

Press release: New panel launched to drive legal education

Public Legal Education (PLE) will be given a new focus following the launch of a panel that will bring key representatives together to support and drive forward legal education initiatives.

Solicitor General Robert Buckland QC MP will chair the first meeting of the newly established PLE Panel later today.

The Panel, formed of key organisations, will promote the importance of teaching people about the law and their basic civil and criminal rights – from knowing if you're entitled to a refund in a shop or whether you've been a victim of discrimination.

Speaking ahead of the meeting, the Solicitor General said:

Teaching people about their legal rights and responsibilities, together with helping them gain the confidence and skills to get access to justice can really make a difference to people's lives – as well as our legal system.

The new Panel will help drive forward Public Legal Education so more people can reap the benefits.

There are many ways to teach people about the law, such as interactive presentations, mock trials and role play exercises to awareness raising campaigns or information in leaflets – which can be tailored to different groups, from educating primary and secondary school pupils to prison inmates, community groups and homeless people.

The Panel will provide a forum for the Law Officers to work with organisations in the field, enable public legal education to flourish and to encourage initiatives which improve legal capability.

The Panel will meet bi-annually is formed of key PLE representatives including those from the following organisations: Citizenship Foundation, Legal Education Foundation, The Law Society, Bar Council, CILEX, Magistrates' Association, Ministry of Justice, Judicial Office, Solicitors Regulation Authority, Citizens Advice, Law for Life, Bingham Centre for the Rule of Law, Youth Access and Law Centres Federation.

Other participants may be invited to attend meetings on an ad hoc or permanent basis with the agreement of the Panel.

News story: Civil news: applications for supervision orders and extensions

Crucial difference between applications for supervision orders under s.31 Children Act and extension of an existing supervision order.

Supervision orders

Means and merit tests are not needed when applying for supervision orders under section 31 of the Children Act 1989.

Applications should be submitted as Special Children Act cases because that is the legislation which applies. Special Children Act cases are not subject to means or merit tests.

Extension of supervision orders

Means and merit tests do apply to extensions to supervision orders.

Applications should be submitted as Public Law Children cases because extensions to supervision orders are not defined as Special Children Act cases.

The legislation which applies is schedule 3, Part II Children Act 1989.

A Special Children Act quick guide is available on the Client and Cost Management System (CCMS) training website – see below.

Further information

Press release: UK hovercraft to tackle pollution & oil production in Caspian Sea

One of the world’s leading hovercraft manufacturers, Southampton-based Griffon Hoverwork, will carry out a study on using hovercraft to clear oil spills and support offshore rigs in the Caspian Sea.

The agreement, signed today with Kazakh state oil company KazMunayGas' subsidiary KMGSS and supported by the Department for International Trade (DIT), opens up a major new market to [Griffon Hoverwork](#) and the UK. Future contracts following the study are potentially worth over £100 million for new hovercraft supporting at least 70 jobs in the Southampton area.

The signing took place as International Trade Minister Greg Hands visited the UK Pavilion at the Astana Expo, showcasing the UK's world-leading expertise in oil & gas and other energy production.

International Trade Minister Greg Hands said:

Griffon Hoverwork is a prime example of the UK's engineering excellence, with the sort of world-leading expertise DIT is helping to showcase at the UK Pavilion in the Astana Expo. This agreement will see the UK using hovercraft to overcome complex environmental challenges in the Caspian Sea, with huge potential for jobs back in the UK.

Managing Director of Griffon Hoverwork , Adrian Went said:

This agreement on enabling work for using hovercraft in the Caspian Sea is a huge step for Griffon Hoverwork and the UK. It's been great to have this meeting and signing, with the support of the Department for International Trade, ensuring that our UK-based engineering will help tackle the major challenges in the region.

Environmental challenges

The Caspian Sea has seen water levels drop in recent years, potentially making large parts inaccessible to ships. Hovercraft have the ability to move over shallow water without disturbing oil spills, making them ideal for resupplying oil rigs in the area and cleaning up pollution.

Griffon Hoverwork will carry out an environmental impact assessment, to ensure that hovercraft can be used without impacting on local ecosystems, using technology it has developed with Southampton University.

UK and Kazakhstan

The UK is already the 6th largest investor into Kazakhstan, and DIT has helped create 51 partnerships between UK and Kazakh companies since 2012. Greg Hands also announced a doubling of UK financial support, up to £2.5 billion, available to UK companies looking to export to Kazakhstan, or to help Kazakh companies buy products and services from the UK.

