

Contractor fined for violation of safety legislation

Martin Construction Company Limited was fined \$245,000 at Eastern Magistrates' Courts today (June 5) for violation of the Factories and Industrial Undertakings Ordinance, the Construction Sites (Safety) Regulations and the Factories and Industrial Undertakings (Safety Management) Regulation. The prosecutions were launched by the Labour Department.

The case involved a fatal accident that occurred on August 10, 2019, at a building alteration site in Causeway Bay. A worker, while carrying out wooden formwork work on the rooftop, fell from an unfenced edge of a formwork for a distance of about five metres to the floor below. The worker sustained serious injuries and passed away two days later.

CHP investigates three additional confirmed cases of COVID-19 and follows up on cluster in Luk Chuen House

The Centre for Health Protection (CHP) of the Department of Health (DH) has announced that as of 4pm today (June 5), the CHP was investigating three additional confirmed cases of coronavirus disease 2019 (COVID-19), taking the number of cases to 1 103 in Hong Kong so far (comprising 1 102 confirmed cases and one probable case).

The newly reported cases announced today involve three females aged between 8 and 73. All of them had a travel history during the incubation period. The CHP's epidemiological investigations and relevant contact tracing on the confirmed cases are ongoing. For case details and contact tracing information, please see the Annex.

In addition, the CHP is investigating an overseas case. The case involves a 68-year-old male patient who took flight AC7 (economy class) on Air Canada from Canada arriving in Hong Kong yesterday (June 4). According to the patient, he had tested positive for COVID-19 in Canada and he was transferred directly from Hong Kong International Airport upon arrival to Princess Margaret Hospital for management. The CHP has contacted the health authority in Canada to obtain more information about the case.

Meanwhile, the CHP has been proactively conducting epidemiological investigations and carrying out preventive control measures in regard to the cluster in Luk Chuen House, Lek Yuen Estate, Sha Tin. Concerning the evacuation of all residents of the "10" and "12" units of Luk Chuen House announced yesterday, as of 7am today, 75 residents of the units concerned had been transferred to the quarantine centre at Chun Yeung Estate, Fo Tan. Six residents have been sent to Prince of Wales Hospital for management due to physical discomfort and all of them tested negative for COVID-19.

As of 4pm today, 1 363 deep throat saliva samples had been collected in Luk Chuen House, among which 11 samples need to be collected again owing to leakage, while 1 352 samples have had testing for COVID-19 completed. Except for the four confirmed cases announced on June 2 with positive results, other samples have tested negative.

The CHP is also following up with the residents in Luk Chuen House who have not yet returned their deep throat saliva samples. As of 4pm today, the CHP had ascertained that the resident of one unit concerned had departed Hong Kong in mid-May and there are still five units of relevant residents that the CHP cannot get in touch with. The CHP strongly appeals to them to contact the CHP personnel and return their samples to the CHP as soon as possible for early testing. The CHP will arrange compulsory testing for those who do not return their samples.

Meanwhile, as of 4pm today, the CHP had collected and tested 2 026 samples for Luen Yuet House, Kwai Luen Estate, with no positive results.

The CHP again urged members of the public to maintain an appropriate social distance with other people as far as possible in their daily lives to minimise the risk of infection. In particular, they should go out less and avoid social activities such as meal gatherings or other gatherings to reduce the chance of contacting infected persons who may not present any symptoms, and minimise the risk of outbreak clusters emerging in the community.

A spokesman for the CHP said, "Given that the situation of COVID-19 infection remains severe and that there is a continuous increase in the number of cases reported around the world, members of the public are strongly urged to avoid all non-essential travel outside Hong Kong.

"The CHP also strongly urges the public to maintain at all times strict personal and environmental hygiene, which is key to personal protection against infection and prevention of the spread of the disease in the community. On a personal level, members of the public should wear a surgical mask when having respiratory symptoms, taking public transport or staying in crowded places. They should also perform hand hygiene frequently, especially before touching the mouth, nose or eyes.

"As for household environmental hygiene, members of the public are advised to maintain drainage pipes properly, regularly pour water into drain outlets (U-traps) and cover all floor drain outlets when they are not in use. After using the toilet, they should put the toilet lid down before flushing

to avoid spreading germs."

