

News story: Another UK first for project academy

The latest students have graduated from the Project Academy for Sellafield.

Among them are the first in the UK to complete a brand new scheme in project scope baseline management.

They have been honoured at a ceremony hosted by the University of Cumbria, which is delivering the ground-breaking academy on behalf of Sellafield Ltd.

Simon Wittridge, head of project transition for Sellafield Ltd said;

We are incredibly proud of the latest students to graduate from the academy, which is going from strength to strength.

Project delivery is a key part of our mission of making Sellafield safer, sooner, and to now have 1300 people using the academy to gain world class qualifications on Cumbrian soil is incredible.

What I find even more encouraging is the diversity of people choosing to study with the academy, we have a real mix of young professionals, senior managers, employees from the supply chain and members of the public self-funding their studies.

We are privileged to have developed this completely fresh concept for higher education and training and together with the University of Cumbria, we are creating the next generation of project professionals on our doorstep, ensuring the UK remains at the forefront of project skills.

They were honoured at a ceremony hosted by the University of Cumbria

The latest cohort to complete their qualifications walked away with university certificates in project scope baseline management, project controls and foundation degrees in project management.

Lynda Toogood, from the finance team at Sellafield Ltd, is one of the first in the UK to receive a university certificate in project scope baseline management.

Lynda said;

I chose this specific scheme as it offered me the opportunity to develop new skills that will help deliver the projects I am responsible for.

To be able to get this kind of qualification without having to

travel out of the county makes the balance of working, studying and personal commitments so much more achievable, and enjoyable.

The Project Academy for Sellafield is the first of its kind in the UK.

It was launched 2 years year ago to help increase project capability across the country, and now has more than 1300 students on its books.

It is now becoming the gold standard model for project training, replicated by companies across the world.

It is being delivered by the University of Cumbria, who secured the contract in 2016, along with 6 partners.

[News story: Tim Peake joins mission to inspire future engineers as The Holiday Makers challenge blasts off at Farnborough Airshow](#)

- Tim Peake joins physicist and star of BBC Two's 'Astronauts: do you have what it takes?' Dr Suzie Imber to launch 'The Holiday Makers' summer holiday campaign at Farnborough International Airshow and highlight the vital role engineers play in the UK's growing space industry
- the campaign aims to get children making, inventing and exploring engineering through a series of free family-friendly activities, events and challenges, as part of the government's [Year of Engineering](#)

Schoolchildren at Farnborough International Airshow were today (20 July 2018) treated to a science lesson from the stars as British astronaut Tim Peake kicked off a national summer holiday campaign to help kids discover what they could achieve as engineers.

The Holiday Makers will encourage children to explore the world of engineering through fun activities, events and weekly challenges. The campaign is part of the government's Year of Engineering, which is working with partners across the UK to bring young people face to face with engineering experiences and role models – transforming perceptions of the profession and tackling a major shortage of engineers in the UK.

Launching the campaign, Tim Peake joined Dr Suzie Imber (Associate Professor of Space Physics at the University of Leicester and winner of BBC 2 show 'Astronauts: do you have what it takes?') to show schoolchildren the vital

role engineers play in the UK's growing space industry.

Students were given the chance to recreate an experiment that helps us understand more about the surface of planets, and learnt about the Mercury Imaging X-ray Spectrometer which Dr Imber is working on alongside engineers as part of Europe's first mission to the planet Mercury later this year. Continuing the celebration of feats of engineering, Tim Peake also joined the UK Space Agency as it launched a competition to name a rover which is being sent to Mars to search for signs of life.

Transport Minister Baroness Sugg said:

From space missions to technology that's transforming the way we travel, engineers are the driving force behind everything we're celebrating this week at Farnborough Airshow.

With funding for UK spaceports announced this week, this is a ground-breaking time for the industry with exciting implications for young people's career aspirations – and it's vital that we show children from all backgrounds how they could be part of the innovations shaping our future.

