

# Press release: Football agent who killed highways worker and paralysed another jailed for longer

A man who killed a highways worker and left another paralysed after speeding while texting has had his sentence increased after the Solicitor General, Robert Buckland QC MP, referred it for being too low.

Peter Morrison, a 37 year old football agent, hit and killed Adam Gibb, 51, and left his colleague Paul Holroyd, now 53, paralysed from the chest down after losing control of his Mercedes on the M6 in Cumbria.

Morrison had been texting behind the wheel and had been driving at an average speed of 81 mph, when the suggested speed limit was 50 mph, in the period before the collision. His car swerved across three lanes of the carriageway and mounted the crash barrier before rebounding off a rock and hitting the victims.

The two Highways England Officers were overseeing the recovery of vehicles which had crashed earlier in the atrocious weather conditions with strong winds, heavy rain and fog patches causing poor visibility and leaving surface water on some areas of the carriageway.

Morrison had sent a text message 96 seconds before the collision. The last message he received was 45 seconds before it.

Mr Gibb is survived by his wife and young son, who was 15 years old and due to sit his GCSEs at the time. Mr Holroyd suffers long-term effects because of the injuries inflicted by Mr Morrison's actions.

Morrison pleaded guilty to causing death by careless driving but was found guilty by a jury of causing death and serious injury by dangerous driving. He was sentenced to a total of 7 years' imprisonment at Liverpool Crown Court in January.

The Court of Appeal has today increased his sentence to 9 years in prison.

Speaking after the hearing, the Solicitor General said:

"Morrison's deliberate decision to be distracted and drive at excessive speeds in extremely hazardous weather conditions had devastating consequences for two families.

"I am pleased that the Court of Appeal has agreed with me and increased the sentence today."

# Press release: Commonwealth scientific advisers to look at global challenges

Scientific advisers from across the Commonwealth will establish a knowledge exchange network to look at some of the global challenges we face such as climate change, food security and the state of the oceans.

The group was established following the inaugural meeting of chief scientific advisers and equivalents from across the Commonwealth chaired by [Dr Patrick Vallance](#), Government Chief Scientific Adviser and [Sir Peter Gluckman](#), Chief Science Adviser to the Prime Minister of New Zealand. The meeting was held at the Royal Society.

The science leaders met to discuss the role of science and technology in achieving a more secure, sustainable and prosperous future. They discussed how science and technology can benefit Commonwealth countries, both individually and collectively, focusing on 2 main areas:

- preparing for and responding to emergencies; and
- meeting the UN Sustainable Development Goals (SDGs)

Dr Patrick Vallance said:

This is an important start to a new Commonwealth science collaboration. The Commonwealth represents a great opportunity for international collaboration, sharing data and science expertise to solve universal challenges such as climate change, food security, the state of the oceans, supporting private sector innovation and managing the impacts of disruptive technologies. These are challenges for which no country can plausibly claim to have all the answers.

Sir Peter Gluckman said

Science, technology and innovation are primary drivers of progress. The Commonwealth presents an obvious forum in which they can and should serve that purpose. Much can be achieved through identifying key knowledge gaps, synthesising and sharing evidence, and by strengthening the link between available evidence and policy.

Science Minister Sam Gyimah said:

Climate change, pollution, food security, healthcare, and clean energy are just some of the world's biggest challenges. These issues affect everyone and the impact is already being felt, even

here in the UK. While the government's ambitious Industrial Strategy and Grand Challenges are already addressing these global challenges, collaboration is essential to provide effective results.

Across the Commonwealth, the brightest and best talent are conducting incredible research that has the potential to change our world forever. It is essential that we come together and share our expertise and knowledge to speed up the development of innovative solutions, saving our planet and improving everyone's lives.

The network will foster greater cooperation between Commonwealth science academies and other science advice mechanisms. Specifically, it will seek to:

- promote information exchange covering scientific and technology-based solutions to the SDGs as they affect Commonwealth countries
- enhance cooperation on science related to risk management and emergency response
- develop a strategy for integrating locally-derived data across the Commonwealth to understand and stimulate innovative solutions to such issues as coastal erosion, water quality and food waste
- explore approaches to data governance
- promote beneficial collaboration using major science infrastructure where it can support research around the SDGs
- consider what further mechanisms might strengthen the role of science and innovation in the Commonwealth

A report summarising the projects, their impact and the key lessons learnt will be presented to leaders at the Commonwealth summit in 2020.

1. The Commonwealth forms a significant part of the global scientific community. It is home to 12% of the world's researchers and accounts for around 10% of global research and development expenditure.
2. The [Government Office for Science](#) advises the Prime Minister and members of the Cabinet on all matters related to science and technology ensuring that government policies and decisions are informed by the best scientific evidence and strategic long-term thinking.

## [Press release: PM call with President Xi on 19 April 2018](#)

The Prime Minister called President Xi of China earlier today.

They agreed the Prime Minister's visit to China in January had been a great success, reinvigorating our commitment to a "Golden Era" of UK-China relations and a deeper strategic partnership.