Moreover, the Government has launched the website "COVID-19 Thematic Website" (www.coronavirus.gov.hk) for announcing the latest updates on various news on COVID-19 infection and health advice to help the public understand the latest updates. Members of the public may also gain access to information via the COVID-19 WhatsApp Helpline launched by the Office of the Government Chief Information Officer. Simply by saving 9617 1823 in their phone contacts or clicking the link wa.me/85296171823?text=hi, they will be able to obtain information on COVID-19 as well as the "StayHomeSafe" mobile app and wristband via WhatsApp.

To prevent pneumonia and respiratory tract infection, members of the public should always maintain good personal and environmental hygiene. They are advised to:

- Wear a surgical mask when taking public transport or staying in crowded places. It is important to wear a mask properly, including performing hand hygiene before wearing and after removing a mask;
- Perform hand hygiene frequently, especially before touching the mouth, nose or eyes, after touching public installations such as handrails or doorknobs, or when hands are contaminated by respiratory secretions after coughing or sneezing;
- Maintain drainage pipes properly and regularly (about once a week) pour about half a litre of water into each drain outlet (U-trap) to ensure environmental hygiene;
- Cover all floor drain outlets when they are not in use;
- After using the toilet, put the toilet lid down before flushing to avoid spreading germs;
- Wash hands with liquid soap and water, and rub for at least 20 seconds. Then rinse with water and dry with a disposable paper towel. If hand washing facilities are not available, or when hands are not visibly soiled, performing hand hygiene with 70 to 80 per cent alcohol-based handrub is an effective alternative;
- Cover your mouth and nose with tissue paper when sneezing or coughing. Dispose of soiled tissues into a lidded rubbish bin, then wash hands thoroughly; and
- When having respiratory symptoms, wear a surgical mask, refrain from work or attending class at school, avoid going to crowded places and seek medical advice promptly.

Correctional Services Department
launches 2019 Annual Review Electronic

Version

The Correctional Services Department (CSD) launched its 2019 Annual Review Electronic Version today (June 5), showcasing the department's work last year. In 2019, Hong Kong's society encountered many challenges. During such a difficult time, the CSD has remained steadfast as the final element of the criminal justice system.

The department's 2019 Annual Review has recorded how the department overcame trials, placed a dual emphasis on both safe custody and appropriate rehabilitation in correctional institutions, and promoted law-abiding and inclusive values through community education.

In addition to photographs and videos, the review for the first time uses animated cartoons to briefly introduce two smart prison projects, namely the Robotic Monitoring System and the Persons in Custody Self-service Kiosk.

Members of the public are welcome to view the annual review on mobile phones or tablets by browsing the CSD's website at www.csd.gov.hk/annualreview/2019/web/en/index.html.

Grading of beach water quality released

The Environmental Protection Department (EPD) today (June 5) released the latest grading of water quality for 38 gazetted beaches (see Note 1) and one non-gazetted beach (i.e. Discovery Bay, see Note 2).

Twenty-six beaches were rated as Good (Grade 1), 11 as Fair (Grade 2) and two as Poor (Grade 3).

Grade 1 beaches are:

Grade 2 beaches are:

Anglers' Beach	Chung Hom Kok Beach
Approach Beach	Discovery Bay
Big Wave Bay Beach	Golden Beach*
Butterfly Beach*	Lido Beach*
Casam Beach*	Ting Kau Beach
Castle Peak Beach	

Grade 3 beaches are:

Hoi Mei Wan Beach	Ma Wan Tung Wan Beach*
-------------------	------------------------

Under the present grading system, beaches are classified into four grades, namely Good (Grade 1), Fair (Grade 2), Poor (Grade 3) and Very Poor (Grade 4), according to the level of E. coli in the water. Grades are calculated on the basis of the geometric mean of the E. coli counts on the five most recent sampling occasions.

A summary of beach grades is published weekly before the weekend. The latest beach grades based on the most current data may be obtained from the EPD's website on Beach Water Quality (www.epd.gov.hk/epd/beach) or the beach hotline, 2511 6666.

Note 1: The Leisure and Cultural Services Department has announced that 15 gazetted beaches (marked with an asterisk above) have reopened since May 23, while all other beaches will remain temporarily closed until further notice.

Note 2: Discovery Bay is a non-gazetted beach without lifeguard service.
