

Children in care to be helped into independent schools

Next steps in Government's ambition to improve educational outcomes and boost aspirations for the most vulnerable young people in society.

More children growing up in care are to benefit from places at the top private schools, as well as mentoring and access to sports and music facilities, in an aim to improve outcomes for some of the most vulnerable children.

Ten teams will work across the country to identify opportunities in independent schools for young people in care, where it is suitable to meet their needs, Children and Families Minister Nadhim Zahawi is expected to announce in a speech today (4 July) at the Association of Directors of Children's Services conference.

The new programme, backed by £500,000, aims to improve access to the top independent schools and builds on Minister Zahawi's commitment to see as many as 1,000 independent schools involved in schemes that offer opportunities to children in care.

Minister Nadhim Zahawi will also lay down a marker to Directors of Children's Services to drive forward the programme and engage with the new teams, to make sure councils can identify children who could benefit quickly when private schools set out offers of support.

Children and Families Minister Nadhim Zahawi said:

Every child, whatever their background, should have access to an education that helps them to fulfil their potential. We know that all too often children who have experienced trauma in their life can fall behind in education, through no fault of their own.

While standards in state schools continue to rise, I want independent schools and Directors of Children's Services to play a greater role in helping raise outcomes for these vulnerable children. A number around the country are already making fantastic offers to children in care, but I want more to come forward and councils to take up the opportunities. I am clear that this cannot be put off any longer, and I will accept no less.

This is now about providing resources to councils to identify and place children where it is right for them. Together, we can and must increase access, improve opportunities and foster aspirations and belief in what looked after children can achieve.

Independent schools will also provide sporting and music facilities for looked after children, to help harness specific aspirations or talents, such as swimming or music, to help boost opportunities, outcomes and aspirations for these young people.

The service will bring together 10 teams across the country into hubs of bringing in schools, local authorities, virtual school heads and social workers to help find suitable places for children in care.

Chairman of the Independent Schools Council, Barnaby Lenon, said:

The all-round education and pastoral care offered by independent schools can be transformational for a young person and many schools are already supporting vulnerable children.

The independent education sector is committed to playing its part in our diverse national education system to help give more children the best start, regardless of background. We are working with the Government and, although there is a limit to what we can do, independent schools are providing life-changing bursaries and working ever-closer with our state school partners to unlock new educational opportunities.

The announcement builds on a 10-year project run by the Boarding Schools Partnerships and Norfolk County Council, where young people who were either in care or at risk of going into care were taken off the council's risk register after at least three years in a boarding school. A higher proportion of looked-after children who were at boarding schools achieved A* to C grades in GCSE maths and English, compared to all looked-after children in 2016.

Physical activity helps children to deal with life's challenges

Public Health England, Disney UK and Sport England launch new Change4Life campaign to inspire children to get more active.

A new survey from Change4Life and Disney UK has found that less than half of parents are aware that physical activity can build children's self-confidence (49%), reduce anxiety (47%) and improve their self-esteem (46%). Just 16% (1 in 6) think that physical activity can help children develop attributes which make it easier to cope with life's little set-backs.

Evidence shows that children and young people who are more active have more confidence, higher self-esteem, less anxiety and stress and better social skills – attributes that can help them deal with the challenges they face in daily life. Positive attitudes towards physical activity have also been associated with children being happier.

The UK Chief Medical Officers recommend that children do at least 60 minutes of moderate to vigorous physical activity every day, yet just 20% of boys and even fewer girls (14%), are meeting this target, despite 95% of children saying that they enjoy being active.

Earlier this year, research from Sport England also found that enjoyment is the single biggest factor that motivates children to be active. So, to help the nation's kids get more active this summer, the Change4Life campaign is encouraging children to play 10 Minute Shake Up games inspired by favourite characters from Disney and Pixar's Toy Story 4 and Incredibles 2; and Disney's Frozen and The Lion King. Nearly two-thirds (64%) of children surveyed said they would be inspired to be more physically active if they saw their favourite characters being active. 4 in 5 parents (82%) think that kids are likely to enjoy sports and physical activities if they're fun and 61% of children agree that this helps.

Change4Life has also launched a new online quiz to help children, with their

parents, find activities and sports that might be perfect for them to try, based on their skills and abilities.

According to the survey, nearly half of children think that they need to be 'fast' (49%) or 'strong' (41%) to be physically active and only a quarter (25%) see themselves as 'sporty'. The campaign reinforces that simple daily activities like active play, scooting or walking count, so by encouraging them, parents can help their children become more active.

Eustace de Sousa, National Lead for Children, Young People and Families, Public Health England (PHE) says:

"Across England, children's physical activity levels are worryingly low, with only a fifth of boys meeting the guidelines and an even smaller number of girls. We must combat this or risk facing a generation of inactive children who won't experience the wide health and wellbeing benefits of physical activity.

"That's why we are delighted to be launching the 10 Minute Shake Up campaign with Disney and Sport England this summer. Getting children into the habit of doing fun, short bursts of activity can set them up for life by improving not just their physical health but also helping them develop key life skills."

Marianthi O'Dwyer, Vice President and Head of Disney Healthy Living UK says:

"Disney is committed to supporting the future generation to lead healthier lifestyles and we are in a unique position to inspire families and children to be more active through our characters and the stories they tell. It's as simple as designing 10 Minute Shake Up games based on fresh or much-loved Disney content to tap into children's imaginations and get them moving more. We are excited to work with Change4Life for our sixth year on the 10 Minute Shake Up programme and to use the power of our characters as a force for good."

The 10 Minute Shake Up campaign is being supported by musician Danny Jones who feels passionately about encouraging kids to try new activities and have fun, and who has personal experience of how physical activity can help develop the skills you need to face life's challenges.

