The Parole Board is committed to keeping stakeholders informed of our work and progress towards achieving our objectives. As part of this openness we will publish our quarterly performance report which is produced for the Board's Management Committee. This report represents a summary of Parole Board operational performance in all its key areas of external delivery and internal management. It provides a snapshot of that period which is used to advise and guide on performance and executive decision making.

The data in this pack shows the large volume of business being processed by the Board, and how that business feeds into hearing demand and outcomes. The number of cases outstanding is now falling on a consistent trajectory and it is hoped the Board will make further significant progress during the rest of the year as we aim to increase the number of hearings held to 750-800 a month.

Based on the year so far, the Board can be confident that by the end of this year we will yet again have completed more oral hearings than ever before and, as the backlog clears, will safely release more people. The deferral rate of hearings remains a concern despite falling over the last few years, as it remains at a high level. We are considering what further steps can be taken to tackle these problems by sharing the reasons for deferrals with the Public Protection Casework team within NOMS (National Offender Management Service) and the National Probation Service.

The below information is intended to aid understanding of the attached performance report, which covers quarter two of 2016/2017 (July – September):

1. **Paper Hearings – MCA assessments** This graph shows the outcomes from all paper based hearings on a 12 month rolling basis. All cases, irrespective of sentence type or review category are assessed on the papers in the first instance through the Member Case Assessment (MCA) process.
There are a number of outcomes possible at the MCA stage, depending on the sentence type: no release, direct to oral hearing, release, defer.
2. **Listing Queue for oral hearings** This graph shows the queue of cases deemed ready to be considered at oral hearing and currently waiting to be allocated a confirmed date. The graph additionally records those cases that have been waiting more than 90 days for a confirmed oral hearing date, including a figure specifically for IPP cases. This highlights the capacity constraints across the system to list all those cases that are ready to be heard.
3. **Oral Hearings Outcomes and Release Rate** This graph shows the outcomes from all oral hearings on a 12 month rolling basis. In addition it shows the conduction rate (cases that do actually progress to on the day against the original number of cases listed) and completion rate, i.e. those cases that are concluded on the day. The release rate is also captured in the smaller chart.
4. **Deferrals** These graphs show the number of cases which are deferred on the day for each month in a 12 month rolling period and also by quarter since 2013. Identifying and mitigating against deferrals is a key aim to contribute to reducing the backlog.
5. **Generic Parole Process – Cases Outstanding** This graph shows the volume of Generic Parole Process cases that are outstanding in a 12 month rolling period (it does not include recall cases) Case outstanding is defined as all cases referred to the Parole Board for a GPP review, where the original target date to conclude the review has now passed but the review is still ongoing, and as such overdue. A case may be outstanding for a variety of reasons including complexity of the case, case readiness, justified and reasonable deferral or because of an inability of the Board to list the case.
This is a key metric for the Parole Board and reducing this number down to pre-Osborn figures of around 1200 by the end of 2017 is a core focus of our strategy.

Press release: West Belfast shooting

From:

First published:

17 February 2017

Part of:

James Brokenshire issued a statement following the shooting of a child in the Forest Street area of West Belfast on Thursday 16 February.

Secretary of State for Northern Ireland, Rt Hon James Brokenshire MP said:

This was a brutal and shocking attack on a child by abusive criminals.

I will continue to offer all possible support to the PSNI and Department of Justice to ensure that the thugs responsible are held to account. Collectively we will continue to work to build a society where violence of this sort has no place.

Press release: Construction company to pay £54,000 for polluting East Sussex river

Interserve Construction Limited (ICL) has been fined £54,000 with £5,955 costs after admitting a single incident of discharging silt-laden water into a tributary of the River Rother in Burwash, East Sussex on 1 October 2014.

ICL was contracted to South East Water over an 18-month period at the Crowhurst Bridge Water Treatment Works to improve South East Water's ability to manage water treatment. The Environment Agency discovered a brown discharge downstream of the Works after a member of the public reported the discoloured water to them.

Further investigations showed that the river was visibly but locally impacted on a temporary basis.

In mitigation it was stated that this was an isolated incident of 25 minutes duration, during an 18-month contract and that the company was of previous good character. There was no evidence that local wildlife was adversely affected.

David Willis, Environment Manager at the Environment Agency, said:

We take these incidents very seriously and do everything within our powers to safeguard the environment and people that may be affected.

[News story: Joint Troika Statement Supporting African Union High Level Implementation Panel Peace Process in Sudan](#)

From:

First published:

17 February 2017

Part of:

The Troika (Norway, UK and US) urge signatories of the AUHIP-brokered Roadmap Agreement to honour their commitments.

The Troika (Norway, the United Kingdom and the United States) expresses its continued support for the African Union High-Level Implementation Panel (AUHIP) peace process, led by former South African President Thabo Mbeki. In support of the AUHIP-brokered Roadmap Agreement signed by both the Government of Sudan and the opposition, the Troika urges the signatories to honor the Agreement by concluding comprehensive cessations of hostilities and engaging in an inclusive political dialogue. The Government of Sudan must now create an environment that is conducive to freedom of expression and political

participation by both armed and unarmed opposition in Sudan.

The Troika is also encouraged by the Government of Sudan's decision to accept the United States' proposal to support humanitarian assistance to South Kordofan and Blue Nile states (the "Two Areas"). The U.S. proposal is intended to facilitate humanitarian assistance to affected populations in the Two Areas, in line with AUHIP efforts for broader negotiated humanitarian access. The Troika urges the Sudan People's Liberation Movement-North to swiftly accept this proposal and facilitate the delivery of life-saving assistance to those in need in the Two Areas. The ongoing unilateral ceasefires are a significant step toward peace throughout Sudan. However, in order to realize sustainable peace, all parties must engage in a political process. The Troika also encourages continued engagement by the armed movements from Darfur with the AUHIP peace process. We call on the Sudan Liberation Movement – Abdul Wahid Al Nur to cease hostilities and immediately engage with the AUHIP peace process. The Troika also encourages the Government of Sudan to make progress on addressing the root causes of the conflict.