Giving young people chances to create, solve problems and come face to face with engineering achievements and role models is at the heart of the campaign, so I'm delighted to see that in action today as we call on families across the UK to get involved in The Holiday Makers this summer.

Dr Suzie Imber, from the University of Leicester's Department of Physics and Astronomy, said:

It's always a delight to open young people's eyes to how exciting engineering and science can be and the government's Year of Engineering campaign is a fantastic way that scientists like Tim and me can share some of the amazing research that is happening in labs across the country, and the vital role engineers play in this. It's been great to show them the work that the University of Leicester has done for the BepiColombo mission to Mercury, just one of the many ways that Leicester is establishing itself as the UK's space city.

There are lots of ways for families to get involved, from activities they can do at home or in the garden to workshops, exhibitions and challenges. Weekly challenges will be led by key partners including the RAF and the Science Museum. Children are encouraged to download a journal, collect badges and share what they have been doing for a chance to win some fantastic prizes.

Activity ideas, an events map and Holiday Makers journal are all available at the [Holiday Makers hub](#), and there will be lots of chances to get involved on social media using #TheHolidayMakers.

The [Year of Engineering](#) is a government campaign that aims to give young people aged 7 to 16 a million direct and inspiring experiences of engineering, challenging traditional perceptions and tackling a lack of diversity in the profession. The industry faces a shortage of 20,000 graduates every year, only 12% of UK engineers are women and fewer than 8% are from black and minority ethnic backgrounds.

Farnborough International Airshow Futures Day is designed to encourage young people aged 11-21 to consider an exciting career in the aerospace sector.

Speech: PM Belfast speech: 20 July 2018

When I became Prime Minister just over 2 years ago I spoke of the precious bond between England, Scotland, Wales and Northern Ireland.

A union not just of nations, but of peoples bound by a common purpose, whoever we are and wherever we are from.

I also reminded people that the full name of my political party is the Conservative and Unionist Party.

And that name carries a profound significance for me.

The party I lead has a belief in the Union of England, Scotland, Wales and Northern Ireland as a central tenet of our political philosophy.

And as Prime Minister of the United Kingdom of Great Britain and Northern Ireland, it is my duty to serve the whole UK and to govern in the interests of every part of it.

And that defines the approach I have taken in government over the past 2 years.

And, as we leave the European Union, I have made protecting and strengthening our own precious Union, by making sure the deal we strike works for every part of the UK, an absolute priority.

Northern Ireland in the UK

My belief in our Union of nations is rooted not just in history, but in our collective achievements.

Time and again we have stood together as one to overcome challenges and do great things.

This year, when we commemorate the centenary of the Armistice, we will remember the sacrifice of brave people from here and indeed the whole island of Ireland.

And at the end of the Second World War, Churchill famously said that without Northern Ireland 'the light which now shines so strongly throughout the world would have been quenched'.

After that war, a great national institution – our National Health Service – was established across the United Kingdom, a symbol of solidarity in our Union.

Today our NHS stands alongside other pillars of our national life.

Our parliamentary democracy and our commitment to the rule of law have been admired and imitated around the world.

These are the results of our common endeavour as a Union.

They are the signs which signify its depth and fundamental strengths.

Right across the UK, far more unites than divides us.

Our sense of community and shared values. Our diversity and tolerance.

And perhaps the greatest strength of our Union is its potential for the future.

What together we can achieve in the years ahead as an outward looking United Kingdom.

As we pursue our Modern Industrial Strategy, government working with business and academia to boost productivity, invest in science and research, and create more good jobs in every community, making the most of rapidly changing technology.

As we leave the European Union, and go out to strike new trade deals around the world, open up new markets for the great products and services of our innovators and entrepreneurs.

As we face the challenges of the future together and draw on the talents and resources of every part of our United Kingdom to overcome them.

And that of course includes Northern Ireland.

Its cultural landscape is dynamic, vibrant and wholly original.

Northern Ireland is a TV and cinema powerhouse, supported by UK government tax policies to support the film industry.

