

# News story: Air pollution advice to the public

Widespread moderate and high [air pollution levels](#) are currently being measured across many parts of the UK due to still and foggy weather conditions, with some isolated pockets of very high pollution mainly across southeast England but also possible for some urban areas of Northern Ireland, central and eastern England.

Some very high levels are also expected, mainly across southeast England but also possibly for some urban areas of Northern Ireland, central and eastern England. Air pollution is expected to remain low across Scotland.

Current air pollution levels are due to the continuing high pressure and associated light winds across the UK.

During periods of high air pollution adults and children with lung problems, and adults with heart problems, should reduce strenuous physical exertion, particularly outdoors, and particularly if they experience symptoms. People with asthma may find they need to use their reliever inhaler more often. Older people should also reduce physical exertion.

Anyone experiencing discomfort such as sore eyes, cough or sore throat should consider reducing activity, particularly outdoors.

For those parts of the country forecast to have very high levels of ambient air pollution, Public Health England is advising people to reduce physical exertion, particularly when outdoors and especially if they experience symptoms such as a cough or sore throat. Adults and children with lung problems, adults with heart problems, and older people, in areas where very high levels are recorded should avoid strenuous physical activity. People with asthma may find they need to use their reliever inhaler more often.

Light winds and foggy conditions are expected to continue through Wednesday, especially across southern and eastern parts. This will lead to the ongoing risk of areas of moderate air pollution levels, along with isolated pockets of high levels. Meanwhile across the north and west increasing winds should lead to air pollution returning to low levels.

These low levels are expected to spread to all parts during Thursday and Friday as stronger winds extend east across the UK.

For the latest forecasts and health advice, please visit the [Defra UK Air website](#) and alerts for high levels of air pollution are issued by Defra via the Air UK Twitter account [@DefraUKAir](#).

Further information:

- The 5-day forecast of predicted air pollution levels is continually updated on the UK Air website, with advice from Public Health England to

allow members of the public, particularly those who are most likely to be affected by air pollution, to take action.

- We also work with health charities to make sure vulnerable people are aware of any periods of low air quality.

## News story: Air pollution advice to the public

*Updated: Air pollution advice updated for 24 January.*

Widespread moderate [air pollution](#) is currently being measured across many parts of the UK today (24 January) due to still and foggy weather conditions, with some areas of high pollution across southeast England, very high pollution in London and isolated pockets of very high across eastern England.

High levels are expected across southeast England and some very high levels in London and the east of England. Moderate levels are being measured in south Wales, South West England, the East and West Midlands, Yorkshire and Humberside and Northwest England. Air pollution is expected to remain low across Scotland and Northern Ireland.

Current air pollution levels are due to the continuing high pressure and associated light winds across the UK.

During periods of high air pollution adults and children with lung problems, and adults with heart problems, should reduce strenuous physical exertion, particularly outdoors, and particularly if they experience symptoms. People with asthma may find they need to use their reliever inhaler more often. Older people should also reduce physical exertion.

Anyone experiencing discomfort such as sore eyes, cough or sore throat should consider reducing activity, particularly outdoors.

For those parts of the country forecast to have very high levels of ambient air pollution, Public Health England is advising people to reduce physical exertion, particularly when outdoors and especially if they experience symptoms such as a cough or sore throat. Adults and children with lung problems, adults with heart problems, and older people, in areas where very high levels are recorded should avoid strenuous physical activity. People with asthma may find they need to use their reliever inhaler more often.

Light winds and foggy conditions are expected to continue through Tuesday (24 January), especially across southern and eastern parts. This will lead to the ongoing risk of areas of moderate air pollution levels, along with isolated pockets of high levels. Meanwhile across the north and west increasing winds should lead to air pollution returning to low levels from Wednesday (25

January).

These low levels are expected to spread to all parts during Thursday (26 January) and Friday (27 January) as stronger winds extend east across the UK.

## **News story: Chief of the Defence Staff strengthens UK – Romania Defence ties**

He today welcomed to London General Nicolae-Ionel Ciucă, Chief of the General Staff of the Romanian Armed Forces, to discuss mutual interests and strengthen Defence ties. This follows Defence Secretary Sir Michael Fallon's [announcement](#) last year that the UK will send RAF Typhoon aircraft to Romania in support of the NATO Southern Air Policing mission.

General Ciucă and the Chief of the Defence Staff discussed the UK and Romania's partnership as members of NATO, UK deployments to Romania this year, and possible trade opportunities.

Chief of the Defence Staff Air Chief Marshal Sir Stuart Peach said:

The UK shares an important Defence relationship with Romania, both bilaterally, and as part of our membership of NATO.

I was pleased to welcome General Ciucă to the UK, and continue to recognise the key role Romania plays within the Alliance, including their commitment to increase defence spending to meet the 2% of GDP target this year.

To enable the UK's contribution to NATO Southern Air Policing, RAF Typhoons from RAF Coningsby will be based at Mihail Kogălniceanu Airbase for up to four months in 2017, the Defence Secretary said at the end of last year.

Additionally, as part of multinational NATO exercises, British land forces will deploy to Romania for various exercises this summer, demonstrating the Alliance's commitments on the south-eastern flank. Defence Engagement in 2017 will also include a Royal Navy Type 45 Destroyer visit to a Romanian port.

