

Notice: The Eden Rivers Trust: application made to impound water

The Environment Agency consult the public on certain applications for the abstraction and impoundment of water.

These notices explain:

- what the application is about
- which Environment Agency offices you can visit to see the application documents on the public register
- when you need to comment by

Press release: Tesco/Booker request fast track referral

Tesco and Booker have requested that the CMA make a 'fast track' referral to phase 2 in its investigation into the merger.

The Competition and Markets Authority (CMA) opened its [phase 1 investigation](#) into the merger in May which was due to be completed by 25 July. It is possible to accelerate the referral of merger cases to phase 2 when requested by the merging companies and if the CMA has sufficient evidence that the test for reference is met (see [notes for editors](#)).

If the CMA proceeds with a fast track procedure it would expect to issue a phase 1 decision within the next 10 working days. The statutory timetable for the in-depth phase 2 investigation would be 24 weeks.

The fast track process has been used in a number of CMA merger investigations previously including [BT/EE](#) and [Ladbrokes/Coral](#).

All information relating to the investigation is available on the [case page](#).

Notes for editors

1. The CMA is the UK's primary competition and consumer authority. It is an independent non-ministerial government department with responsibility for carrying out investigations into mergers, markets and the regulated industries and enforcing competition and consumer law. For CMA updates, follow us on Twitter [@CMAgovuk](#), [Facebook](#), [Flickr](#) and [LinkedIn](#).

2. Under the Enterprise Act 2002 (the Act) the CMA has a duty to make a reference to phase 2 if the CMA believes that it is or may be the case that a relevant merger situation has been created, or arrangements are in progress or in contemplation which, if carried into effect, will result in the creation of a relevant merger situation; and the creation of that situation has resulted, or may be expected to result, in a substantial lessening of competition within any market or markets in the United Kingdom for goods or services.
 3. Under the Act a relevant merger situation is created if 2 or more enterprises have ceased to be distinct enterprises; and the value of the turnover in the United Kingdom of the enterprise being taken over exceeds £70 million ('the turnover test') or as a result of the transaction, in relation to the supply of goods or services of any description, a 25% share of supply in the United Kingdom (or a substantial part thereof) is created or enhanced ('the share of supply test').
 4. All the CMA's functions in phase 2 merger inquiries are performed by inquiry groups chosen from the CMA's independent panel members. The appointed inquiry group is the decision-maker on phase 2 inquiries.
 5. Media enquiries to the CMA should be directed to press@cma.gsi.gov.uk or 020 3738 6798.

[Press release: Environment Secretary explores the future of farming at the Royal Norfolk Show](#)

Farmers across East Anglia could produce, sell and export more than ever before following the UK's exit from the EU with the help of cutting edge technology and innovation, the Environment Secretary said today.

On a visit to the Royal Norfolk Show on 28 June 2017, Environment Secretary Michael Gove met with researchers and businesses at the 'Innovation Hub' to find out more about the latest research and emerging agricultural technologies.

From a 'FitBit for cows' that provides real time information on the health of a herd, to a demonstration of how 'agrimetrics' data can support farmers and boost food production, pioneering agricultural technology (agri-tech) on display at the show could provide new opportunities for East Anglia's farmers.

Speaking at the show, Environment Secretary Michael Gove said:

Emerging technologies will play a vital role in boosting productivity and growth, unlocking the full potential of our farming industry as we adapt to a rapidly changing world and maintain our leading role on the global stage outside the European Union.

The East of England is a real hotbed of agricultural innovation and the enthusiasm and passion of the region's farmers, who exported a record £1.6bn of food and drink last year, is truly inspirational.

Agri-tech contributes £14.4bn to the UK economy every year, underpinning the UK's food and drink industry, our largest manufacturing sector. The government has already invested £160 million through the [Agri-Tech Strategy](#) to help develop innovative solutions from the laboratory through to the farm.

Dr Belinda Clarke, Director of [Agri-Tech East](#), an independent membership organisation supporting the development of the agri-tech cluster, said:

Innovation is most effective when it is focussed on solving clearly defined problems. By bringing progressive farmers, who are willing to pilot new approaches, together with those who have potential solutions, Agri-Tech East is facilitating a step-change in agri-food production that is productive, profitable and sustainable.

The Innovation Hub is a good showcase for the agri-tech cluster, showing how collaboration can accelerate innovation based on sound science.

The Environment Secretary also visited the show's food hall, meeting with food producers from across the east of England, and visited the 'Broads Village' which showcases the importance of the National Park to industry, culture and landscapes.