Over 2 million visitors come to Northern Ireland each year as tourists – to

experience its vibrancy and beauty.

It is home to great universities, great small businesses, a burgeoning cybersecurity sector.

Northern Ireland makes a major contribution to our Union, and it also derives great benefits from being an integral part of the UK.

Every family and every business benefits from the strength and security that comes from being part of the world's fifth largest economy.

The rest of the UK is by far Northern Ireland's biggest market, accounting for over half of its sales.

Today, unemployment is half the level it was in 2010 and employment is at a near-record high.

The prosperity generated by a country with global interests, and the principle of pooling and sharing our resources that defines the UK, supports public services that people in Northern Ireland rely on.

I believe in the partnership of our four great nations in one proud Union and I want it to endure for generations to come.

So a government I lead will never be neutral in our support for the Union.

We will always make the case for it.

I believe a clear majority of the people of Northern Ireland will continue to have confidence in a future for them and their families that lies within a strong United Kingdom.

But I also respect the fact that a substantial section of the population here identify as Irish and aspire to a future within a united Ireland.

I will always govern in the interests of the whole community in Northern Ireland and not just one part of it.

We are absolutely committed to parity of esteem, and just and equal treatment irrespective of aspiration or identity.

We want to work with all parties, and right across society to build a stronger, more inclusive and more prosperous Northern Ireland that truly works for everyone.

That is why I have met all the main parties on this visit, and why I keep up a regular dialogue with them.

The bright future I want to help build for Northern Ireland is one in which everyone, regardless of their community background or political aspirations, is able to live happy and fulfilling lives and to go as far as their talents and hard work will take them.

I want to say, too, that I share your concern about the episodes of serious

disorder in Belfast and Derry/Londonderry last week.

This government – like the communities here – has been absolutely clear in condemning this activity, which is a matter of deep concern for everyone who wants to see a peaceful and prosperous Northern Ireland.

This violence is not representative of the wider community and I pay tribute to the brave officers in the Police Service of Northern Ireland and the emergency services and others in the community who worked tirelessly to keep people safe.

We are all committed to making sure that Northern Ireland continues to move forward.

Belfast Agreement

The principles that define Northern Ireland's place as an integral part of the United Kingdom, along with its unique relationship with Ireland, are of course enshrined in the Belfast Agreement and its successors.

The Belfast Agreement, reached 20 years ago, is a landmark in the history of our islands.

It was overwhelmingly endorsed by referendums here in Northern Ireland and in Ireland.

Successive UK and Irish governments, together with all the parties in Northern Ireland, have worked tirelessly to bring about the historic achievement of peace.

Leaders like David Trimble and John Hume, Ian Paisley and Martin McGuinness, have made history.

And my predecessors as Prime Minister have played their part.

Sir John Major helped to start the peace process.

Tony Blair helped bring it to fruition, making power-sharing – which for so long had seemed a prize beyond reach – a reality at last.

Gordon Brown oversaw the devolution of policing and justice powers.

And I saw first-hand as a member of his cabinet how hard David Cameron worked on the Stormont House and Fresh Start Agreements.

I think everyone who has the honour and responsibility of holding the office of Prime Minister of the United Kingdom feels a special responsibility to the people of Northern Ireland.

The historic achievement that the Belfast Agreement and its successors represent is something we should all be proud of.

I am determined to protect it and to uphold the rights it enshrines.

The fact that the current Deputy Chief Constable of the PSNI, Drew Harris, will shortly become Commissioner in An Garda Siochana is an amazing symbol of the progress made over the last twenty years.

And we will continue to work with our friends in the Irish Government, who have been our close partners in that progress including at next week's British and Irish inter-governmental conference.

Power-sharing devolution

The UK government's support for the constitutional principles set out in those agreements, and for the full range of political institutions they established, is steadfast.

So it is a matter of frustration and regret that after enjoying the longest period of unbroken devolved government since the 1960s, Northern Ireland has now been without a fully-functioning Executive for over 18 months.

