the "Think Global, Think Hong Kong" promotion programme organised by the Hong Kong Trade Development Council in Tokyo.

[Manager of unlicensed guesthouse fined](#)

A woman was fined \$10,000 at the Tuen Mun Magistrates' Courts today (November 1) for contravening the Hotel and Guesthouse Accommodation Ordinance.

The courts heard that in September last year, officers of the Office of the Licensing Authority (OLA), the Home Affairs Department, inspected a suspected unlicensed guesthouse on On Lok Road in Yuen Long. During the inspection, the OLA officers posed as lodgers and successfully rented a room in the guesthouse on a daily basis.

According to the OLA's records, the guesthouse did not possess a licence under the Ordinance on the day of inspection. The woman responsible for managing the premises was charged with contravening section 5(1) of the Ordinance.

A department spokesman stressed that operating or managing an unlicensed guesthouse is a criminal offence and will lead to a criminal record. Upon conviction, the offender is liable to a maximum fine of \$200,000 and two years' imprisonment.

The spokesman appealed to anyone with information about suspected

unlicensed guesthouses to report it to the OLA through the hotline (Tel: 2881 7498), by email (hadlaeng@had.gov.hk), by fax (2504 5805) using the report form downloaded from the OLA website (www.hadla.gov.hk), or through the mobile application "Hong Kong Licensed Hotels and Guesthouses".

Appointments to Board of Governors of Hong Kong Philharmonic Society Limited

The Secretary for Home Affairs, Mr Lau Kong-wah, today (November 1) appointed or re-appointed the following persons as Board members of the Hong Kong Philharmonic Society Limited for a period of two years, until the conclusion of the Society's Annual General Meeting in 2020.

Ms Karen Chan Ka-yin*
Dr Allen Fung Yuk-lun*
Mr Andy Kwok Wing-leung
Mrs Mabel Lee May-bo*
Ms Winnie Tam Wan-chi*
Dr John Yeung Hin-chung

(*new appointees)

EPD commends over 100 organisations for delivering food waste to O²-PARK1 to turn waste into energy

The Environmental Protection Department (EPD)'s first organic resources recovery centre, O²-PARK1, started receiving food waste in July 1 this year. Currently, more than 40 commercial and industrial (C&I) organisations deliver over 100 tonnes of food waste per day to O²-PARK1 for recycling. The EPD today (November 1) held a pledging ceremony to commend the participating C&I organisations for practising food waste separation at source and delivering their collected food waste to O²-PARK1 for turning it into energy.

Speaking at the pledging ceremony, the Secretary for the Environment, Mr Wong Kam-sing, said that O²-PARK1 uses advanced anaerobic digestion and composting technologies to convert food waste into biogas for power generation. In addition to being the first organic resources recovery centre

in Hong Kong to convert food waste to electricity, Oâ™PARK1 is also one of the largest facilities of its kind in Asia, marking a new milestone in Hong Kong's journey of turning waste into energy.

Mr Wong said that the Government will continue to promote the Food Wise Hong Kong Campaign to encourage members of the public to cherish food and reduce waste at source. At the same time, as the food production process inevitably produces various types of food waste, the Government will develop a network of organic resources recovery centres in phases and adopt new technologies to recycle food waste into renewable energy and other useful materials, and explore utilising existing and future sewage treatment plants to improve the overall food waste treatment capacity by making use of food waste/sewage sludge anaerobic co-digestion technology.

Mr Wong said he was pleased to note that today's event was joined by more than 100 stakeholders. Furthermore, he noted that many C&I organisation representatives have also expressed their intention to deliver unused food waste to Oâ™PARK1 for treatment. He said this proves that members of different sectors are very supportive of the concept of "Food Wise Synergy, Waste-to-Energy". He also called for the participation of other C&I organisations to support the operation of Oâ™PARK1 and jointly reduce waste and carbon emissions.

Located at Siu Ho Wan in North Lantau, Oâ™PARK1 is a self-sustainable food waste recycling facility. Apart from generating heat and power for internal use, it is estimated that about 14 million kWh of surplus electricity, an equivalent of the energy consumption of about 3 000 households, can be generated by Oâ™PARK1. It is also estimated that some 25 000 tonnes of greenhouse gas emissions can be reduced each year. In addition, Oâ™PARK1 also helps the recycling of resources by generating about 6 500 tonnes of compost per year as a by-product.

Since the operation of Oâ™PARK1 commenced, more than 8 000 tonnes of food waste have already been treated and its treatment capacity will gradually increase. At present, Oâ™PARK1 treats more than 100 tonnes of food waste per day. Upon its full commissioning, the plant's capacity will gradually increase to 200 tonnes per day.

At today's ceremony, representatives of some supporting organisations also shared details of their experience in practising food waste separation and collection and delivery of food waste to Oâ™PARK1 for recycling. They stressed that close collaboration between food waste producers, property management companies, cleaning contractors and food waste collectors is the key to the successful implementation of separating food waste at source. In addition, they said that adequate training for management and front line staff is also essential.

Other officiating guests at today's ceremony included the Chairman of the Panel on Environmental Affairs of the Legislative Council, Dr Junius Ho; the Chairman of the Advisory Committee on Recycling Fund, Mr Jimmy Kwok; the Head of the Department of Biology of Hong Kong Baptist University, Professor Jonathan Wong; Vice Chairman of the Association of Restaurant Managers, Mr

Tony Tam; and the President and Honorary Chairman of the Hong Kong Waste Disposal Industry Association, Mr Thomas Tam.
