

Capita announced as preferred bidder for Gas Safe services

Capita Plc will continue to operate the official register of engineers licensed to undertake gas work on behalf of The Health and Safety Executive (HSE).

HSE today announced the outsourcing company as the preferred bidder to deliver the five-year contract.

Following a robust public procurement process, Capita Gas Registration and Ancillary Services (CGRAS) – a division of Capita Plc – was declared the preferred bidder to provide Gas Safe registration services from 1 April 2019 – 31 March 2024.

The contract award is now subject to a statutory 10-day standstill period in which other companies can contest the decision.

CGRAS will continue its provision of the service having operated the Register since 2009 but with several service enhancements.

Philip White, HSE's Director of Regulation, said: "During the procurement process we received several strong bids and we are pleased with the interest the tender opportunity generated.

"The bid from Capita / CGRAS was the strongest on cost and quality and we are confident they will continue to raise the standards of gas safety and provide a gas safe home for everyone."

HSE said that in addition to the strength of Capita's bid for the next concession, it felt assured by the way CGRAS had managed GSR services over the last nine years.

Mr White added: "We will continue to employ a thorough governance process, including key performance indicators and service level agreements with potential financial penalties to manage the contract closely to ensure services are delivered in a cost-effective manner and the needs of gas engineers and consumers are met."

The Gas Safe Register is fully funded by registration fees (it has around 132,000 registered engineers and 75,000 registered businesses) and fees for building regulation notifications.

There is no action required for businesses and engineers currently registered and no change to registrations or renewal dates. All contact numbers will remain the same and registered engineers will be informed by the provider of any changes to the service that may affect them before they are introduced.

Anyone working on a gas appliance without being registered is doing so illegally and could be prosecuted.

Notes to Editors:

- *The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. www.hse.gov.uk*
- *More about the legislation referred to in this press release can be found at: <http://www.legislation.gov.uk/ukxi/1998/2451/contents/made>*
- *HSE news releases are available at <http://press.hse.gov.uk>*
- *The Gas Safe Register is the only official list of domestic gas engineers who are competent and can work legally on gas appliances and installations.*
- *The current registration fees are available on the Gas Safe Register website (<https://www.gassaferegister.co.uk/help-and-advice/becoming-registered/registration-fees/>) . The initial registration fee is £362, with an annual renewal charge of £152 (if renewing online).*
- *The services the Gas Safe Register provides include:*
 - *Consumer access to the list of registered engineers (allowing consumers to check that engineers are registered and competent to complete planned work)*
 - *Technical helpline and advice for engineers*
 - *An inspection regime to monitor engineers' competency, with sanctions for unsafe gas work*
 - *Raising consumer awareness of gas safety and carbon monoxide risks*
- *There will be several changes and improvements during the new concession, including:*
 - *A single UK-wide service that will operate across Great Britain and Northern Ireland*
 - *Revised inspection targets – by applying a risk-based approach to target inspections where they will have most impact, the number of inspections will reflect the number of businesses registered and the risk these businesses and their engineers represent. This will result in an estimated increase of approx. 20% in the number of inspections in Year 1 compared to the final year of current agreement.*
 - *Enabling registered engineers to more easily access data held about them (such as inspection history and findings, risk rating).*
 - *A commitment to explore the benefits of introducing student registration.*
 - *The introduction of an advisory panel to the Register with representation from across the industry, focussing on the smaller businesses that are not represented on other industry platforms, to improve engagement and communication between the industry and the Register.*
- *In 2017, HSE issued more than £800,000 in fines and prosecutions resulted in a combined five years of jail time.*
- *Further information about the services provided by Gas Safe Register is available on the [HSE website](http://www.hse.gov.uk) and the [Gas Safe Register website](http://www.gas-saferegister.co.uk).*

Car wash company fined for insurance breach

A car wash company has been fined for not having employers' liability insurance.

Birmingham Magistrates' Court heard how the company was unable to produce a certificate of insurance during an inspection which was part of an initiative with West Midlands Police and Birmingham City Council.

An investigation by the Health and Safety Executive (HSE) following the discovery in January 2018, found that the company did not have employers' liability insurance in place so was unable to produce a certificate. Employers' liability insurance ensures employers have at least the minimum level of insurance to cover against claims brought by employees that are injured at work or become ill as a result of their work.

GMG Car Wash Ltd of Exeter Street, Birmingham pleaded guilty to breaching Section 4(2)(b) of the Employers' Liability (Compulsory Insurance) Act 1969 and has been fined £650 and ordered to pay costs of £500.

Speaking after the hearing HSE inspector Christopher Maher said: "Employers carrying out a business in the United Kingdom must have Employers' liability insurance in place. Should an incident have occurred at the premises the failure to have insurance would mean that employees may not get any compensation for any injuries or ill-health attributable to their work."

Company fined for insurance breach

A company that carries out maintenance and repair of motor vehicles has been fined for not having employers' liability insurance.