I commend the Northern Ireland Civil Service for the work they are doing to deliver public services in Northern Ireland in the absence of an Executive.

And I want to see the Assembly and Executive back up and running, taking decisions on behalf of all the people of Northern Ireland. They deserve no less.

So, in full accordance with the three stranded approach, we continue to do all we can to see the re-establishment of devolution and all the institutions of the Belfast Agreement.

But an agreement cannot be imposed.

That needs to come from within Northern Ireland.

A first step has to be the resumption of political dialogue aimed at finding a solution.

And that should begin as soon as possible.

Until then, the UK government will of course fulfil our responsibility to ensure good governance and stability in Northern Ireland.

But interventions from Westminster are no substitute for decisions taken here.

Effective and enduring devolved government is the right thing for Northern Ireland and it is best for the Union.

Principles of the Belfast Agreement

The Belfast Agreement did not just establish a set of institutions, it also defined the principles that underpin their legitimacy for people across the community.

The principle that it is the 'birthright of all the people of Northern Ireland to identify themselves and be accepted as Irish or British, or both, as they may so choose.'

And the consent principle, that it will always be for the people of Northern Ireland to decide 'without external impediment' what their constitutional future should be...

...with the UK government always giving effect to the democratic choice of the people of Northern Ireland, 'freely and legitimately given'.

These principles are the bedrock of peace and stability in Northern Ireland and it is the duty of the UK government always to respect and uphold them.

Doing so is not just the guiding force behind our approach to government in Northern Ireland, it is also at the heart of our approach to Brexit as well.

In leaving the European Union, as we are doing, we have a duty to ensure that the outcome we achieve works for the whole UK, including Northern Ireland.

For all of us who care about our country, for all of us who want this Union of nations to thrive, that duty goes to the heart of what it means to be a United Kingdom and what it means to be a government.

Our job is not to deal with Brexit in theory, but to make a success of it in practice for all of our people.

And nowhere is the need for practical solutions more vital than here in Northern Ireland, the only place where the United Kingdom shares a land border with an EU Member State that is also a co signatory to the Belfast Agreement.

No hard border

I have said consistently that there can never be a hard border between Northern Ireland and Ireland.

I said it in my letter triggering Article 50, in my speech at Mansion House and many times besides.

During the referendum, both campaigns agreed that the border between Northern Ireland and Ireland must remain 'absolutely unchanged'.

Indeed you only have to speak to businesses near the border, as I did yesterday, to see that the notion of a hard border is almost inconceivable.

Thousands of people who cross and re-cross between the UK and Ireland in the normal course of their daily lives cannot be subject to a hard border as they go to work, visit a neighbour, or go to the supermarket.

Neither would it be feasible for firms whose supply and distribution chains span the border.

Many people in communities like Fermanagh and Newry remember the customs border posts, approved roads and security installations of the not-too distant past.

They recall the administrative burdens on business, the disruption caused to lives and livelihoods.

In the Northern Ireland of today, where a seamless border enables unprecedented levels of trade and cooperation north and south, any form of infrastructure at the border is an alien concept.

The practical consequences for people's day to day lives are only part of the story.

Because the seamless border is a foundation stone on which the Belfast Agreement rests, allowing for the 'just and equal treatment for the identity, ethos and aspirations of both communities'.

Anything that undermines that is a breach of the spirit of the Belfast Agreement.

An agreement which we have committed to protect in all its parts and the EU says it will respect.

Both sides in the negotiation understand that and share a determination never to see a hard border in Northern Ireland.

And no technology solution to address these issues has been designed yet, or implemented anywhere in the world, let alone in such a unique and highly sensitive context as the Northern Ireland border.

Some argue that the right approach is for the UK to declare that we will not impose any checks at the border after we have left.

If the EU required the Irish Government to introduce checks, the blame would lie with them.

As I said at Mansion House, this is wrong on 2 levels.

First, this issue arises because of a decision we have taken.

We can't solve it on our own, but nor can we wash our hands of any responsibility for it.

