

Have your say on a new Rail Service for Wales

Passengers and interested parties across Wales and the Borders are being invited to give their views on what they want from the next Wales and Borders Rail Service.

The Transport for Wales consultation, which also separately considers the South Wales Metro, invites views on a range of issues including frequency of rail services, mobile charging facilities, live travel information and fares. The current Arriva Train Wales service is due to end in October 2018.

Economy and Infrastructure Secretary, Ken Skates said:

“I’m pleased that Transport for Wales is undertaking this second consultation on the Wales and Borders Rail Service which reflects the importance of the network to passengers. I’d like to thank interested parties for their valuable feedback during the first consultation process and for the enthusiastic participation of so many so far.

“We inherited a franchise which was let on a zero growth basis and no longer fully meets the needs of a modern Wales. Now we have a fantastic opportunity to ensure that the next contract, the Welsh Government’s first, is developed with the passenger at its heart.

“With this in mind, we’re keen to ensure that our new service takes full account of what passengers want, and provides not only for current requirements but also allows for future growth, quality improvements and is able to adapt to ever changing technology.

“Our extensive programme of engagement will also feed directly into the procurement process, with four bidders being expected to demonstrate how they will deliver a service that meets passengers’ needs.”

To ensure as many views as possible are gathered, Transport for Wales will be hosting engagement events across Wales and running a social media campaign. Young people’s and Easy Read versions of the consultation are also be published to encourage feedback from a wide range of partners and service

users.

The full consultation documents can be found at:

Minister welcomes latest tranche of international Sêr Cymru scientists to Wales

This is the message from Wales' Skills and Science Minister, Julie James as she welcomed the latest tranche of international research Fellows and Chairs to Wales at a special reception in Cardiff last night to celebrate Sêr Cymru investments and the start of the second phase of the programme.

Sêr Cymru II aims to build on the success of the original Sêr Cymru programme, which supported the establishment of four Sêr Cymru Chairs and three research networks in Wales across STEMM (Science, Technology, Engineering, Maths and Medicine) subject areas.

This latest phase of the programme involves more than £45m investment – £29m from European funding streams – and it will fund more research chairs, 'Rising Stars' and research fellowships and include special support for those returning to work following a career break.

Led by the Welsh Government, Sêr Cymru delivers funding from the European Union (both COFUND via Horizon 2020 and European Regional Development fund via WEFO), the Welsh Higher Education sector and the Higher Education Funding Council for Wales (HEFCW).

The funding deployed through the programme aims to attract and develop some of the world's best scientific research talent in Wales, to deliver economic growth and high quality jobs.

The overall investment in the programme since its launch in 2013 now stands at nearly £100m.

Welcoming the latest tranche of Sêr Cymru II talent, Skills and Science Minister, Julie James said:

"Increasing our already impressive research capabilities by attracting brilliant new talent to Wales helps to drive up our economic prosperity by creating well paid and stimulating jobs.

"Sêr Cymru really is a partnership approach, bringing together Welsh Government, European and academic resources to deliver a programme that places Wales at the cutting edge of research developments aimed at tackling real issues such as human disease, new energy sources and innovative manufacturing and materials technologies.

"Building our research capacity also makes Wales more attractive for further investment and helps to raise our profile on an international stage. Our research discoveries can also be commercialised, creating more and better jobs for Wales which we aim to develop and keep here."

Wales' Chief Scientific Adviser, Professor Julie Williams, added:

"This programme will produce a step change in research capacity and put Wales firmly on the map as a centre of scientific discovery. These young people will be the leaders of tomorrow."

One of the latest Sêr Cymru II intakes to benefit from the programme is Dr. Catrin Williams; a multidisciplinary researcher attached to Cardiff University whose Fellowship spans the STEM subjects. One of the key areas her research aims to address is how electromagnetic fields interact with biological systems.

Explaining what this means and why she was keen to get involved with Sêr Cymru II, Catrin said:

"My area of work – examining how electromagnetic fields interact with biological systems – put simply is about looking at the impact microwaves (found in common devices such as mobile phones, Wi-Fi and microwave ovens to more advanced equipment such as those used in hospitals for treating cancers and heart diseases) have on living things.

"Some of the current impacts these appliances have on us are quite obvious, for example improved communications, faster cooking times and more effective medical treatments. What are less obvious are the hidden or longer term impacts these microwaves might be having on us, such as potential molecular changes in our cellular make-up."

Dr. Williams continued:

"These potential changes may be positive or negative, leading to therapeutic or destructive outcomes. Even destructive changes may lead to positive results, for example a better understanding of the risks associated with microwaves and how these can be minimised or

avoided. Additionally, we can also look at how potential destructive outcomes can be used to our advantage, such as in the development of new technologies and treatments that lead to the more efficient and effective removal or avoidance of cancers and some cardiac diseases.

“At this point we simply don’t know what opportunities and challenges microwaves present and this is why this area of research is so exciting and important.”

Cabinet Secretary to celebrate the best of Wales in Dubai

In addition to a number of engagements to promote Welsh culture and increase business links between Wales, Dubai and the wider United Arab Emirates, the Cabinet Secretary will join a record twenty five of Wales’ finest food and drink producers at the Gulfood Trade Show, one of the world’s largest annual food and beverage exhibitions.