They discussed the appalling chemical weapons attack in Douma. The Prime Minister explained our strikes had been proportionate, legal and responsible, and aimed at alleviating humanitarian suffering by degrading the Syrian regime's chemical weapons capability and deterring their willingness to use them in the future.

The Prime Minister set out that Russia's blocking of diplomatic action underlined the importance of the international community working together to re-establish an independent mechanism that attributes responsibility to the perpetrators of attacks such as the one in Douma.

The Prime Minister noted that the use of a nerve agent against Yulia and Sergei Skripal in Salisbury was a grave attack on the sovereign territory of the UK, and the first use of nerve agents on European soil since the Second World War. They agreed that the use of chemical weapons by anyone, anywhere, for any purposes was unacceptable.

The Prime Minister reaffirmed the UK's commitment to free and fair trade, open markets and upholding and strengthening the multilateral global trading regime.

The leaders welcomed progress on deepening the UK-China trade relationship. They agreed that the UK and China would continue to work together to identify how best we can cooperate on the Belt and Road initiative across the region and ensure it meets international standards.

The Prime Minister also noted the need to recognise and respect the international law of the sea, in the context of adherence to the wider rules-based international system.

## **Speech: PM opening statement at first CHOGM Executive Session: 19 April 2018**

Prime Minister Theresa May said:

Good morning everybody, can I welcome you again to London, and welcome you to the first session of the 2018 Commonwealth Heads of Government Meeting.

This is the 25th time the leaders of Commonwealth nations have gathered to address the great issues of the day – although for many of us, myself included, this is the first time we've attended as heads of government. So let me extend an especially warm welcome to all the first-time attendees, and

in particular to President Adama Barrow, bringing The Gambia back into the Commonwealth fold. Welcome.

I'd also like to formally thank Prime Minister Joseph Muscat of Malta for his work as Chair-in-Office. Your steady leadership delivered a very successful tenure, and it's a pleasure to receive the baton from you at today's meeting. Thank you.

It's a meeting that takes place at a time of significant global challenges. The rules-based international system, which has consistently delivered both prosperity and peace, faces threats in many forms and on many fronts. Climate change and extreme weather continue to take lives and damage livelihoods across the Commonwealth. And the new opportunities afforded by the digital world have brought with them new risks, with our cyber security under attack from individuals and state actors.

All these issues and more will be addressed in a series of meetings over the next two days, both here at Lancaster House and in the retreat at Windsor.

The great strength of the Commonwealth is that all our members have equal status, an equal voice, and an equal right to make that voice heard. So as we tackle these challenges, I want to hear from everyone, and everyone will have chance to speak.

We face many challenges in the world today. But the Commonwealth is a unique organisation and, at this summit, we have an opportunity to deliver lasting change that benefits all of our 2.4 billion people. I'm looking forward to working with you all as we move the Commonwealth towards our common future.

## **Press release: Lord Bourne: "The Mint is a shining example of global export success"**

UK Government Minister Lord Bourne will visit the Royal Mint's headquarters in Llantrisant today (19 April) as part of ongoing engagement with the HM Treasury-owned coin production company.

The Royal Mint in Llantrisant was opened in 1968 and now employs more than 850 staff across its 35 acre site. The current Chief Executive and Deputy Master, Anne Jessopp, was appointed earlier this year and is the first woman to hold the role in the Mint's 1,100 year history.

The Mint's core function is the production of the UK's coins, blanks (the metal discs minted into coins) and official medals. The company aims to provide financial return to the UK Government via its commercial operations,

and has produced coins and medals for around 60 countries outside the UK.

Lord Bourne will reaffirm the UK Government's continued backing of the world's leading export mint by supporting the development of its overseas operations and new business ventures.

The mint currently holds a 15 per cent global market share and allows customers to trade bullion (gold, silver, and platinum) in the form of coins and bars, and store it in its own secure storage facility (The Vault). The site in Llantrisant is also home to The Royal Mint Experience, which opened in 2016.

**UK Government Minister Lord Bourne said:**

The Royal Mint is a crucial asset that adds real value to the makeup of South Wales' economy; employing hundreds of staff, attracting thousands of visitors to its tourist attraction each year and putting Wales on the map via its extensive overseas operations.

As Britain prepares to leave the European Union, there has never been a better time to explore new opportunities for trade and export further afield. The UK Government will fully support all Welsh businesses who are eager to seek out new markets overseas.

**Anne Jessopp, CEO of The Royal Mint, said:**

I am pleased to host Lord Bourne to look at how The Royal Mint can work with Government and other partners to identify new business opportunities in the UK and beyond.

The Royal Mint is an established British brand. As the market for some of our traditional products changes, we are building on our reputation for trust and authenticity to move into new and exciting areas of business. Our focus is on innovation and partnership across a portfolio of products, ensuring that The Royal Mint remains a sustainable and relevant business for the 21st century.

Exports from Wales rose by 12.3% to £16.4 billion in the latest year on year figures, and Wales is home to nearly 4,000 exporters with an average value per exporter of more than £4.2million.

The UK Government has developed the Wales Export Guide – a document that sets out the full range of support available to Welsh businesses from the UK Government and contains inspiring stories of companies based in Wales that are successfully exporting.

You can download a copy of the guide [here](#).