So we must work together to solve it. Second, like any country sharing a land border with another nation, we have a duty to seek customs and regulatory relationships with each other to ensure borders work smoothly.

And in Northern Ireland, that presents a particular challenge.

The protection of the peace process and upholding our binding commitments in the Belfast Agreement are grave responsibilities.

Not to seek a solution would be to resume our career as an independent

sovereign trading nation by betraying commitments to part of our nation and to our nearest neighbour.

No new border within the UK

The reality is that any agreement we reach with the EU will have to provide for the frictionless movement of goods across the Northern Ireland border.

Equally clear is that as a United Kingdom government we could never accept that the way to prevent a hard border with Ireland is to create a new border within the United Kingdom.

To do so would also be a breach of the spirit of the Belfast Agreement, and for exactly the same reason that a hard border would be.

It would not be showing 'parity of esteem' and 'just and equal treatment for the identity, ethos and aspirations' of the Unionist community in Northern Ireland to cut their part of the United Kingdom off from the rest of the UK.

I do not think any member state would be willing to accept that, in order to leave the EU, a nation must accept such a threat to its constitutional integrity.

We made the choice to join as nation states.

We must be free as nation states to make the choice to leave.

The Joint Report that we agreed in December was very clear on this.

We were both explicit that Northern Ireland is an integral part of the United Kingdom, consistent with the principle of consent in the Belfast Agreement.

And the report is also clear about the need to preserve the integrity of the UK's internal market, which is vital to businesses the length and breadth of our country – not least here in Northern Ireland.

Yet the Commission's proposed 'backstop' text does not deliver this.

Under their proposal, Northern Ireland would be represented in trade negotiations and in the World Trade Organisation on tariffs by the European Commission, not its own national government.

The economic and constitutional dislocation of a formal 'third country' customs border within our own country is something I will never accept and I believe no British Prime Minister could ever accept.

And as MPs made clear this week, it is not something the House of Commons will accept either.

We remain absolutely committed to including a legally operative backstop in the Withdrawal Agreement.

But it must be one that delivers on all the commitments made in the December

Joint Report.

Our White Paper

Those 2 imperatives, to see no hard border between the UK and Ireland, and no new border that cuts Northern Ireland off from the rest of the UK, are realities we have to contend with as we find a way forward.

Doing so means we must rule out the free trade deal on offer from the EU that excludes Northern Ireland, and creates a border within the UK.

The other alternative, membership of the Customs Union plus an extended version of the EEA, would mean continued free movement, ongoing vast annual payments and total alignment with EU rules across the whole of our economy, and no control of our trade policy.

That would not be consistent with the referendum result.

In order to move the negotiations on our future relationship forward we needed to put a credible third option on the table.

To work for the UK, it needs to honour the Belfast Agreement, deliver on the referendum result and be good for our economy.

And for the EU to consider it, it needs to be a proposal that they can see works for them as well as us.

I believe that the White Paper we published last week, following the agreement reached at Chequers, is that proposal.

It is firmly rooted in the vision for our future relationship that I set out in my speeches at Lancaster House, Florence, Munich and Mansion House.

But it also addresses the questions that the EU has raised in the intervening months and explains how the new relationship would work.

It is a principled and practical Brexit that respects both the constitutional and economic integrity of the UK and the autonomy of the EU.

It also comprehensively addresses our shared commitments to Northern Ireland and Ireland.

It is the right Brexit deal for the United Kingdom.

It delivers on the referendum result.

It takes back control of our borders, with an end to free movement.

It takes back control of our money, with no more vast annual sums paid to the EU.

It takes back control of our laws, ending the jurisdiction of the ECJ in the United Kingdom.

It promotes jobs and prosperity.

The whole of the UK will be outside the Customs Union and Single Market, free to sign trade deals with countries around the world.

We will have regulatory freedom over our services sector, which accounts for 80% of the UK economy.

And we will leave the Common Agricultural Policy and Common Fisheries Policy, gaining the freedom to design new policies that work for our rural and coastal communities.

