

# Press release: £2 million flood scheme for Much Wenlock

The scheme has seen the construction of 2 ponds which catch and store water that could otherwise flood properties, businesses and roads in the town. One pond is on the Sytche Brook to the north west of the town and the other is on the Shylte Brook to the south west.

The ponds, which will usually be empty, will fill during times of heavy rain. The collected water will then be released in a controlled manner so that flood risk downstream is reduced. The ponds, which are now fully operational, will drain down sufficiently quickly so that repeat rainfall events can be stored in a similar manner.

The scheme also includes the restoration of Westwood Quarry on Stretton Road.

The flood scheme was supported by the Environment Agency and funded through Flood Defence Grant in Aid by the Severn and Wye Regional Flood and Coastal Committee, local developer contributions and Shropshire Council. Work was carried out by the contractor Griffiths.

Dave Edwards, Senior Adviser at the Environment Agency, said:

The Much Wenlock flood alleviation scheme is a fantastic example of what can be achieved through partnership working. Much Wenlock has a long history of flooding so it's great to see the finished project protecting properties, businesses and roads in the town. We'll continue to work closely with both the council and the community in the future.

Steve Davenport, Shropshire Council's Cabinet member for highways and transport, said:

I'm delighted that work on this important scheme has now been completed, and that dozens of homes and businesses in Much Wenlock are now at far less risk from flooding than they have been in the past.

Between 2015 to 2021, Government is investing £2.5 billion in flood and coastal erosion risk management projects which will reduce the risk of flooding from rivers, the sea, groundwater and surface water for at least 300,000 homes.

## **Press release: HS2 appoints Neil Hayward as new HR director**

Neil will be a member of the High Speed Two (HS2) Ltd executive team and report directly to Chief Executive, Mark Thurston.

Neil has over 20 years experience working in large and complex organisations, at the most senior levels, delivering organisational improvements. He has held a number of senior human resources (HR) positions in both the private and public sector, including BT, the Ministry of Justice and Serco Group. Most recently as Group People Director at the Post Office Neil was part of the team that restored the company to profit, under public ownership, after some years of significant losses.

HS2 chief executive, Mark Thurston, said:

I welcome Neil Hayward to HS2 Ltd and am delighted that he is to lead our HR team.

HS2's success will come from its people, and Neil's experience in defining and implementing change at FTSE 100 and 250 companies, and in central government will be extremely valuable as we transition from a development company to one delivering Britain's new national high speed rail network.

Neil said:

HS2 is a transformational infrastructure project that can change

the economic geography of the country. That's a really important mission and it's hugely exciting to be joining the company now as it moves towards the major construction stages.

I am really looking forward to being part of the team that will deliver Europe's biggest infrastructure project which is of national significance for the UK.

Neil takes up his new position with HS2 Ltd on 13 November.
