Chinese central authorities released a detailed 10-year youth development plan Thursday, vowing better education, employment and healthcare for the nation's youth.

"Youth" in the context of the plan released by the CPC Central Committee and the State Council refers to those aged from 14 to 35.

The Middle- and Long-term Youth Development Plan (2016-2025) sets a general goal of establishing a "youth development policy system and work mechanism" by 2020 and improving the system by 2025.

Specifically, the plan sets educational goals of an average 13.5 years of education for the newly added labor force and a gross higher education enrollment rate of over 50 percent within 10 years. It aims for 90 percent of the groups to meet physical standards and give them more accesses to mental and physical care.

"Youth is the country's future and the nation's hope," reads the plan.

Authorities will strengthen educational campaigns targeting different ages within the group to champion patriotism and socialism with Chinese characteristics, making the "Chinese dream" a common goal for them, according to the plan.

The government will also narrow the educational gap across the country and pump more capital and resources into the less developed western areas, it says.

[China punishes Weibo for porn](#)

Weibo, a Chinese Twitter-like service, has been punished for spreading pornography, as part of a nationwide crackdown, the anti-pornography authority said Friday.

The National Office Against Pornographic and Illegal Publications in February launched a new round of its national campaign against the production, sale and distribution of illegal publications and online erotic content that could affect juveniles.

Investigators found that Weibo started providing audio-visual programs in February 2015 without obtaining a license, and such content contained obscene videos.

Weibo was fined 30,000 yuan (4,359 U.S.dollars) by Beijing administrative law enforcement, and required to immediately rectify the problem.

The office asked all online service providers to learn lessons from the Weibo case, tackle pornography and shut down accounts with illegal content.

[News story: Joint statement: India-UK Defence Partnership](#)

Updated: added Location

Minister of Defence Shri Arun Jaitley and Secretary of State for Defence Rt Hon Sir Michael Fallon MP set out a shared vision for the India-UK Defence Partnership.

At the invitation of Minister of Defence Shri Arun Jaitley, the Secretary of State for Defence Rt Hon Sir Michael Fallon MP visited India for the India-UK Strategic Defence Dialogue during 11-14 April 2017. The visit reaffirmed and consolidated UK-India defence cooperation in the framework of the Defence and International Security Partnership, agreed in November 2015, and the subsequent Joint Statement between the governments of India and the UK in

November 2016.

This enduring defence partnership will encompass not only cooperation in defence industry but also stronger military to military engagement, including training and advanced joint exercises.

The renewed engagement will place capability and technology development at its core and seek to harness the complementary strengths of both nations in defence manufacturing and use the combined strengths of their respective private and public sectors to develop defence solutions for use in both home and shared export markets.

The Defence Ministers will also continue to consult and co-ordinate policies across a range of global security challenges, especially those intended to eliminate the scourge of international terrorism, in pursuit of their shared goal of a more secure world.

An Enhanced Defence Partnership

Based on the Defence and International Security Partnership (DISP) and building on existing Defence Consultative Group (DCG) mechanisms, both sides will explore additional areas for institutional engagement.

The Ministers agreed to further strengthen their naval and maritime interactions, including enhanced Maritime Domain Awareness (MDA) through the bilateral technical agreement to exchange information to track terrorist and pirate vessels, a key deliverable of the DISP. The two Ministers also agreed to further develop cooperation between the UK Hydrographic Office and the Indian Navy Hydrographic Office.

India and the UK will endeavour to build a range of Capability Partnerships focussing on varied aspects of military effectiveness such as specialised training interactions and exchange of best practices in the following areas: Counter Terrorism (CT), Counter Improvised Explosive Devices (CIED), Air Force Training, Air Total Safety, Aircraft Carriers, Maritime Safety, Shipbuilding and UN Peacekeeping. Efforts are already underway with exchanges of subject matter experts to discuss air safety collaboration and future CT requirements. The Ministers tasked the relevant Executive Steering Groups (ESGs) to finalise proposals for consideration at the next DCG meeting scheduled later this year.