It will also protect and strengthen our Union by ensuring there is no hard border between Northern Ireland and Ireland and no border in the UK.

It does that by proposing a free trade area in goods and agricultural products between the UK and the EU.

Our previous proposal that we could achieve frictionless trade by maintaining 'substantially similar' regulatory standards did not prove to be a negotiable position.

The EU would not accept such an unprecedented solution to break down all barriers without having shared rules.

So we needed to make a stronger commitment.

That is why we have put the new offer of a common rulebook in goods and agricultural products on the table.

Some people are concerned about us maintaining common standards with the EU even in this limited area.

I understand that concern, but I think it is in the national interest in a way that it wouldn't be for say financial services.

Let me explain.

First, the rules that cover goods have been relatively stable over the last 30 years.

Second, many of the relevant standards are set by international bodies which we will remain a member of after we leave the EU.

Third, the many UK businesses that trade with the single market will continue to meet these rules anyway whether or not the government makes a promise to.

Making a formal commitment allows us to establish a free trade area that will be good for our whole economy.

It will deliver friction-free trade in goods with our nearest trading partners in the EU.

Businesses will be able to import and export goods across the EU frontier

without impediment.

The just-in-time supply chains that underpin high skilled manufacturing jobs across the country will be able to continue without disruption.

And it will ensure we remain one United Kingdom, with a UK internal market, on good terms with our nearest neighbour.

The Belfast Agreement will be protected in full.

Not just by avoiding a hard border but by a legal guarantee that there will be no diminution of the rights for citizens set out in the Agreement.

By upholding the Common Travel Area and associated rights, so there is no question of any new restrictions on movement between the UK and Ireland or access to public services.

And by guaranteeing the protection in full of the range of North-South and East-West co-operation provided for in Strands 2 and 3 of the Agreement.

This is the right deal for the United Kingdom and I believe it is the basis for a new deep and strong relationship with the EU.

The White Paper represents a significant development of our position.

It is a coherent package.

Early in this process, both sides agreed a clear desire to find solutions to the unique circumstances in Northern Ireland through a close future relationship.

We have now developed our proposals and put an approach on the table which does precisely that.

It is now for the EU to respond.

Not simply to fall back onto previous positions which have already been proven unworkable.

But to evolve their position in kind.

And, on that basis, I look forward to resuming constructive discussions.

Conclusion

I firmly believe that we can complete what we have started.

We can negotiate a new relationship with the EU that works in our mutual interest.

One that honours the referendum result, gives us control of our money, our borders, and our laws.

One that sets us on course for a prosperous future, protecting jobs and

boosting prosperity.

One that safeguards our Union and allows the whole UK to thrive in the years ahead.

A brighter future for Northern Ireland – where we restore devolution and come together again as a community to serve the interests of the people.

And a brighter future for us all, where we put aside past divisions and work as one to meet the challenges and seize the opportunities that lie ahead.

I am passionate about that brighter future and the possibilities that are within our grasp.

As I said on the day I launched my campaign to become leader of the Conservative and Unionist Party:

‘the process of withdrawal will be complex, and it will require hard work, serious work, and detailed work.’

The government has done that work.

The White Paper is our plan for the future.

It is the way to the stronger and brighter tomorrow that I know awaits the whole United Kingdom.

Now we must have the courage and the determination to seize it.

Press release: £40m extra funding to better protect thousands of homes against flooding

Thousands of properties across England will be better protected against the threat of flooding thanks to a multi-million pound investment by the government, Environment Minister Thérèse Coffey confirmed today (Friday 20 July).

Across the country 13 flood schemes will benefit from £40 million of additional funding which will unlock flood defence schemes and help support economic growth and regeneration in areas that have suffered from flooding in recent years.

The additional funding, first announced in the budget, adds to millions of pounds of government grant-in-aid already allocated to these projects and partnership funding already secured. It will help leverage an additional £24

million from other sources, enabling the flood schemes to go ahead. In total, more than 7,000 properties will be better protected against flooding, including over 5,000 homes. This additional money is part of our £2.6 billion investment from 2015 to 2021 to fund 1,500 flood defence schemes which will better protect 300,000 homes across the country.