The Trade Show is an opportunity to promote Wales’ food and drink sector on the international stage and help Welsh producers’ efforts to establish new business relationships and expand their sales into potentially lucrative new markets.

During the visit, the Cabinet Secretary will announce she is making £2.4million available to ensure Wales remains well-represented at high profile food and drink trade events and visits around the world over the next two years, providing further opportunities to showcase Wales and world class Welsh produce.

The Cabinet Secretary said:

“St David’s Day presents us with a fantastic opportunity to celebrate our people, our history, our culture, and, of course, our high quality larder of food and drink produce.

“Wales’ food and drinks sector is a success story. We are already more than half way towards achieving our target of 30% growth in the sector by 2020, generating over £260 million from exports.

Almost 90% of these are going to the EU, which is why we strongly advocate, on behalf of Welsh businesses, continued full and unfettered access to the European Single Market.

“It is important we remain an outward focused and welcoming nation.

The challenges presented by a “Hard Brexit” are obvious but I am encouraged by the fact Wales’ food and drink sector is well placed to tackle the challenges we now face and grasp new opportunities.

“International exhibitions are vital in raising Wales’ international profile as they present the opportunity for Welsh businesses to prosper by entering new overseas markets. I am delighted, therefore, to confirm we are investing £2.4m over the next two years to have a strong presence at a series of important food and drink exhibitions and trade visits both in the UK and overseas including a continuation of our ongoing presence at Gulfood.”

Lesley Griffiths will also support an additional Welsh Government-led trade delegation involving twelve small and medium sized enterprises from Wales aiming to grow their business in Dubai and the wider region. The delegation will visit the site of the next World Expo, taking place in Dubai in 2020.

Expo 2020 offers significant commercial opportunities for Welsh businesses of all sizes and in many sectors.

Wales’ cultural excellence will be showcased in Dubai by the presence of the Welsh National Opera who will be performing Puccini’s Madame Butterfly and La bohème over the first two weeks of March. In addition, during the evening of St David’s Day itself, Lesley Griffiths will attend a special performance by a trio of Welsh National Opera performers at a ‘Wales – Business and Culture’ reception at the British Embassy in Dubai. The event will also provide a high profile opportunity to show Wales’ strengths as a place to visit, study and do business.

To end her visit, the Cabinet Secretary will speak at a celebratory St. David’s Day Ball organised by the local Welsh Club.

[Kirsty Williams welcomes new OECD report on Welsh education reform](#)

In November 2016, after an invite from the Education Secretary, the highly-respected Organisation for Economic Co-operation and Development (OECD) visited Wales to examine the work underway on education reforms to make sure they are on track.

The [independent findings](#) (external link) published today state that

“the OECD has witnessed progress in several policy areas and a shift in the Welsh approach to school improvement away from a piece

meal and short term policy orientation towards one that is guided by a long term vision.”

The report also found Wales’ reforms were characterised by close working between government and the education sector with a commitment to improvement “visible at all levels of the education system.”

Kirsty Williams said:

“I invited the OECD to come to Wales to challenge what we are doing to reform our education system and I welcome their findings. They have concluded that we are making progress and we have a long term vision in place to keep improving.

“We are already taking action on many of their recommendations, from creating a new national academy for leadership, transforming initial teacher education, launching new professional standards, and introducing a national approach to professional learning.

“Our job is to continue our national mission of education reform focused on driving up standards and helping every learner in Wales, whatever their background, fulfil their potential.

“As the OECD recommends, our focus must be on making sure we continue to properly implement our vision for reform. I am committed to raising standards, reducing the attainment gap and delivering an education system that is a source of national pride and confidence.”

Both the Education Secretary and Andreas Schleicher, Director for Education and Skills for the OECD, will today address representatives from all of Wales’ 205 state secondary schools at a special event in Cardiff.

Our special relationship must boost trade and remove barriers – First Minister’s message ahead of United States visit

Ahead of the visit, the First Minister is calling on the special relationship to be a vehicle for removing barriers and boosting trade between Wales and the USA.

With more than 250 American owned companies based in Wales, the United States is one of Wales' most important trading partners and accounted for almost 40 percent of all our inward investment projects last year.

Over the next four days, the First Minister will meet with companies looking to invest and expand in Wales and will discuss trade and business links with political representatives.

As part of the response to Brexit, the Welsh Government will be strengthening its network of trade and investment offices across the US. The Welsh Government currently has offices in Washington, New York, San Francisco, Atlanta and Chicago.

The First Minister will also host a St David's Day reception on Capitol Hill for key political figures and investors, and a reception in New York geared towards promoting the Welsh tourist industry.

Speaking ahead of the visit, First Minister Carwyn Jones said:

"For Wales, the special relationship is about building on the strong cultural and trade links that already exist between our two countries.

"Wales has long been a destination of choice for many American businesses and we want to welcome even more in the future.

Equally, Welsh businesses have been successful in selling to the United States across a range of sectors and I believe we can do even better in the future.

"In my discussions with American businesses, politicians and diplomats, I will be raising the importance of further developing free trade between our countries and the removal of barriers to make trade between us easier and quicker.

"We will also be committing additional resources to North America. We need a permanent presence in Canada, and a strengthened network here in the US. That is a priority for me over the next twelve months, as we restructure our activities overseas to take advantage of new economic opportunities."