The founding companies behind Griffon Hoverwork helped develop the world's first commercial hovercraft in the 1950s, and it already exports around the world from South America to the Far East.

The announcement comes as another UK company, Aberdeen based IPSS, opened a new site manufacturing pipelines in Atyrau, Kazakhstan. This is the first facility the company has opened overseas, supported by DIT, to gain a strong foothold in one of the world's key oil producing regions.

Notes to Editors:

- The UK is participating at the Astana Expo which runs for three months, ending 10 September 2017. The UK Pavilion shows the UK at its creative best and is sharing the UK's brilliant scientific and engineering expertise across the energy and mining industries.

Press release: Lord Price visits Africa to build shared trading links

Minister of State for Trade Policy Lord Price will visit South Africa and Namibia this week to meet trade ministers from the Southern Africa Customs Union (SACU) and Mozambique to discuss ways to avoid disruption to our current trading relationship.

While there he will also meet trade associations and local businesses. The UK government is committed to working with the Southern African regions and nations across Africa, building upon the announcement by the Prime Minister at the G20 Summit to support trade, investment and growth in Africa.

The visit comes after the [recent joint commitment by Dr Liam Fox and Priti Patel](#) to protect duty free access to the UK for 48 developing countries around the world.

Ahead of his visit, Lord Price said:

This visit shows the commitment of the British government to securing trade links in both developed and developing countries around the world. As we look towards our future outside the EU, we will continue to be a champion for free trade and an advocate for the benefits trade can bring, socially as well as economically.

I am excited to be travelling to South Africa and Namibia this week, to strengthen existing trading links with the region and build a mutually beneficial trading partnership. These discussions will allow us to continue to work together into the future to generate employment, prosperity and investment through free trade.

Lord Price will attend a roundtable with SACU and Mozambique trade ministers to begin discussions over how to work together to build on our existing trading relationship after the UK leaves the EU.

At this roundtable, Lord Price is expected to meet representatives from Botswana, Lesotho, Mozambique, Namibia, South Africa, and Swaziland – all 6 of which are partners in the EU's Economic Partnership Agreement (EPA) with Southern Africa. This development-focused trade agreement aims to create the right conditions for trade and investment to accelerate growth, helping to support regional integration and poverty eradication. Discussions are also likely to focus on steps to replicate as far as possible the effects of the EPA once the UK has left the EU.

News story: infocus global: EMERGE Boston 2017 mission – apply to take part

Applications are now open for the first Innovate UK infocus global entrepreneur mission for women focusing on human and machine interaction.

Innovate UK, Digital Catapult and the British Consulate General Boston are inviting female entrepreneurs to take part in a new global trade mission to the US.

EMERGE Boston 2017 is a one-week delegation of female founders to Boston, Massachusetts. It takes place from 10 to 15 October 2017.

The mission will coincide with Boston's [HUBweek](#), a collaboration that will bring together the most creative and inventive minds in technology, science and innovation.

EMERGE Boston 2017 will provide access to new international market opportunities for up to 15 UK SMEs looking to grow globally. It offers:

- access to Boston's innovation community and networks
- a chance to pitch your ideas to investors
- mentoring support
- practical workshops
- coaching and training
- a technology showcase at HUBweek's Demo Day

Are you eligible?

EMERGE is for female-led innovative startups and SMEs based in the UK. You can apply if you are a female founder working in human and computer interaction innovation with high growth potential. These can include:

- artificial intelligence / machine learning
- robotics
- the Internet of Things
- virtual and augmented reality

How to apply

- [register your interest](#) and receive application details by email
- complete the application form and provide a link to your 2-minute video pitch
- contribute £1,500 towards the cost of the mission
- the deadline for applications is Monday 4 September 2017
- we will notify successful applicants on Friday 15 September 2017

About infocus

Innovate UK launched the infocus programme in 2016. Its aims are to:

- get more women innovating in business
- give female entrepreneurs the support they need to grow their businesses
- create new role models for the next generation

Why go on a mission?

Take part in EMERGE Boston 2017 and you could:

- get a better understanding of the challenges and opportunities in exporting to the US
- find potential customers, investors and partners
- get insight into new markets for human machine interaction
- discover fresh ideas and insight from international thought leaders
- boost your profile in the UK and overseas through the GREAT Britain campaign
- improve your company and product pitches for international customers and investors
- learn how to develop a market-entry strategy