Environment Minister Thérèse Coffey said:

This extra funding for flood defences will unlock schemes that will better protect thousands of homes and businesses against flooding, supporting regeneration in important towns and villages in the north and coastal communities.

It will boost our resilience as a nation and help our communities to grow and prosper.

In the historic English Channel tourist town of Weymouth, £1.2 million will improve the harbour wall, reducing flood risk to 450 properties and helping to kick start the regeneration of Weymouth town centre.

More than £10 million is also being awarded to a scheme to protect deprived communities in the St. Austell Bay area of Cornwall. The funding will unlock an additional £4.8 million of partnership funding contributions and is additional to £13.4 million of grant-in-aid which has already been allocated to the scheme. The funds will support an integrated regeneration partnership project, which will help to reduce flood risk and develop plans for new housing and community green space.

Five flood schemes in the north of England will receive almost half of the total funding – £17.4 million- in a boost to the Northern Powerhouse. Rochdale in Greater Manchester will receive a total of £5 million to develop one of the largest inland flood schemes in the region. The defences in Rochdale will increase the level of flood protection to 1,000 residential properties as well as critical infrastructure such as the tram network, a bus station, a grid sub-station and a waste water treatment works.

Eight miles to the west, £7 million has been awarded for new flood defence work around the River Irwell in Bury and Radcliffe as a first step towards the development of a new £46 million flood defence scheme, better protecting 870 properties. In addition to raising flood defences at key locations along the river's edge another key aspect of the scheme will be the creation of a wildlife habitat and amenity areas for the public by setting defences further back from the river.

The new funding for flood defences in the north of England adds to the £3.4 billion already invested into the Northern Powerhouse to build a more prosperous and inclusive economy where everybody has the opportunity to reach their full potential.

Minister Thérèse Coffey added:

The north of England is a hotbed of culture, innovation and growth and this multi-million investment in flood schemes will help protect more than 2,700 homes and businesses from flooding.

The defences will also enhance the environment and bolster economic growth as part of our commitment to better protect 300,000 homes from flooding by 2021.

Over the past three years, the Environment Agency has completed more than 400 new flood schemes to better protect more than 142,000 homes. In addition to building hard defences, it has improved its response by investing in new technology and equipment like temporary flood barriers, pumps and 6,500 trained staff across the country.

Sir James Bevan, Chief Executive of the Environment Agency, said:

Across the country we are seeing more extreme weather, which makes the Environment Agency's role to protect people, homes and businesses from flooding even more important.

From 2015 to 2021 we will reduce the risk of flooding for at least 300,000 homes so this £40million is another welcome boost to achieving that. It is great news for communities – not only will it help us build flood schemes but it will also help wider economic growth.

Further information:

A table with details of the schemes is below.

Project	Location	Additional funding (£m)	Potential leveraging of partnership funding contributions (£m)
Egremont, Skirting Beck defence improvements	Cumbria	1.60	4
St Austell Bar Resilient Regeneration Project – Par & St Blazey	Cornwall	10.79	4.8
Portreath Flood Alleviation Scheme	Cornwall	1.50	0.5
Paul stream channel/culvert refurbishments	Cornwall	0.68	0.1
Great Yarmouth Flood Defence improvements	Norfolk	5.40	1.5

Wiggenhall, Tidal River Bank improvements – Great Ouse Tidal Embankments	Norfolk	0.20	0.1
River Roch, Rochdale & Littleborough Flood Alleviation Scheme	Greater Manchester	5.00	2.0
Radcliffe & Redvales Flood Risk Management Scheme	Greater Manchester	7.00	2.0
Humber, Winteringham and South Ferriby tidal defence improvements	North Lincolnshire	1.90	5.6
Corbridge Flood Alleviation Scheme	Northumberland	0.14	0.4
Weymouth harbour wall improvement works	Dorset	1.20	Additional contributions being secured as part of the development of the wider strategy to further improve defences.
Fowlea Brook Flood Risk Management Scheme	Staffordshire	0.5	
Holderness Drain Flood Alleviation Scheme & East Hull and Gt Culvert	Yorkshire	3.70	

Press release: £40m extra funding to better protect thousands of homes against flooding

Thousands of properties across England will be better protected against the threat of flooding thanks to a multi-million pound investment by the government, Environment Minister Thérèse Coffey confirmed today (Friday 20 July).

