

EUIPO's Academy Tuesday webinars: **March 2018**

Open to all, each webinar lasts approximately 30 to 60 minutes and you will be able to engage with our speakers via a live chat.

6 March

The Use of a trademark in a form different than the registration – recent case law and principles (English)

- Time: 10:00 – 11:00 CET
- Level: Advanced

EDB for SMEs (English)

- Time: 11:30 – 12:00 CET
- Level: Intermediate

13 March

Colour combinations: getting back to WYSIWYG (English)

- Time: 10.00-11.00 CET
- Level: Advanced

20 March

Decisions of the Trimester of the EUIPO Boards of Appeal (English)

- Time: 09.00-10.00 CET
- Level: Advanced

27 March

Decisions of the Trimester of the GC and the CJEU (English)

- Time: 10.00-11.00 CET
- Level: Advanced

E-filing of Inspections and Legalisations (English)

- Time: 11.30-12.00 CET
- Level: Intermediate

Please consult the [Learning Portal calendar](#) for more details. Please note that three days after the broadcast, the recorded webinars will be available at the same link.

Animal welfare

I attended yesterday the presentation by the Dogs trust of the need for better regulation to prevent electric shock collars and others devices that could do harm. I pledged my support to sensible reform to ensure no cruelty to dogs.

Press release: Fourteen men fined for fishing without a licence

The Environment Agency is reminding anglers of the importance of having a rod licence after successfully prosecuting fourteen men last month.

The anglers were caught committing the offences in 14 separate incidents across the North East in July, August and September last year, including three in Hexham, and one each in Bellingham, Harlow Hill and Wylam. They received combined fines of £3,749, including £1,784 in costs and £300 victim surcharge. All pleaded guilty with the exception of two who were found guilty in their absence.

Rachael Caldwell, Enforcement Team Leader at the Environment Agency, said:

We've started the year as we mean to go on – taking strong action against illegal fishing.

The majority of anglers fish legally and purchase a rod licence. Those that don't are cheating their fellow anglers and endangering the future of the sport. In addition rod licence cheats risk a criminal conviction, a significant fine and could lose their

fishing equipment.

The Environment Agency carries out enforcement work all year round. Fisheries enforcement work is intelligence-led, targeting known hot-spots and where illegal fishing is reported.

All income from rod licence sales is used to fund Environment Agency work to protect and improve fish stocks and fisheries, including improving habitats for fish and facilities for anglers, tackling illegal fishing and working with partners to encourage people to give fishing a go.

Buying a rod licence is quick and easy – you can buy them online at Gov.uk.

Anyone witnessing illegal fishing incidents in progress can report it directly to the Environment Agency hotline on 0800 80 70 60. Information on illegal fishing and environmental crime can also be reported anonymously to Crime stoppers on 0800 555 111.

Conservatives scramble for extra time after struggling to cope with scale of Brexit

It is bizarre that the government was so hasty in its invocation of Article 50, but is now scrambling for extra time in transition due to the scale of the task ahead.

News story: Britain set to launch Combat Air Strategy, Defence Secretary announces

The MOD will work across Government and closely with industry and international partners to explore the UK's future Combat Air capabilities,

building on the Industrial Strategy and refreshed Defence Industrial Policy launched last year.

The strategy will examine the operational capability needed in the future and the skills and resource required to deliver it. The work will take new and emerging technology into account, as well as export potential, whilst testing British industry's ability to deliver our future requirements. It is expected to be launched in the summer.

Defence Secretary Gavin Williamson said:

Since the birth of airpower, British industry has been crucial to maintaining our military's world-leading position. As we celebrate 100 years of the RAF protecting our skies, it is fitting that we create bold and ambitious plans to help our brave Armed Forces keep us safe in the face of intensifying threats. The Combat Air Strategy will bring together the best of British engineering, skill and design, and deliver a compelling vision for the future of air power.

Chief of the Air Staff, Air Chief Marshal Sir Stephen Hillier, said:

It is especially fitting that we launch the Combat Air Strategy as our Royal Air Force marks its 100th anniversary. Combat Air capabilities have been at the heart of the RAF's capabilities throughout its history, and are constantly employed on operations across the world today.

This strategy will ensure that the RAF can continue to remain at the forefront of the high-end airpower technology and innovation we need to deal with future threats, working in close collaboration with UK industry and our international partners.

The UK is already a world-leader in the air sector which accounts for 85% of the Britain's defence export orders. The industry is made up of close to 2,500 companies, generating more than £33.5bn in turnover and employing more than 128,000 people – some 26,000 of them in highly skilled research, design and engineering jobs.

Investment in combat air technology combined with the strengths of UK industry has resulted in the UK being the US' only Tier 1 partner on the F-35 Lightning II programme, with British industry building around 15% of every F-35 which is built. The UK has been able to exploit the operational capabilities of the aircraft, while reinforcing UK industrial capability, skills and wider economic prosperity.

The UK also continues to lead the way in combat air power as one of the four partner nations in the Eurofighter Typhoon programme. With more than 20,000 flying hours on global operations to date, the Typhoon has offered

unparalleled reliability and proven interoperability with our allies.

The F-35 Lightning II and the Typhoon are two complimentary multi-role combat aircraft that will make up the RAF's combat air fleet, placing the UK at the forefront of fighter jet technology – with the Typhoon expected to remain in UK service until at least 2040.

Just last week the UK led the bid to replace Belgium's fighter jets with 34 Typhoons with the offer to include a comprehensive defence and industrial partnership between the Governments of Belgium and the UK. The Defence Secretary Gavin Williamson was also in Qatar at the end of last year to oversee Qatar's multi-billion pound purchase of 24 Typhoon aircraft, supporting thousands of jobs across the UK.

The announcement of the strategy comes after an initial review of the defence aerospace sector by the MOD, which involved engaging across Government and with industry. The development of a Combat Air Strategy is consistent with the themes of the Modernising Defence Programme. It will set out in practical terms how the MOD can deliver its critical military capability requirements whilst considering wider economic and international factors, and our national security objectives.