As India and UK continue to transform and modernise their defence structures with a shared desire to maximise the efficiencies and operational benefits of establishing joint force structures, the two Ministers agreed to sharing relevant experience in this domain.

Defence Industry

Whilst acknowledging the progress being made, the two Ministers recognised the potential for further cooperation in defence manufacturing between UK and Indian companies under the 'Make in India' framework.

Minister Jaitley welcomed the UK's interest in manufacturing in India as

evidenced through recent announcements including the memorandum of understanding (MOU) between Bharat Dynamics Ltd and Thales UK on technology transfer opportunities for missile systems and efforts to develop an Advanced Hawk jet trainer jointly by the BAE Systems and Hindustan Aeronautics Limited (HAL).

To further encourage and facilitate cooperation between UK and Indian companies, the two Ministers agreed to extend the current Defence Equipment Cooperation MOU and work towards early completion of an expanded MOU that will provide a platform for UK and Indian industries to collaborate on and support transfer of technology on projects in areas of mutual interest.

The two Ministers welcomed measures to ensure life cycle support and sustenance of UK-origin defence platforms used by India, which may include setting up joint ventures and other collaborative arrangements.

The UK and India will encourage interactions between the Indian Army Design Bureau and Defence Equipment and Support (DE&S)/Army Capability Branch through their Defence Equipment Sub-Group.

The UK and India will explore establishing a secure communications method in order to share classified material. The two countries will also consider upgrading their bilateral General Security Arrangement.

Science and Technology

The two Ministers recognised the need for stronger R&D cooperation, including access to defence R&D training, to enable new and vibrant technology partnerships across the defence domain.

They noted recent progress made on Defence Science and Technology collaboration with the signing of the Phase 2 follow-on research Collaborative Project agreement on Human Sciences, signed at Aero India 2017.

Conclusion

The above commitments will better enable the UK and India to meet the evolving threats and challenges that face democracies in the 21st century. Both countries recognised their shared perspectives on the regional and international security situation and agreed to maintain their close interaction in this regard.

Secretary of State for Defence Rt Hon Sir Michael Fallon MP thanked Minister of Defence Shri Arun Jaitley for the warm hospitality extended to him and his delegation and looked forward to a return visit by the Minister of Defence to the UK.

The UK government has now introduced its callous rape clause policy. Nicola Sturgeon explains the policy here.

[Press release: John Millen jailed for 8 months for illegal waste operation](#)

The operator of a waste site in Sittingbourne, Kent has been imprisoned for 8 months for the illegal disposal, sorting and treatment of construction demolition waste.

John Millen, 50, trading as K.M. Millen Grab Hire, received the custodial sentence today (Wednesday 12 April) at Maidstone Crown Court after pleading guilty to using the Gas Road site for illegal waste transfer activities.

The Environment Agency brought charges against Mr Millen following an investigation in December 2014 which established over 40,000 tonnes of waste had been illegally deposited on the site.

Mr Millen was subsequently provided with clear guidance on the action he was required to take and an Enforcement Notice to clear the waste from the site by the end of March 2015 was issued. However, after the three months had expired it was clear that none of the waste had been removed and he continued to crush, treat and deposit waste.

The activities being undertaken by Mr Millen were in clear breach of environmental legislation and would have required an Environmental Permit. Mr Millen did not apply for an appropriate Environmental Permit and continued to operate, avoiding significant costs to his business.

Alan Cansdale, Environment Manager at the Environment Agency said:

Mr Millen was fully aware that he was not allowed to store that amount of waste on the site, but continued to accept more construction and demolition waste whilst ignoring the advice and guidance issued to him by Environment Agency Officers. His actions put the environment at risk.

Waste crime can undermine legitimate businesses, so we work closely with businesses to help them comply with the law. In cases like

this, where illegal operations are connected to licensed businesses, we have no hesitation in prosecuting those involved. We want to make sure that waste crime doesn't pay.

Whilst passing sentence, Judge St. John-Stevens said that Mr Millen was the "controlling mind of the business" and he ignored all advice offered from the Environment Agency regarding his business operations
