

Tender results of re-opening of 5-year RMB HKSAR Institutional Government Bonds

The following is issued on behalf of the Hong Kong Monetary Authority:

The Hong Kong Monetary Authority (HKMA), as representative of the Hong Kong Special Administrative Region Government (HKSAR Government), announced that a tender of 5-year RMB institutional Government Bonds through the re-opening of existing Government Bond (issue number 05GB2912002) under the Infrastructure Bond Programme was held today (March 6).

A total of RMB1.5 billion 5-year Government Bonds were offered today. A total of RMB5.180 billion tender applications were received. The bid-to-cover ratio, i.e. the ratio of bonds applied for to bonds issued, is 3.45. The average price accepted is 100.13, implying an annualised yield of 2.354 per cent.

HKSAR Institutional Government Bonds Tender Results

Tender results of 5-year RMB HKSAR Institutional Government Bonds:

Tender Date	: 6 March 2025
Issue Number	: 05GB2912002 (Re-open)
Stock Code	: 84596 (HKGB2.37 2912-R)
Issue and Settlement Date	: 10 March 2025
Tenor	: 5 years
Maturity Date	: 10 December 2029
Coupon Rate	: 2.37%
Amount Applied	: RMB5.180 billion
Amount Allotted	: RMB1.5 billion
Bid-to-Cover Ratio*	: 3.45
Average Price Accepted (Yield)	: 100.13 (2.354% (Note))
Lowest Price Accepted (Yield)	: 99.91 (2.404% (Note))
Pro-rata Ratio	: About 7%
Average Tender Price (Yield)	: 99.75 (2.440% (Note))

* Calculated as the amount of bonds applied for over the amount of bonds issued.

Note: The yields stated above are annualised yields. For reference, the semi-annualised yields corresponding to the average price accepted, lowest

price accepted, and average tender price are 2.340%, 2.390%, and 2.425% respectively.

Elderly reminded to take precautionary measures during cold spell

Attention Duty Announcers, Radio and TV Stations:

Please broadcast the following special announcement immediately, and repeat it at frequent intervals:

With the approach of cold weather, the Social Welfare Department (SWD) reminds the elderly to take precautionary measures during the cold spell. Relatives, friends and neighbours are encouraged to show concern and care for the health of frail elderly persons, particularly those living alone. Those in need may call the SWD hotline at 2343 2255 for assistance.

CHP reminds public of precautions against cold weather

The Centre for Health Protection (CHP) of the Department of Health (DH) today (March 6) reminded the public, particularly the elderly and people with chronic illnesses, to adopt appropriate measures to protect their health in view of the cold weather.

Cold weather can easily trigger or exacerbate diseases, especially among the elderly and persons suffering from heart disease, respiratory illnesses or other chronic illnesses.

Elderly people have less insulating fat beneath their skin to keep them warm, and their body temperature control mechanisms may be weaker. Their bodies may not be able to respond appropriately to cold weather.

Some senior persons may have decreased mobility, which can impair their ability to generate and conserve body heat. Chronic illnesses, such as hypertension, diabetes and endocrine disorders, may undermine the health of elderly people and lower their metabolic rate, subsequently causing their bodies to generate less heat. Persons with chronic illnesses, such as chronic

respiratory illnesses or heart disease, are vulnerable to disease aggravation due to cold weather.

The CHP reminded the public, in particular the elderly and persons with chronic illnesses, to adopt the following preventive measures:

- Take note of the weather forecast. Wear warm clothing, including hats, scarves, gloves and socks, accordingly;
- Consume sufficient food to ensure adequate calorie intake;
- Perform regular exercise to facilitate blood circulation and heat production;
- Stay in a warm environment and avoid prolonged outdoor exposure;
- Use heaters with care and maintain adequate indoor ventilation; and
- Seek medical advice if feeling unwell.

â€œIn addition, the public should avoid alcoholic beverages.

Drinking alcohol does not keep you warm. Alcohol accelerates the loss of body heat through dilated blood vessels, resulting in chilling instead.

Parents should ensure that babies are sufficiently warm, but it is also important to keep babies relatively lightly clothed to avoid overheating.

Parents should observe the following safety measures when putting their children to bed:

- Keep the room well ventilated and at a comfortable temperature;
- Always place babies on their backs to sleep. Leave their heads, faces and arms uncovered during sleep;
- Babies do not need pillows. Place babies on a firm and well-fitted mattress to sleep. Avoid soft objects, pillows and loose bedding;
- Let babies sleep in a cot placed near their parents' bed; and
- Maintain a smoke-free environment.

In addition, many respiratory pathogens, including influenza and SARS-CoV-2, may have increasing activity and community transmission during winter. Seasonal influenza vaccination is recommended for all persons aged 6 months or above, except those with known contraindications. Persons at higher risk of influenza and its complications, including the elderly and children, should receive seasonal influenza vaccinations early. Please see details of the vaccination schemes on the CHP's [website](#).