The funds will support an integrated regeneration partnership project, which will help to reduce flood risk and develop plans for new housing and community green space.

Five flood schemes in the north of England will receive almost half of the total funding – £17.4 million- in a boost to the Northern Powerhouse. Rochdale in Greater Manchester will receive a total of £5 million to develop one of the largest inland flood schemes in the region. The defences in Rochdale will increase the level of flood protection to 1,000 residential properties as well as critical infrastructure such as the tram network, a bus station, a grid sub-station and a waste water treatment works.

Eight miles to the west, £7 million has been awarded for new flood defence work around the River Irwell in Bury and Radcliffe as a first step towards the development of a new £46 million flood defence scheme, better protecting 870 properties. In addition to raising flood defences at key locations along the river's edge another key aspect of the scheme will be the creation of a wildlife habitat and amenity areas for the public by setting defences further back from the river.

The new funding for flood defences in the north of England adds to the £3.4 billion already invested into the Northern Powerhouse to build a more prosperous and inclusive economy where everybody has the opportunity to reach their full potential.

Minister Thérèse Coffey added:

The north of England is a hotbed of culture, innovation and growth and this multi-million investment in flood schemes will help protect more than 2,700 homes and businesses from flooding.

The defences will also enhance the environment and bolster economic growth as part of our commitment to better protect 300,000 homes from flooding by 2021.

Over the past three years, the Environment Agency has completed more than 400 new flood schemes to better protect more than 142,000 homes. In addition to building hard defences, it has improved its response by investing in new technology and equipment like temporary flood barriers, pumps and 6,500 trained staff across the country.

Sir James Bevan, Chief Executive of the Environment Agency, said:

Across the country we are seeing more extreme weather, which makes the Environment Agency's role to protect people, homes and businesses from flooding even more important.

From 2015 to 2021 we will reduce the risk of flooding for at least 300,000 homes so this £40million is another welcome boost to achieving that. It is great news for communities – not only will it help us build flood schemes but it will also help wider economic growth.

Further information:

A table with details of the schemes is below.

Project	Location	Additional funding (£m)	Potential leveraging of partnership funding contributions (£m)
Egremont, Skirting Beck defence improvements	Cumbria	1.60	4
St Austell Bar Resilient Regeneration Project – Par & St Blazey	Cornwall	10.79	4.8
Portreath Flood Alleviation Scheme	Cornwall	1.50	0.5
Paul stream channel/culvert refurbishments	Cornwall	0.68	0.1
Great Yarmouth Flood Defence improvements	Norfolk	5.40	1.5

Wiggenhall, Tidal River Bank improvements – Great Ouse Tidal Embankments	Norfolk	0.20	0.1
River Roch, Rochdale & Littleborough Flood Alleviation Scheme	Greater Manchester	5.00	2.0
Radcliffe & Redvales Flood Risk Management Scheme	Greater Manchester	7.00	2.0
Humber, Winteringham and South Ferriby tidal defence improvements	North Lincolnshire	1.90	5.6
Corbridge Flood Alleviation Scheme	Northumberland	0.14	0.4
Weymouth harbour wall improvement works	Dorset	1.20	Additional contributions being secured as part of the development of the wider strategy to further improve defences.
Fowlea Brook Flood Risk Management Scheme	Staffordshire	0.5	
Holderness Drain Flood Alleviation Scheme & East Hull and Gt Culvert	Yorkshire	3.70
