

Universal Community Testing Programme extended for four days to September 11

The Government has decided to extend the Universal Community Testing Programme (UCTP), which was launched on September 1, for four days to September 11 after reviewing the data and experience from the operation of the community testing centres as well as the public's demand for the testing service.

A Government spokesman said, "Starting from tomorrow (September 5), members of public can make online appointments for testing in the new time slots of the four days from September 8 to 11.

"Moreover, after reviewing the use of the 141 community testing centres, the Government has decided to cease the operation of 19 community testing centres (see the list of centres in the Annex) after September 7. In other words, 122 community testing centres across all of the 18 districts will continue to provide the testing service to members of the public in the four days from September 8 to 11."

As at 11am today, a total of about 521 000 persons had registered at the centres for testing since the launch of the UCTP on September 1. As at 11.45am today, a total of about 922 000 persons had successfully made online appointments.

To cut the transmission chain of COVID-19 in the community, the Government launched the UCTP on September 1 to provide a one-off free virus testing service for all citizens so as to identify asymptomatic COVID-19 patients as early as possible and to achieve the target of early identification, early isolation and early treatment.

Laboratory testing and surveillance are important elements in the Government's anti-epidemic work. The spokesman appealed to members of the public to fight the virus together and join the UCTP to protect themselves and others, with a view to winning the battle against the virus as soon as possible.

Suspicious mobile applications related to DBS Bank (Hong Kong) Limited

The following is issued on behalf of the Hong Kong Monetary Authority:

The Hong Kong Monetary Authority (HKMA) wishes to alert members of the

public to a press release issued by DBS Bank (Hong Kong) Limited on suspicious mobile applications (Apps), which has been reported to the HKMA. Hyperlink to the press release is available on the [HKMA website](#) for ease of reference by members of the public.

Anyone who has provided his or her personal information to the Apps concerned or has conducted any financial transactions through the Apps should contact the bank concerned using the contact information provided in the press release, and report to the Police or contact the Cyber Security and Technology Crime Bureau of the Hong Kong Police Force at 2860 5012.

Phishing email related to The Hongkong and Shanghai Banking Corporation Limited

The following is issued on behalf of the Hong Kong Monetary Authority:

The Hong Kong Monetary Authority (HKMA) wishes to alert members of the public to a press release issued by The Hongkong and Shanghai Banking Corporation Limited on phishing email, which has been reported to the HKMA. Hyperlink to the press release is available on the [HKMA website](#) for ease of reference by members of the public.

Anyone who has provided his or her personal information to the email concerned or has conducted any financial transactions through the email should contact the bank concerned using the contact information provided in the press release, and report to the Police or contact the Cyber Security and Technology Crime Bureau of the Hong Kong Police Force at 2860 5012.

Latest arrangements for Inland Revenue Department's public services

The Inland Revenue Department announced today (September 4) that the following offices will continue to provide basic public services from September 7:

Offices	Opening hours
Central Enquiry Counter Business Registration Office Stamp Office Estate Duty Office Collection Enforcement Sections Refund Section	From 9am to noon and from 1.30pm to 4pm, Monday to Friday
Central Telephone Enquiry	From 9am to 12.30pm and from 1.30pm to 4pm, Monday to Friday

The department appeals to members of the public for their understanding that the above services will be provided at a reduced scale and they should be prepared to experience a longer waiting time before they can be served. The department encourages the public to use electronic services to handle tax affairs as much as possible. A list of such services can be found in the department's website at www.ird.gov.hk/eng/ese/index.htm.

The department further announced that deadlines for tax payments (not applicable to Auto Tax Payment Service under the Tax Reserve Certificates Scheme), lodgement of objections and holdover applications, and submission of tax returns and information that fall between July 20 and September 13 will be automatically extended to September 14.

The department will review the situation and make further announcements as necessary.

Transcript of remarks by SCS and SFH (with video)

Following is the transcript of remarks by the Secretary for the Civil Service, Mr Patrick Nip, and the Secretary for Food and Health, Professor Sophia Chan, on the Universal Community Testing Programme at a media session this morning (September 4):

Reporter: A few questions for both ministers. Can you talk about why such slow processing of specimens? As you mentioned that the lab can handle 300 000 samples per day earlier? What are the problems and how the Government is going to resolve and enhance? Do you agree that some said the cost of finding a positive case is as high as \$5 million? And do you think it is worthwhile? Thirdly, concerning the Mainland team, you mentioned 420 of them are in town, why is it such a big group and what are their roles and why can't local staff cope with that? How many Mainland staff will eventually come? And my last question is can people who have done the test already to register again

while you extend the testing programme?

Secretary for Food and Health: First of all, regarding the laboratory test of the samples, as you may know, we are having a big number of samples taken in a total of 141 community testing centres every day. These samples will be sent to the laboratory for testing. Of course, for the first day or so, there are different procedures that need to smoothen out. Initially all the procedures are planned but there are bound to be some teething problems. Now, all these issues are already resolved. It is actually running very smoothly. It is only a matter of reporting time, and the number of testing right now is going up. As for the Mainland team, I think one of the reasons of having an even more efficient laboratory testing is with the help of the Mainland team. Yesterday, about 200 people arrived and, since early August there are about another 220 people, so altogether there are 420. They are working day and night in the laboratory. As far as Hong Kong is concerned, we would not be able to have this big capacity and this big number of machines and everything. As you may know, in the past eight months, we have been ramping up our testing capacity in terms of trying to get more people working more hours in the day and having more machines. But still, with such a big programme involving all the citizens in Hong Kong, without the help of the Mainland team we would not be able to do it. We have been able to get help from the Mainland in terms of the laboratory testing. The Mainland participants are mainly experienced laboratory technicians to help the laboratory testing. On the healthcare professionals who are taking swabs in the centres, they all come from Hong Kong. Lastly whether it is worthwhile. I think just now both myself and Patrick (the Secretary for the Civil Service) have already said many times. It is very important for us to have not only usual medical laboratory testing for the confirmed cases, and not only the target group testing, but also have this universal community testing to provide an opportunity for everyone in Hong Kong. If they want to test, they have the opportunity to get a free test. Now this is very important for us to have this whole picture of whether there are more silent carriers in the community, and to cut the transmission chain so that the spread would be stopped. This is very important for the control and prevention of the entire epidemic and also important for us to prepare for the next wave in the winter. It is very worthwhile even if we can find one positive case. Now that we have already found six and I think there might be more. This would enable us to stop the transmission chain, and isolate and quarantine the people whom we have identified. I have said many times, it can let us understand the situation better. Even the number of negative cases is also an important figure for us to understand (the situation in community).

Secretary for the Civil Service: The purpose of the Universal Community Testing Programme is to provide a one-off, free COVID-19 test to those citizens who wish to be tested. Our design is to provide a one-off, free COVID-19 test. We do not encourage, and actually there is no need for, one who has been tested to do it again. But our system would not preclude people from registering again for two reasons. Firstly, for those who made a booking but subsequently want to reschedule it, we would allow them to cancel the booking and then to book it again. Secondly, a person, who had been tested but then had exposure to high-risk places or people, may feel uncomfortable

and want to be tested again. We will not preclude this. But generally, there is no need to do it again after having done it once. So that is basically the purpose and the arrangements.
