

News story: Dangers of cold water shock this Christmas

Our short video, which educates young men about the dangers of cold water shock, especially following 'a night out on the town' is being re-launched in a Christmas 2017 campaign . It's going to be promoted via facebook, video on demand and video advertising across the UK, and particularly in areas where there have been several incidents of this type.

News story: Animal medicines improvement notice: Bio-Tech Solutions Ltd

This notice was issued to Bio-Tech Solutions Ltd, following a pharmacovigilance (PhV) inspection which highlighted Bio-tech Solutions Ltd had contravened the Veterinary Medicines Regulation 2013:

- Schedule 1, paragraph 55 (Qualified persons responsible for pharmacovigilance)
- Schedule 1, paragraph 56 (Duties relating to the qualified person)
- Schedule 1, paragraph 57 (Adverse reactions to a veterinary medicinal product administered in the United Kingdom)
- Schedule 1, paragraph 59 (Periodic safety update reports)

The improvements required are:

- Implement a back-up procedure covering all aspects of PhV
- Implement an appropriate training plan and training records for the Qualified Person for Pharmacovigilance (QPPV) and deputy
- Implement PhV agreements with all named distributors
- Establish a database to ensure all suspected adverse reactions are collated and accessible
- Migrate historical adverse events into the database once established
- Register with EVVET
- Ensure internal procedures are adequate to ensure reporting deadlines are not missed
- Ensure internal procedures are sufficient to ensure all PSURs contain all required information and are submitted on time
- PSURs with data lock point of 31/12/17 should be submitted to the VMD no later than 60 days after data lock point

Press release: Don't throw plastic or other items at Matlock raft racers

With this year's annual Matlock Boxing Day Raft Race given the go-ahead once again, the Environment Agency is urging the thousands of spectators expected to turn out to watch the popular event to leave their flour-filled plastic bags and other objects at home.

In previous years, spectators have thrown eggs, flour, plastic or paper bags, and other products at the raft racers from various points along the 3.5 mile course of the race on the River Derwent, which poses a real threat to the environment and wildlife.

Paul Reeves, Environment Officer at the Environment Agency, said:

We realise the Matlock Raft Race is an important social event for the area, which attracts a large number of local residents as well as visitors from further afield, has a positive impact on the local economy, and raises funds for the Royal National Lifeboat Institution (RNLI).

However, we are appealing to spectators to consider the environment by not throwing flour-filled plastic bags or other objects at the raft racers and into the water this year.

If plastic or paper bags enter the watercourse, they pose a real threat to wildlife both locally and further afield. Last year there were sightings of water birds trying to eat floating flour-filled bags, and the deadly impact of plastics on river and sea life is well known and currently in the news.

Councillor Lewis Rose OBE, Leader of Derbyshire Dales District Council, said:

The Boxing Day raft race has become something of a tradition here in the Derbyshire Dales and long may it continue. However, we absolutely support the Environment Agency's plea to spectators to refrain from activities that threaten the environment and wildlife, as well as littering our waterways and streets.

Kath Stapley, Living Rivers Officer, Derbyshire Wildlife Trust, added:

On behalf of the 60 partner organisations which make up the Derbyshire Derwent Catchment Partnership, we're asking people to

spare a thought for the wildlife in and around the River Derwent.

We're constantly working to improve the rivers in the catchment, from Howden Moor above Ladybower Reservoir, down into Derby, but we can only make a difference with support from members of the public. If plastics and other items are thrown into the river at Matlock, they may travel out of sight, but will inevitably affect the watercourse and wildlife downstream in Belper, Duffield, Derby and even down into the River Trent.

[News story: Defence Minister reveals new RAF Squadron at Qatar event](#)

Defence Minister Harriett Baldwin hands a model Typhoon to His Excellency Mr Yousef Ali Al-Khater. Crown copyright.

[Defence Secretary Gavin Williamson was in Doha last weekend](#), where he agreed a package of training and co-operation between the British and Qatari Air Forces which will see them working together more regularly as part of the multi-billion pound deal to supply the country with 24 Typhoon aircraft.

Defence Minister Harriett Baldwin expanded on that agreement at a State of Qatar National Day reception in London today. She revealed that a new UK-based Typhoon joint squadron will be called No. 12 squadron, and that it will temporarily integrate Qatari personnel, including pilots and ground-crew based at RAF Coningsby, Lincolnshire.

Defence Minister Harriett Baldwin said:

Qatar proudly becomes the ninth nation to buy the world's leading multi-role combat aircraft.

The formation of a joint squadron means our RAF will take the lead in providing training and support to the Qatari Emiri Air Force as it brings the Typhoon into service.

The Qataris will not be a permanent part of the squadron, but will be integrated ahead of the delivery of the Typhoon aircraft. The move will provide the country with valuable joint frontline experience on an RAF Typhoon Squadron and speed up their preparation for when their own jets are delivered.

The UK and Qatar already share a close defence relationship, with a joint-exercise between the Royal Air Force and Qatar Air force just last week seeing Typhoon aircraft fly over the Arabian Peninsula. Defence Minister Harriett Baldwin visited the country at the end of last month, where she met the pilots taking part in the exercise.

The two countries share mutual interests in countering violent extremism, and ensuring stability in the region, and this formation will further reinforce those ties by helping to prevent terrorism from spreading and protecting the prosperity and security of the UK at home. The new 12 squadron is currently operating Tornados, and will transition to the future Typhoon force.

The biggest export deal for the Typhoon project in a decade, valued at around £6 billion and sustaining thousands of UK jobs, Qatar is the ninth country to purchase the Typhoon. This year also saw the first delivered to Oman, whilst the MOD is leading the offer to replace Belgium's F-16s with the jets and continues to discuss the prospect of a second batch of sales to Saudi Arabia, as it continues to bang the drum for Britain's world-leading aerospace industry around the world.

Notes to editors

- Qatar National Day is on Monday 18 December. Today's reception at The Savoy Hotel on The Strand was hosted to celebrate the occasion.
