

News story: Northumberland Armed Forces Forum

VAPC logo. All rights reserved

This well attended event drew over 30 representatives from across the region and reflected the interest in supporting the armed forces community in the region.

The issues of alcohol and veterans was covered by a presentation by Dr Sarah Wigham, Newcastle University, on research funded by Forces in Mind Trust. Her work dealt with evidence based interventions to tackle alcohol abuse in the veteran community. This multinational project drew heavily upon research from around the world and explored how this work can be adapted to meet the needs of veterans.

The forum discussed the complex issues relating to alcohol problems and veterans and the how the Mess/NAFI culture has evolved and the effect of cheap alcohol on serving personnel.

The forum was the opportunity of the incoming Royal British Legion, Advice and Information Officer, Ms Louise Liddell to introduce herself to the community and to brief the community on the Legion's work in the Northumberland region.

The wider veteran support environment was explored, specifically there was an exploration of the Northumberland Outreach Worker Project by its representative Mr Jonny Harrison. Even though he had only been in post 10 weeks he was already working 25 cases, of which 70% involved mental health issues and described their project as being so busy they have had to advertise for another member of staff to help deliver services.

The new [Albermarle Barracks Military Wives Choir](#), formed a year ago and has had a very successful appearance at Hexham Abbey and St Nicholas Cathedral. This Choir was formed with the express purpose of creating a supportive community rather than an award-winning choir and is made up of for wives, fiancées, and co-habiting partners, who might otherwise feel isolated.

The choir is also open to women serving in the armed services and female veterans, plus and wives, daughters of veterans. It is not restricted to Albermarle and is open to all who qualify across the region. It is now one of more than 200 military wives choirs across the UK. The Albermarle choir was set up because the nearest ones were in Catterick and Edinburgh.

The forum was a very useful meeting that allowed the VAPC to meet with other service providers and is an important part of the board's engagement strategy.

Notice: HR9 6HB, Mr Jonathan Benbow: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document:

- Operator name: Mr Jonathan Benbow
- Installation name: Woodhouse Fields Poultry Unit
- Permit number: EPR/TP3736MW/V005

Notice: EX14 3BL, Mr Adam Brown and Mrs Rachel Brown: environmental permit issued

This decision includes the permit and decision document for:

- Operator name: Mr Adam Brown and Mrs Rachel Brown
- Installation name: Higher Ash Farm Poultry Unit
- Permit number: EPR/WP3033JY/A001

News story: £170m competition launched for new Institutes of Technology

Employers, education and training providers can now apply for a share of £170m to establish prestigious new Institutes of Technology (IoTs), which will specialise in delivering the higher level technical skills that employers need.

Today (15 December) the Department for Education has opened the application

window for employers, Higher Education and Further Education providers to apply for multimillion-pound capital funding, as outlined by the Education Secretary at last month's [Skills Summit](#).

IoTs will see businesses and education and training providers working together to deliver provision to learners that is highly sought after by employers, in technical disciplines, particularly STEM (science, technology, engineering and maths).

Education Secretary Justine Greening said:

Institutes of technology will play a vital role driving our skills revolution with business and unlocking the potential of our country's young people through better technical education. By bridging the country's skills gaps, these new institutions will drive growth and widen opportunity.

This Government continues to invest in developing our homegrown talent so British business has the skills it needs and so that young people can get the opportunities they want.

These new institutions will help tackle the skills gap at a local, regional and national level and extend opportunity to thousands of people.

IoTs are just one of the skills reforms outlined by the Secretary of State on the 30 November at the Department for Education's [Skills Summit](#) which brought together education experts and some of the country's top employers to forge a new alliance to deliver a skills revolution.

Today we can confirm our aim to achieve a network of IoTs across the country. We expect the first IoTs will be open in 2019.

[Open consultation: Proposed catch limits for January 2018](#)

The Marine Management Organisation (MMO) sets monthly catch limits for quota species to ensure the UK stays within the overall limit set by the EU. These limits apply to all under 10 meter vessels and the over 10 meter vessels that are not in a co-operative (Producer Organisation).

Please contact the MMO if you have any comment to make about the suggested catch limits which will be put into force on 1 January 2018.

Comments to be received no later than 12:00 on Wednesday 20 December 2017.

Email FMTConsultations@marinemanagement.org.uk

Telephone 0208 0 269 097

The MMO will regularly consult industry on monthly or other catch limits and will, wherever possible, ensure that any representations are taken into account when setting such limits. The MMO reserve the right to alter catch limits and / or close fisheries without prior notice or consultation in the event that such actions are necessary and expedient for the regulation of sea fishing.