Chief of the Defence Staff Air Chief Marshal Sir Stuart Peach added:

Our deployments this year by land, in the air, and at sea, underline the UK's commitment to working within NATO alongside our Romanian friends.

The UK-Romania relationship was further strengthened by a [visit](#) last year by then Romanian Minister of National Defence Mihnea Motoc, who was hosted by the Defence Secretary.

During his visit General Ciucă is also due to visit the Northwood Headquarters, where he will meet senior UK military personnel from the Joint Forces Command and speak to Romanian officers based at the NATO Allied Maritime Command.

## **Press release: Charity trustees censured over repeated failure to file accounts**

The Charity Commission has today concluded its [inquiry](#) into [Apostolic Faith Mission International Ministries UK](#) (registered charity number 1096543). The Commission investigated the charity after it repeatedly failed to file its accounts ([see endnote 1](#)). The investigation concluded that the trustees had been responsible for mismanagement and misconduct. As result of the inquiry the charity is now in compliance with its legal duty to file accounts and £872,238 is now transparently and publicly accounted for on the register of charities.

The charity was ordered by the Commission to file its accounts ([see endnote 2](#)). A Commission accountant scrutinised the accounts and identified that they were not compliant with the charity accounting regulations and identified issues with the charity's internal financial controls. The inquiry found that the financial governance of the charity was inadequate, particularly in relation to how cash was handled.

The Commission ordered the trustees to implement recommended actions by way of a formal action plan to resolve the issues identified ([see endnote 3](#)). The Commission monitored the charity, and it submitted its 2014 and 2015

accounting information on time (for the first time in 10 years). To ensure the charity had complied with its order, The Commission met with the trustees in February 2016 and found that they had completed the actions set out in the action plan and were discharging their duties in relation to the governance of the charity including its financial controls by properly managing the charity's funds.

As a result of the Commission's engagement the financial governance of the charity has been improved.

The inquiry concluded that there had been mismanagement and misconduct by the trustees, due to their failures to file annual accounting information for 2013, and mismanagement by the trustees due to the failures in financial governance at the charity.

**Carl Mehta, Head of Investigations, Enforcement at the Charity Commission, said:**

Charities enjoy a range of benefits as a result of their status, but they also have a duty to the public, as well as a legal duty, to be transparent regarding their finances and submit accounts to be displayed on the register of charities.

The Commission takes this responsibility seriously and regards it as mismanagement and misconduct in the administration of the charity when a charity fails to submit their accounts. Trustees must also ensure that their accounts comply with the relevant accounting standards and that their charity has robust financial controls in place.

The Commission has produced guidance to assist trustees in implementing robust internal financial controls that are appropriate to their charity. [Internal financial controls for charities \(CC8\)](#) is available on GOV.UK. There is also a [self checklist for trustees](#) available.

The full report is available on [GOV.UK](#).

Ends

PR 03/17

#### **Notes to editors**

1. The Charity Commission is the independent regulator of charities in England and Wales. To find out more about our work, see our [annual report](#).
2. Search for charities on our [online register](#).

## Endnotes

1. The inquiry was opened on the 4 February 2014. The charity was previously part of the [class inquiry](#) in September 2013 for failing to submitting accounting information for the financial years ending 31 March 2011 and 2012.
2. On 12 February 2014, the inquiry exercised powers under section 84 of the Charities Act 2011 to direct the trustees to submit the relevant missing annual accounts, reports and returns for the charity for financial year ending 31 March 2013 to the Commission.
3. On 23 September 2014, the inquiry exercised power under section 84 of the Charities Act 2011 to direct the trustees to implement the Commission's recommendations.

## Press release: Work to start on Gateshead bridge

From:

First published:

23 January 2017

Part of:

Work to replace the bridge joints on Blaydon Haugh Viaduct on the A1 in Gateshead, will start tonight, Monday 23 January, maintaining this important route in the region.

Highways England will be replacing the bridge joints on both sides of the carriageway between junction 73 (Derwenthaugh) and junction 74 (Scotswood).

Work will start on the southbound carriageway and temporary road plates will be fitted over the bridge so the route can remain open during the day.

The work will be carried out overnight between 8pm and 6am and a temporary speed limit of 50mph will be in place.

Once work is completed on the southbound carriageway, work will then start on the northbound carriageway. Highways England project manager Michael Hoult said:

It is essential that we carry out this maintenance work on the bridge joints at Blaydon Haugh Viaduct.

We will be carrying out the work overnight when traffic levels are

at their lowest to keep disruption for drivers to a minimum.

Laying these temporary plates over the expansion joint will allow us to keep the bridge fully open during the day to help keep drivers on the move.

Preparatory work is being carried out on Monday 23 and Tuesday 24 January. The temporary road plates will then be installed on the southbound carriageway overnight on from 8pm on Saturday 28 January until 10am on Sunday 29 January.

The southbound carriageway will then be closed overnight (8pm-6am) from Monday 30 January, seven days a week, until the bridge joint has been replaced. This work is dependent on reasonable weather conditions.

An extended closure will be required when the work has been completed on the southbound carriageway to remove the road plates. Further details on the closure will be released closer to the time.

### **General enquiries**

Members of the public should contact the Highways England customer contact centre on 0300 123 5000.

### **Media enquiries**

Journalists should contact the Highways England press office on 0844 693 1448 and use the menu to speak to the most appropriate press officer.
