News story: £60m farming productivity fund launched at Dairy-Tech

Speaking to attendees and delegates at this year's Dairy Tech event held in Stoneleigh Park, Minister Eustice praised the variety of technology on show at the event and explained how farmers can benefit from the grants.

Many of the items eligible for funding are highly relevant to the dairy sector, including specialist foot trimming crushes and calving detectors, but there is a range of innovative items from which the majority of farmers can find something they would want to apply for.

Farmers can apply online to the [Countryside Productivity Small Grant Scheme](#), requesting a grant between £3,000 and £12,000 towards the costs of farm equipment.

Opening the event alongside Lord Curry and the Chairman of the RABDF Mike King, Minister Eustice explained how the scheme has been designed with simplicity in mind, to save farmers valuable time.

Farming Minister George Eustice said:

It's fantastic to see the scale of innovation here in Stoneleigh, where over 250 exhibitors are showcasing some truly advanced products and services which have come to the market for dairy farmers to improve productivity.

The dairy industry is our largest agricultural sector and we want to make sure farmers can become more resilient, competitive and able to capitalise on the growing global interest in quality

British produce as we leave the EU.

By opening this small grants scheme, we hope more farmers will be able to access this equipment and embark on more innovative and ambitious projects.

Last year Defra also opened a series of offers for larger grants through the Countryside Productivity scheme. Farmers can apply for grants of over £35,000 for a range of different projects, including for making more efficient use of resources, processing products, and other innovative projects.

News story: New National College for the nuclear industry launches

A new college that will train thousands of technicians and engineers to support Britain's future nuclear programmes, create cleaner energy and provide a highly skilled workforce has opened its doors today (7 February).

The National College for Nuclear has hubs in Cumbria (Lakes College) and Somerset (Bridgwater & Taunton College), and state of the art facilities that include virtual, simulated laboratories. The college will help thousands of young people and learners gain the knowledge and skills they need to work in the growing nuclear sector, that provides vital low carbon power to businesses across the country.

The facility is one of five National Colleges being established by the government. The colleges are a key part of the Industrial Strategy, the Government's plan to develop the technical skills of young people, provide industry with a skilled workforce across a range of sectors and support the country's long-term economic growth. Other colleges already open include the College of Creative and Cultural Industries; Digital Skills and High Speed Rail.

The growing nuclear sector will see the development of twelve new reactors across five sites in the future, and with approximately 6,000 people each year needed for technical and professional roles, the National College for Nuclear will key part of producing the workforce and expertise required.

Apprenticeships and Skills Minister Anne Milton said:

I am thrilled to announce the launch of the National College for Nuclear.

This College will provide our nuclear industry with the highly skilled engineers, scientists, technicians it needs to grow – as

well as giving more people the opportunities they need to get on in today's competitive job market.

The impressive training facilities in Somerset and Cumbria demonstrate what can be achieved when Government, employers and providers work together to deliver high-quality education. I wish all the trainees and apprentices the very best of luck for the future as they embark on this exciting journey.

Leading nuclear industry experts Sellafield Ltd and EDF Energy will work alongside the University of Cumbria and the University of Bristol to train up to 3500 learners by 2020.

Stuart Crooks, EDF Energy's Hinkley Point C Managing Director, said:

EDF Energy is proud to be a partner in the National College for Nuclear. It will support the new nuclear renaissance in Britain and is a prime example of industrial strategy in action.

The southern hub in Somerset will stand alongside the excellent training facilities at Bridgwater & Taunton College which are already helping to provide essential skills needed for Britain's economy. Together they show the big and positive impact new nuclear is having on jobs, skills and industrial capacity.

Chairman of the National College for Nuclear Colin Reed said:

It is with pride and expectation that we open the Northern and Southern hubs of the National College for Nuclear today. The journey to this point has been challenging and rewarding. We have students in place at both hubs benefiting from high level vocational education in state of the art facilities that were funded through Government vision.

From this start we are poised to grow to meet the challenge of nuclear skills in the years to come, both in student numbers at the existing hubs and also as we add further training deliverers at other locations to support the National demand.

Business Minister Richard Harrington said:

This is a pivotal moment for the future of nuclear energy in the UK. Through our Industrial Strategy, we are building a Britain fit for the future. These new learning hubs will give young people a fantastic opportunity to enter a highly skilled and well paid industry.

Press release: FOREIGN FLAGGED SHIPS UNDER DETENTION IN THE UK DURING JANUARY 2018

During January, there were six new detentions of foreign flagged vessels in a UK port, four vessels remained under detention from previous months. A total of six vessels remain under detention at the end of January.