A person infected with influenza and COVID-19 at the same time may be more seriously ill and have a higher risk of death. It is important for elderly persons, especially those residing in residential care homes, to receive both seasonal influenza and COVID-19 vaccinations. They should also receive an additional booster against COVID-19 according to recommendations as soon as possible. The public should also maintain good personal and environmental hygiene against respiratory illnesses and note the following:

- Surgical masks can prevent the transmission of respiratory viruses from ill persons. It is essential for persons who are symptomatic (even if having mild symptoms) to wear a surgical mask;
- Wear a surgical mask when taking public transport or staying in crowded places. It is important to wear a mask properly, including performing hand hygiene before wearing and after removing a mask;
- Avoid touching one's eyes, mouth and nose;
- Wash hands with liquid soap and water properly whenever possibly contaminated;
- When hands are not visibly soiled, clean them with 70 to 80 per cent alcohol-based handrub;
- Cover the mouth and nose with tissue paper when sneezing or coughing. Dispose of soiled tissue paper properly into a lidded rubbish bin and wash hands thoroughly afterwards;
- Maintain good indoor ventilation;
- When having respiratory symptoms, wear a surgical mask, refrain from work or attending classes at school, avoid going to crowded places and seek medical advice promptly; and
- Maintain a balanced diet, exercise regularly, take adequate rest, do not smoke and avoid overstress.

Food-borne diseases, particularly those linked to hotpot cuisine, are also common in cold weather. The following preventive measures should be taken:

- Wash hands before handling and consuming food;
- Do not patronise unlicensed vendors or those with poor hygienic standards while selecting food;
- Wash and cook all food thoroughly;
- Vegetables should be washed thoroughly in clean running water before cooking and consumption. When appropriate, scrub hard-surfaced vegetables with a clean brush to remove dirt and substances, including pesticide residues and contaminants, from surfaces and crevices;
- Shrimps should be fully cooked until the shells turn red and the flesh turns white and opaque;
- For shellfish such as scallops and geoduck, scrub the shells thoroughly and remove the internal organs;
- Do not eat any undercooked freshwater aquatic products. To ensure that the food is thoroughly cooked, the centre of the food should reach a temperature of at least 75 degrees Celsius to destroy pathogen;
- Most hotpot ingredients should be stored in a refrigerator at 4 degrees C or below, while frozen food should be stored in a freezer at -18 degrees C or below;
- Never use raw eggs as a dipping sauce for hotpot; and
- Use different sets of chopsticks to handle raw and cooked food to avoid cross-contamination.

â€‹In addition, when using fuel-burning appliances, especially in indoor areas, the public should ensure adequate ventilation to avoid harmful exposure to carbon monoxide (CO) and prevent CO poisoning.

For more health information, the public may call the DH's Health Education Infoline (2833 0111) or visit the [CHP's website](#) and [Facebook Fanpage](#).

The public may also call Dial-a-Weather (1878 200) or visit the [website of the Hong Kong Observatory](#) for the latest weather information and forecasts, or its [page on Weather Information for Senior Citizens](#).

Hong Kong Customs seizes suspected smuggled bird's nests and scheduled fish maw worth about \$5.2 million (with photos)

â€‹Hong Kong Customs on February 20 detected a suspected smuggling case involving an outgoing cross-boundary private car at the Hong Kong-Zhuhai-Macao Bridge (HZMB) Hong Kong Port and seized about 24 kilograms of suspected smuggled bird's nests and about 43kg of suspected scheduled fish maw, with a total estimated market value of about \$5.2 million.

Based on risk assessment, Customs on that day intercepted an outbound electric private car at the HZMB Hong Kong Port. Upon inspection, the batch of suspected smuggled food ingredients was found concealed beneath the front trunk and inside a false compartment between the vehicular frame and battery pack with an altered structure.

After an investigation, Customs arrested a 53-year-old male driver suspected to be connected with the case. He has been released on bail pending further investigation. Customs also detained the structurally altered private car.

Customs will continue to combat cross-boundary smuggling activities with firm enforcement action based on risk assessment and intelligence analysis.

Smuggling is a serious offence. Under the Import and Export Ordinance, any person found guilty of importing or exporting unmanifested cargo is liable to a maximum fine of \$2 million and imprisonment for seven years upon conviction.

Under the Protection of Endangered Species of Animals and Plants Ordinance, any person importing, exporting or possessing specimens of

endangered species not in accordance with the Ordinance commits an offence and will be liable to a maximum fine of \$10 million and imprisonment for 10 years upon conviction with the specimens forfeited.

Members of the public may report any suspected smuggling activities to Customs' 24-hour hotline 182 8080 or its dedicated crime-reporting email account (crimereport@customs.gov.hk) or online form (eform.cefs.gov.hk/form/ced002).

[Employers and employees should take precautions during cold weather](#)

Attention duty announcers, radio and TV stations:

Please broadcast the following special announcement immediately, and repeat it at frequent intervals when the Cold Weather Warning is in force:

The Labour Department reminds employers that as the Cold Weather Warning is in force, they should take appropriate precautions such as reminding employees who have to work outdoors or in remote areas to wear appropriately warm clothing, and make arrangements for employees to rotate from outdoor to indoor or sheltered work sites as far as possible. Employees should take note of the weather report, wear appropriately warm clothing and be mindful of their health conditions. They should notify their supervisors and seek medical help immediately if feeling unwell, such as having cold limbs and body shivering.
