

## **Press release: Joint statement on the Joint Comprehensive Plan of Action (JCPOA)**

We note with great concern the statement made by Iran concerning its commitments under the JCPOA (Joint Comprehensive Plan of Action).

We remain fully committed to the preservation and full implementation of the JCPOA, a key achievement of the global nuclear non-proliferation architecture, which is in the security interest of all.

We strongly urge Iran to continue to implement its commitments under the JCPOA in full as it has done until now and to refrain from any escalatory steps.

We reject any ultimatums and we will assess Iran's compliance on the basis of Iran's performance regarding its nuclear-related commitments under the JCPOA and the NPT (Treaty on the Non-Proliferation of Nuclear Weapons). In this respect, we recall the key role of IAEA (International Atomic Energy Agency) monitoring and verification of the implementation by Iran of its nuclear-related commitments.

We also look to Iran to continue to adhere to established JCPOA formats and mechanisms including the JCPOA Joint Commission.

At the same time we recall our own firm commitments under the agreement including as regards sanctions-lifting for the benefit of the Iranian people. In this regard, we regret the re-imposition of sanctions by the United States following their withdrawal from the JCPOA.

We are determined to continue pursuing efforts to enable the continuation of legitimate trade with Iran, including through the operationalisation of the special purpose vehicle "INSTEX".

We call on countries not party to the JCPOA to refrain from taking any actions that impede the remaining parties' ability to fully perform their commitments.

### Press release: Government to fund and speed up vital cladding replacement

Around £200 million will be made available to remove and replace unsafe cladding from more than 166 privately owned high-rise buildings.

---

### Press release: Government to fund and speed up vital cladding replacement

- The government will fully fund the replacement of unsafe aluminium composite material (ACM) cladding on high-rise private residential properties where building owners have failed to do so
- Communities Secretary the Rt Hon James Brokenshire MP calls time on “reckless” building owners who have refused to take action
- New funding estimated at £200 million to ensure this work takes place urgently

The government has stepped in to speed up vital cladding replacement by fully funding the work, eliminating excuses used by some building owners and protecting leaseholders from the costs.

Around £200 million will be made available to remove and replace unsafe aluminium composite material cladding from around 170 privately owned high-rise buildings.

This step has been taken after private building owners failed to take action and tried to offload costs onto leaseholders.

Prime Minister, Theresa May said:

It is of paramount importance that everybody is able to feel and be safe in their homes.

That's why we asked building owners in the private sector to take action and make sure appropriate safety measures were in place.

And we've seen a number of private building owners doing the right thing and taking responsibility, but unfortunately too many are continuing to pass on the costs of removal and replacement to leaseholders.

Today I can confirm we will now be fully funding the replacement of cladding on high-rise private residential buildings so residents can feel confident they are secure in their homes.

Communities Secretary, Rt Hon James Brokenshire MP, said:

Although temporary measures are in place to ensure people living in these buildings are safe, too many owners are treating this as a permanent fix. Others are trying to pass on the costs to residents by threatening them with bills running to thousands of pounds.

While some building owners have been swift to act, and I thank them for doing the right thing, I am now calling time on the delay tactics of others. If these reckless building owners won't act, the government will.

The government appreciates the work of Grenfell United and the UK Cladding Action Group who have campaigned prominently, outlining the challenges in getting private building owners to fund the replacement of cladding on their homes.

The government has already fully funded this work in social housing developments. However, private developers and freeholders have been too slow to act and leaseholders have been threatened with significant, often unaffordable, costs resulting in delays.

The latest figures show that 166 private buildings are yet to start works on removing and replacing ACM cladding, compared to 23 in the social sector.

Building owners will have 3 months to access the new fund. We will look carefully at those who fail to remediate and consider what further action can be taken.

Building owners and developers who have already fully funded the remediation of buildings are Pemberstone, Aberdeen Asset Management, Barratt Developments, Fraser Properties, Legal & General, Mace and Peabody.

As a condition of funding, we will require the building owner to take reasonable steps to recover the costs from those responsible for the presence of the unsafe cladding.

For the purposes of this press release, high-rise buildings are defined as

those above 18 metres in height.

Following the Grenfell Tower fire, the government identified 176 private high-rise residential buildings with unsafe ACM cladding. According to the most recent data compiled by the Ministry of Housing, Communities and Local Government, 10 of these buildings have completed work to replace the cladding.

The fund will be available for private high-rise residential buildings (those containing homes). The government is already fully-funding the replacement of unsafe ACM cladding on social sector properties.

Following the Grenfell Tower tragedy, the government established a comprehensive building safety programme that included an independent review of fire safety and building regulations. [Plans outlined on 18 December 2018](#) explain how the government will implement the recommendations made by Dame Judith Hackitt in her review of building regulations and fire safety.

Building owners will be able to register for the fund by early July.