1. In response to one of the recommendations of Lord Donaldson's inquiry into the prevention of pollution from merchant shipping, and in compliance with the EU Directive on Port State Control (2009/16/EC as amended), the Maritime and Coastguard agency (MCA) publishes details of the foreign flagged vessels detained in UK ports each month.
2. The UK is part of a regional agreement on port state control known as the Paris Memorandum of Understanding on Port State Control (Paris MOU) and information on all ships that are inspected is held centrally in an electronic database known as THETIS. This allows the ships with a high risk rating and poor detention records to be targeted for future inspection.
3. Inspections of foreign flagged ships in UK ports are undertaken by surveyors from the Maritime and Coastguard Agency. When a ship is found to be not in compliance with applicable convention requirements, a deficiency may be raised. If any of their deficiencies are so serious they have to be rectified before departure, then the ship will be detained.
4. All deficiencies should be rectified before departure if at all possible.
5. When applicable, the list includes those passenger craft prevented from operating under the provisions of the EU Directive on Mandatory Surveys for the safe operation of regular Ro-Ro ferry and high speed passenger craft services (1999/35/EU).

Notes on the list of detentions

- Full details of the ship. The accompanying detention list shows ship's International Maritime Organization (IMO) number which is unchanging throughout the ship's life and uniquely identifies it. It also shows the

ship's name and flag state at the time of its inspection.

- Company. The company shown in the vessel's Safety Management Certificate (SMC) or if there is no SMC, then the party otherwise believed to be responsible for the safety of the ship at the time of inspection.
- Classification Society. The list shows the Classification Society responsible for classing the ship only.
- Recognised Organisation. Responsible for conducting the statutory surveys: and issuing statutory certificates on behalf of the Flag State
- White (WL), Grey (GL) and Black lists (BL) are issued by the Paris MoU on 01 July each year and shows the performance of flag State.

SHIPS DETAINED IN JANUARY 2018

Vessel Name: YASEMIN

GT: 4355

IMO: 9136836

Flag: Malta (White List)

Company: 1st Denizcilik Ltd

Classification Society: NKK

**[Press release: Ministers welcome
protection of 1 million more from high](#)**

energy prices

- Ministers welcome move by regulator to protect more vulnerable consumers
- Move will now see a total of 5 million consumers protected by safeguard cap this winter
- Government's new energy price cap legislation will be introduced later this year

Energy and Clean Growth Minister Claire Perry today (7 February) welcomed the protection that 1 million more vulnerable consumers will get this winter from the extension of the energy regulator's safeguard tariff cap.

With the cap in place, these consumers will only see an increase of around 3.7% in their bills compared to an average 8% increase of dual-fuel standard variable tariffs of the Big Six last year.

Ofgem's extension of the current prepayment meter cap to those who receive the Warm Home Discount means 5 million people are now protected from unfair energy price rises.

The move comes as the government's own energy Tariff Price Cap Bill is expected to be introduced to Parliament shortly. The Bill will extend the price cap to the highest tariffs.

Energy and Clean Growth Minister Claire Perry said:

It is a positive step that a million vulnerable consumers are now being protected from unfair energy price rises through the energy cap.

But energy tariffs are still too high – customers of the Big Six energy suppliers are overpaying by up to a staggering £1.4 billion a year. This is totally unacceptable and why government will continue to go further – including by bringing in new laws in the forthcoming energy Tariff Price Cap Bill to put an end to rip-off standard tariffs.

Notes to Editors:

1. More information on Ofgem's safeguard tariff cap can be found [here](#)
2. Based on Ofgem's current typical domestic consumption values the new prepayment meter dual fuel cap will be £1089 from April 2018 compared to £1050 in April 2017, an increase of 3.7%. All figures include VAT.
3. In 2017 the six largest energy suppliers increased their standard variable tariffs by an average 8% (based on a simple unweighted average).
4. The latest figures from Ofgem show that 57% of the ten largest energy firms' domestic customers were on standard variable tariffs and that the average customer could save over £300 by switching to a cheaper deal.

5. The energy Tariff Price Cap Bill will give delegated powers to Ofgem to amend industry licences for the purposes of implementing and managing the price cap. The Bill will require Ofgem to place a price cap on all poor value standard variable tariffs.
6. The government is committed to an energy market that works for all which is why we have put in place a series of measures, in addition to the planned introduction the Tariff Price Cap Bill. These include:
 - The rollout of smart meters, which will put consumers in greater control of their energy use and will save £300 million off bills in 2020 alone
 - ECO: Help to Heat which was launched in April 2017 will upgrade the energy efficiency of more than 300,000 homes a year, tackling the root cause of fuel poverty. This includes installing measures like including solid wall, cavity wall and loft insulation
 - Under the Warm Home Discount Scheme, 2 million low income and vulnerable households will be provided with a £140 rebate off their energy bill each winter
 - These proposals combined will see £770 million of support for low income and vulnerable households each year in 2017-2018.