McFly musician and dad of one, Danny Jones, says:

"I'm really surprised to see how few kids are getting active. When I was a kid, I loved being outside and being active, whether it was playing football or going on bike rides with my family. I didn't realise at the time but being active was really important for more than just my physical health; it helped me to make friends and feel part of a group. As I got older, I began to realise that it also helped me to cope with anxiety and now it's a huge part of my routine.

"Being physically active gives me energy, helps me focus and puts me in a good mood. I'm supporting this Change4Life 10 Minute Shake Up campaign to help kids have fun getting active so they can develop skills that will help them throughout their life."

Sport England will also help families try new sports and physical activities locally, whether at their local park, leisure centre or through a well-known sport.

Tim Hollingsworth, Sport England's CEO says:

"Our recent research gives us the richest evidence yet that sport and physical activity needs to be fun and enjoyable above all because enjoyment is the biggest motivator for children in getting active.

"The Change4Life 10 Minute Shake Up games fit that brief to a tee with children's favourite Disney characters encouraging them to move more. Sport England are delighted to be investing £1 million of National Lottery funding to support the Shake Up games in our mission to help children build a positive attitude to physical activity."

This year marks the sixth year that PHE and Disney have worked together to inspire children to move more, with almost 2 million children taking part in last year's campaign. 10 Minute Shake Up packs will be distributed to schools during the summer term for children to take home so that they can continue to keep active over the summer.

To keep the kids busy this summer with 10 Minute Shake Up games from Change4Life with Disney, search 'Change4Life'.

The Opinium survey for PHE questioned 1,017 parents and 535 children aged 5 to 11 in England about their attitudes towards physical activity and took place in June 2019. Survey results can be accessed here:

Interviews are available with:

- Eustace de Sousa (National Lead for Children, Young People and Families, PHE)
- Marianthi O'Dwyer, Vice President and Head of Disney Healthy Living UK
- Danny Jones, McFly Star and judge of The Voice Kids

Dr Ellie Cannon, GP and author:

"Physical activity has a number of well documented benefits such as weight management, increased physical health and confidence. But, what's often forgotten is that physical activity has also been linked to improved emotional and social development, increased self-esteem and better attention span, all of which are commonly desired by parents. As a parent myself, I have seen how much my children have enjoyed the Shake Up games and would encourage families to try them, they are so quick and simple."

About the school engagement programme

As part of the campaign, Change4Life with Disney are providing primary schools with new curriculum-linked resources containing fun and flexible ways to get children active throughout the school day, as well as take-home materials to help engage parents beyond the school gates.

Developed with teachers, the 10 Minute Shake Up programme aims to get the whole school involved, helping teachers and school leaders embed activity into their daily school routine at times when pupils are usually sedentary, including assembly, line-up times, during class and in-between lessons. The Disney inspired resources include an 'Active assembly', 'Active school day ideas' for use before, during and after the school day, and 'Active role play lesson starters' to help teachers get their pupils moving, energised and ready for learning at the start of class.

To inspire children to continue their Shake Up activities at home and keep active over the summer, a take home pack featuring 12 new 10 Minute Shake Up games will be distributed to over 16,500 state-funded primary schools across England via the fruit and veg scheme in the summer term. Once pupils have completed their Shake Up activities over the summer, teachers can also reward them with Change4Life certificates.

Change4Life

Change4Life is a campaign run by [PHE](#) to help families to eat well, move more and live longer. PHE exists to protect and improve the nation's health and wellbeing and reduce health inequalities. It does this through advocacy, partnerships, world-class science, knowledge and intelligence, and the delivery of specialist public health services. PHE is an operationally autonomous executive agency of the Department of Health and Social Care. [Follow us on Twitter.](#)

About Disney's Healthy Living Commitment

In 2006, The Walt Disney Company made a global commitment to support parents and create healthier families by using its stories and characters to make healthy living simple and fun. Since 2006, Disney has been looking at the different ways it can support families to live more healthily. This includes introducing robust nutritional guidelines for food and drinks as well as their advertising, offering content that positively focuses on healthier lifestyles such as Disney Channel's First Class Chefs and Aim High, and inspiring activity and healthier eating through programmes such as Change4Life '10 Minute Shake Up' and Disney's #HealthilyEverAfter marketing campaign.

About The Walt Disney Company EMEA

The Walt Disney Company, together with its subsidiaries is a diversified worldwide entertainment company with operations in 4 business segments: Media Networks; Parks, Experiences and Products; Studio Entertainment; and Direct-to-Consumer and International. Disney is a Dow 30 company and had annual

revenues of \$59.4 billion in its last fiscal year (FY18).

Seeking to entertain, inform and inspire people around the globe through the power of unparalleled storytelling, The Walt Disney Company has been in Europe, Middle East and Africa (EMEA) for over 80 years, employing thousands of people across the region and reaching consumers in more than 130 countries. The Walt Disney Company's iconic brands – including Disney, Pixar, Marvel, Lucasfilm, National Geographic, FOX, FOX Sports and ESPN – are experienced diversely across the region in cinemas, on TV screens, online, at retail, in Disney Stores and at Disneyland Paris. Now in its sixth year, Disney's partnership with PHE and the '10 Minute Shake Up' campaign has seen over 2 million kids get active with over 100 million extra minutes of physical activity being completed.

About Sport England

Sport England is a public body and invests more than £300 million National Lottery and government money each year in projects and programmes that help people get active and play sport.

It wants everyone in England, regardless of age, background, or level of ability, to feel able to engage in sport and physical activity. That's why a lot of its work is specifically focused on helping people who do no, or very little, physical activity and groups who are typically less active – like women, disabled people and people on lower incomes.
