

Guidance: Woodland tree health grant manual 2017: Countryside Stewardship

Updated: Manual now only applicable to agreement holders.

Use the manual to understand the rules and conditions that apply to agreements starting between 1 January 2017 and 1 April 2018.

Press release: Government to extend Public Lending Right scheme to e-book authors

The change to the Public Lending Right scheme is being introduced in the Digital Economy Bill and will mean authors of e-books and e-audiobooks are eligible for payment in the same way as those whose physical books are borrowed from libraries.

The UK is one of the first countries to extend its library lending compensation scheme to remote e-lending.

E-book lending has jumped 38% in the last year alone, with more than four million e-book loans and almost one million e-audiobook loans in Great Britain in the twelve months to April 2016.

Rob Wilson, Minister for Civil Society and responsible for libraries, said:

“We want to help public libraries embrace the digital age by improving access to e-lending and wifi services.

“This important change will put e-book authors on the same footing as those writers, illustrators and photographers whose physical books are borrowed for free.

“This legislation fulfils a manifesto commitment and underlines our support for the growing e-book sector, while ensuring that appropriate protections for rights holders are maintained.”

The Public Lending Right scheme is managed by the British Library on behalf of the Government, with more than £6 million of payments made to 22,000 authors, illustrators, photographers, translators and rights holders each year.

Roly Keating, Chief Executive of the British Library, said:

“With the rapid rise in popularity of ebooks and e-audiobooks in recent years, it’s fantastic news that authors’ PLR payments will now reflect remote ebook loans of their books from public libraries as well as the borrowing of hard copies.

“Over 22,000 writers, illustrators, photographers, translators and editors who have contributed to books lent out by public libraries in the UK receive PLR payments each year, so we look forward to working with even more new authors who are now eligible.”

The change comes after the Government funded a wifi roll-out across England, which benefitted more than 1,000 libraries, helping to increase access to digital services and e-lending.

Government has also launched a £4 million library fund to help disadvantaged communities and promote new digital and literacy projects. The Libraries Taskforce’s Libraries Ambition: Ambition for Public Libraries in England 2016 to 2021 also provides local authorities with practical and innovative options to help improve and develop services across the country.

[News story: Government publishes Custody Image Review](#)

The Home Office has today recommended to police chiefs that people not convicted of an offence should be given the right to request that their custody image is deleted from all police databases, with a general presumption that it must be removed.

That is one of a series of recommendations included in the Home Office’s report, published today (Friday 24 February) on the Review of the Use and Retention of Custody Images by police in England and Wales, as well as the current legal and operational framework by which they are governed.

Following consultation with key policing partners, the principal recommendation is that an individual not convicted of the offence in relation to which their custody image was taken may apply for it to be deleted. There should be a presumption that police will remove it from their databases unless retention is necessary for a policing purpose, and there is an exceptional reason for it to be retained. For those under the age of 18 when the image was taken, the review sets out there should be a strong presumption that police will remove it unless there is a highly exceptional reason to

retain it.

Brandon Lewis, Minister for Policing and the Fire Service, said:

Custody images and facial searching play an important role in the detection and prevention of crime but there is a clear need to strike a careful balance between protecting an individual's privacy and giving the police the tools they need to keep us safe.

I believe the recommendations of this important review strike the right balance. They will now be passed to the NPCC and the College of Policing to take forward, and I expect the changes to guidance to come into effect in the near future.

The report also recommends that police should automatically review all custody images held after specified periods to ensure that they are only retaining those they need to keep – without the need for the individual to apply for them to be deleted. It also recommends that – when undertaking these reviews – police should generally delete images of unconvicted individuals, those whose image was taken when they were under 18 and persons convicted of a non-recordable offence. The Home Office recommends that the specified period after which reviews should be undertaken vary according to the seriousness of the offence which the individual had been accused.

The review's key recommendations include:

- giving unconvicted people (i.e. persons who are not convicted of the offence in relation to which their image is taken) the right to request that their image is deleted
- a presumption that chief officers will delete images following such an application, except where retention is necessary for a policing purpose and there is an exceptional reason to retain it, or a highly exceptional reason in the case of individuals whose image was taken when they were under 18
- that the police should automatically review after specified periods all of the custody images that they hold to ensure that they are only retaining those they need to keep
- that under certain, limited circumstances (for example, if a conviction is very old or is for a minor offence) it may be appropriate for the police to delete the custody image related to that offence. However, other than where the conviction was for a non-recordable offence (or the image was taken when the person was under 18), there would be no presumption in favour of deletion.

The review also considered whether it would be possible to require all forces to undertake a weeding out exercise to identify custody images which should no longer be retained but concluded that such an approach would not be practical. The Police National Database does not link custody images to individual crime records. Therefore such an exercise would require forces to review all of the images that they hold which would be extremely lengthy

and resource intensive. It would also cost a very considerable amount of taxpayers' money and would unnecessarily take funding away from other areas of policing, potentially weakening the police's ability to protect the public.

News story: Avian flu confirmed at a farm near Haltwhistle, Northumberland

The UK's Chief Veterinary Officer has confirmed H5N8 avian flu in a small flock of chickens at a farm near Haltwhistle, Northumberland.

A 3km Protection Zone and a 10km Surveillance Zone have been put in place around the infected premises to limit the risk of the disease spreading. We have published [full details of the controls in place](#).

The flock contains about 35 birds. A number have died and the remaining live birds at the premises are being humanely culled. A full investigation is under way to determine the source of the infection.

Public Health England advises that the risk to public health from the virus is very low and the Food Standards Agency is clear that bird flu does not pose a food safety risk for UK consumers.

Press release: Boeing to open new production facility in Sheffield

Boeing Sheffield will enable the aerospace company to bring the manufacture of key high-tech actuation components and systems in-house. These include components for [Boeing's](#) next-generation 737, 737 MAX and 777 aircraft. This should enhance production efficiency and reduce costs.

Locating the plant alongside the [University of Sheffield's](#) world-class

[Advanced Manufacturing Research Centre \(AMRC\)](#) will also allow Boeing to initiate a major research and development programme. Specifically the aerospace company will look to innovate new techniques in manufacturing.

New jobs are also expected to be created in 2018.

Boeing is a co-founder of the AMRC. It is a member of the [high value manufacturing \(HVM\) Catapult Centres](#), supported by Innovate UK.

Sir Michael Arthur, President of Boeing Europe and Managing Director of Boeing UK and Ireland, said:

The UK provides Boeing with the talent and infrastructure we need to grow and maintain a high level of productivity and quality to meet our significant order book.

We are proud to expand our relationship with the UK still further with Boeing Sheffield. Our decision to start manufacturing high-value components in the UK is a step-change in our engagement and a further example of Boeing's commitment to grow here, supporting the UK's long-term prosperity.

The Boeing Sheffield news follows the recently announced [partnership between the AMRC and McLaren Automotive](#).

Ruth McKernan, Innovate UK's Chief Executive said:

This significant further investment and partnership by Boeing in Sheffield and the AMRC is excellent news for the region. It is testament to world-class expertise and facilities provided by the AMRC, and the high value manufacturing Catapult, supported by Innovate UK.

It comes off the back of McLaren Automotive's recent announcement that it will open a £50 million composites technologies centre next to the AMRC, illustrating the strength of advanced manufacturing innovation in the UK.