Birmingham Magistrates' Court heard how the company were unable to produce a certificate of insurance during an inspection which was part of an initiative with West Midlands Police and Birmingham City Council.

An investigation by the Health and Safety Executive (HSE) following the discovery in January 2018, found that the company did not have employers' liability insurance in place so were unable to produce a certificate. Employers' liability insurance ensures employers have at least the minimum level of insurance to cover against claims brought by employees that are injured at work or become ill as a result of their work.

A E Motors Birmingham Ltd Florence Street, Birmingham pleaded guilty to breaching Section 4(2)(b) of the Employers' Liability (Compulsory Insurance) Act 1969 and have been fined £726 and ordered to pay costs of £557.

Speaking after the hearing HSE inspector Karen Sweeney said: "Employers carrying out a business in the United Kingdom must have Employers' liability insurance in place. There have been over 7,000 injuries and 33 fatalities during the past five years in motor vehicle repair shops. Should an incident have occurred at the premises the failure to have insurance would mean that employees may not get any compensation for any injuries or ill-health attributable to their work."

Charity fined after injuries to member of the public

A charity has been fined after a member of the public lost her leg when she became trapped under a lorry carrying a fairground ride.

Peterborough Magistrates Court heard that, on 4 November 2015, a member of the public was struck by a lorry during the set up for the Bonfire Night 2015 Event on Midsummer Common. She suffered extensive injuries including a crush injury of her right leg which resulted in in amputation above the knee, a degloving injury to her lower abdomen and right leg, with open fractures of the right leg, fractured ribs and a collapsed lung.

An investigation by the Health and Safety Executive (HSE) found that Cambridge Live failed to put in place suitable controls to prevent members of the public from being struck by large vehicles.

The company failed to organise safe workplace transport on Midsummer Common whilst setting up for the event, this meant that appropriate controls such as such as temporary barriers were not put in place to segregate vehicles and pedestrians.

Cambridge Live pleaded guilty to breaching Section 3(1) of the Health and Safety at Work etc. Act 1974 and Regulation 3 of the Management of Health and Safety at Work Regulations 1999. The charity was fined £30,000 and ordered to pay costs of £6,654.37.

Speaking after the hearing, HSE inspector Graeme Warden said: "This horrific accident could have been prevented had Cambridge Live identified and put in place better controls to ensure that members of the public could safely cross Midsummer Common whilst the Bonfire Night Event was being set up.

"The risks involved with workplace transport are well known and pedestrians being struck by large vehicles often results in death, or life-changing injuries, such as those suffered as a result of this incident.

"The risk assessment carried out by Cambridge Live prior to the event had identified the risks involved with a collision between pedestrians and large vehicles, but failed to set out suitable measures to prevent this from happening. On this occasion segregation between pedestrians and vehicles could have been achieved by using temporary barriers."

HSE appoints experts in gig economy and mental health to Workplace Health Expert Committee

The Health and Safety Executive (HSE) has appointed two new experts to its independent Workplace Health Expert Committee (WHEC).

WHEC is a scientific and medical expert committee which provides independent, expert opinion to HSE by identifying and assessing new and emerging issues in workplace health.

Dr Joanna Wilde and Dr Paul Litchfield will join WHEC in September where they will support the publication of accounts of the latest evidence to support of HSE's work on health issues.

Dr Wilde has specialist expertise in the behavioural and social sciences and is a leading expert in the effect of psychosocial factors on workplace health. A Fellow of the British Psychological Society, her current research focuses on the health problems inherent in new structures of working relationships, often described as the 'gig economy'. Joanna also brings personal experience to the role as she has suffered from chronic ill health through her working life.

Dr Litchfield was Chief Medical Officer for BT and has been active in the field of workplace health and safety for more than 35 years. Paul has been involved in UK and European initiatives aimed at promoting good physical and mental health to improve rehabilitation back into work and to reduce the stigma of mental ill health. In 2015 he was appointed Chair of the UK's What Works Centre for Wellbeing, which is dedicated to understanding what can be done to improve wellbeing across society.

Professor Andrew Curran, HSE's chief scientific adviser said:

"I'm very pleased to announce that two experts, Dr Joanna Wilde and Dr Paul Litchfield, are joining WHEC from September 2018. They both bring a wealth of knowledge and expertise to the committee, and we welcome the unique perspectives they will bring to the committee's work on health issues."

WHEC considers chemical and physical hazards, and human, behavioural and organisational workplace factors which lead to physiological and psychological ill health.

The committee assesses the evidence base and seeks to effectively and appropriately communicate the resultant health risk.

Working under the leadership of an independent Chair, Professor Sir Anthony Newman Taylor, in recent years the committee has prepared reports on health issues including sedentary work, the risk of lung cancer from exposure to respirable crystalline silica, bakers' asthma and work-related stress.
