

[Press release: Government leads energy charge across public sector, saving up to £340 million](#)

At a speech celebrating the Northern Powerhouse in Newcastle today (Thursday 5 July), the Business and Energy Secretary Greg Clark announced a range of measures to place the UK at the forefront of the global shift towards clean growth as part of our [Industrial Strategy](#).

Following a speech by the Prime Minister last month, Greg Clark outlined how the government will deliver the Clean Growth Grand Challenge's first 'mission' to halve the energy use of new buildings by 2030, saving families money.

Building on the momentum of ambitious energy efficiency measures within the public sector, the Secretary of State announced that central government will work towards a more stretching target with a reduction of 43% greenhouse gas emissions by 2019 to 2020 compared to 2009 to 2010 levels, potentially delivering £340 million in savings. We will also be publishing guidance on targets for the wider public and higher education sectors.

Business and Energy Secretary Greg Clark said:

Our new, ambitious target for reducing emission across our central estate shows how this government is continuing to lead the world and rise to the challenge of tackling climate change. We have made significant progress so far, meeting our previous target 3 years early and saving just over £100 million last financial year as a result.

The potential savings from this can make a big difference across the wider public sector, with the NHS saving £2 billion over the last decade; money that can be put straight back into frontline services where it's needed most.

Industry energy efficiency

We need to revolutionise the way we heat our homes and businesses, to support this, the Business Secretary announced that government will be launching the £18 million Industrial Heat Recovery Support programme with applications invited in the autumn. This is intended to encourage industry to invest in heat recovery technologies, harnessing the power of heat which would otherwise go to waste to help improve the efficiency of industry and reduce costs.

Speaking today, Greg Clark said:

Of the more than \$11 trillion investment expected in global power in the next three decades, 86% – is expected to be in low carbon. And by 2040, electric vehicles could make up over half of global car sales, compared to 1% today.

We will be working with businesses to highlight these opportunities during the first ever annual Green GB Week starting on the 15 October.

The Business Secretary also launched the [Construction Sector Deal](#) will bring together the construction, manufacturing, energy and digital sectors to deliver innovative approaches that improve productivity in construction and accelerate a shift to building safer, healthier and more affordable places to live and learn that use less energy.

Notes to editors

1. The [Greening Government Commitments](#) require central government departments to adopt sustainable practices, including greenhouse gas emissions.
2. We have announced a new target to reduce emissions by 43% by 2020, compared with 2009 to 2010 levels. This has the potential to deliver savings of £340 million in 2020 compared to a 2009 to 2010 baseline.
3. The previous target for government, as a whole, was to reduce emissions by 32% by 2019 to 2020, compared with 2009 to 2010 levels. This was exceeded 3 years early with a 33% reduction by the end of 2016 to 2017, resulting in a saving of £104 million in 2016 to 2017 compared to the 2009 to 2010 baseline.
4. We are also publishing guidance for wider public and higher education sectors to report against a voluntary target of more than 30% reduction in emissions by 2020 to 2021: [Emissions Reduction Pledge 2020: emissions reporting in public and higher education sectors](#)
5. The [Industrial Heat Recovery Programme](#) will open for applications in Autumn 2018.
6. The [successful applicants from the 2 £10 million innovation competitions](#) include northern companies such as Free Running Buildings in Leeds who are pioneering low energy ventilation technology, and Hull University who will develop a high efficiency, low carbon heating system for public buildings in Yorkshire.

[News story: Steve Baker visits The National Archives](#)

Minister at the Department for Exiting the EU, Steve Baker, today visited The National Archives to see how they are creating a new archive for EU law in preparation for our exit from the European Union in March 2019.

The EU (Withdrawal) Act, which received Royal Assent last week, ends the supremacy of EU law by converting it into UK law on exit day. It also allows the Government to make changes to retained EU law that will no longer be relevant after we leave the EU.

As part of that process, The National Archives are creating a new web archive which will capture the full body of EU law as it stood on exit day. This will provide an important record to refer back to, as the Government goes about making changes to retained EU legislation.

During his visit, the Minister met with The National Archives Chief Executive and Queen's Printer, Jeff James, and Digital Director, John Sheridan, who gave the Minister a tour of the archive.

Minister for Exiting the EU, Steve Baker said:

We reached a historic moment in our journey out of the European Union last month as the EU (Withdrawal) Act became law.

We are now well on our way to ending the supremacy of EU law in the UK, a process which The National Archives will play an important role in documenting.

I was pleased to visit the Archives today to learn more about how they will be creating an archive of EU law after our exit next year and to hear about the new tools they have in place to ensure that the full body of EU law as it stood on exit day remains accessible to the general public.

The National Archives Chief Executive, Jeff James said:

We were pleased to welcome Minister Steve Baker to The National Archives today to show him the fantastic work our teams are doing keep legislation.gov.uk up to date and in improving the

functionality and search-ability of the government web archive.

As the official publisher of UK legislation and the official archive of the UK Government, The National Archives is committed to supporting departments in ensuring continued legal certainty and transparency through publishing our laws online.

The EU (Withdrawal) Act received Royal Assent on Monday 26 June. The Government has now embarked on its secondary legislation programme to prepare our statute book for exit.

Press release: New appointments to the Board of the Royal Botanic Gardens, Kew

Defra Ministers have appointed Krishnan Guru-Murthy to the Board of Trustees of the Royal Botanic Gardens. They have also reappointed Catherine Dugmore and Nick Baird for second terms.

RBG Kew is an Executive Non-Departmental Public Body created under the National Heritage Act 1983, is sponsored by Defra. The Board of Trustees comprises a Chairman and eleven members.

Trustees provide non executive leadership and support to the executive through regular Board meetings, committees and groups.

Krishnan Guru-Murthy's appointment is for 3 years and will run from 1 July 2018 to 30 June 2021. Catherine Dugmore's and Nick Baird's reappointments are for 3 years and will run from 1 June 2018 to 31 May 2021 and from 1 November 2018 to 31 October 2021, respectively.

The appointments have been made in accordance with the Ministerial Governance Code on Public Appointments. All appointments are made on merit and political activity plays no part in the selection process.

There is a requirement for appointees' political activity (if significant) to be made public. The appointees have not declared any significant political activity in the past five years.

Trustees do not receive any direct remuneration for their services, although reasonable travel and subsistence expenses can be reimbursed.

Biographical details of Trustees

Krishnan Guru-Murthy

Krishnan Guru-Murthy is a presenter and reporter on Channel 4 News and on Channel 4's Unreported World. He was previously a presenter and reporter for the BBC. He is a member of the executive committee of the Edinburgh Television Festival and a patron of Duchenne Children's Trust.

Catherine Dugmore

Catherine Dugmore is a qualified Chartered Accountant. From 1988 to 2002 Catherine worked at PricewaterhouseCoopers, latterly as an audit partner based in Johannesburg. In addition to her role as a Trustee of the Royal Botanic Gardens, Kew, Catherine is a Board Member of Natural England and a Trustee of WWF-UK. She has worked in the NHS since 2012 and currently holds a non-executive role at Hertfordshire Partnership Foundation Trust. She was formerly Vice-Chair and Trustee of Action for Children and Chair of Victim Support.

Nick Baird

Nick Baird is currently Group Corporate Affairs Director of Centrica plc. He previously had a long and varied career in Government, his roles including CEO of UK Trade and Investment, Director General in the Foreign and Commonwealth Office leading its work on Europe, the global economy and consular issues, and British Ambassador to Turkey from 2006 to 2009.
