

CHP investigates six additional confirmed cases of COVID-19

The Centre for Health Protection (CHP) of the Department of Health (DH) announced that as of 0.00am, November 30, the CHP was investigating six additional confirmed cases of coronavirus disease 2019 (COVID-19), taking the number of cases to 12 437 in Hong Kong so far (comprising 12 436 confirmed cases and one probable case).

The newly reported cases are imported cases. Four of the cases involved mutant strains while the viral load of one case is insufficient for mutation tests and the mutation test result of the remaining case is pending. The patients comprise two males and four females, aged 1 to 48. All of them arrived in Hong Kong from Group A specified places (high-risk). Case 12437, 12438 and 12439 are close contacts of imported cases confirmed previously (case 12411, 12412 and 12413) and they tested positive at the Penny's Bay Quarantine Centre. For the remaining patients, one of them tested positive during the "test-and-hold" arrangement upon arrival at the Temporary Specimen Collection Centre at Hong Kong International Airport and the other two tested positive during quarantine.

A total of 43 cases have been reported in the past 14 days (November 16 to 29) and all of them are imported cases.

According to the testing and quarantine arrangements for local COVID-19 cases with mutant strains, the CHP reminded that persons who resided or worked within the same building as the residence of relevant cases will be subject to compulsory testing on specified dates in accordance with the announcement by the DH. They will also be required to undergo self-monitoring until the 21st day (see the details of the buildings and dates of testing at www.coronavirus.gov.hk/pdf/CTN_Specified_premises_and_Dates_of_Testing.pdf).

Specified persons in relation to the following specified premises are also reminded to undergo compulsory testing in accordance with the compulsory testing notice tomorrow (December 1):

- Way Man Court, 50-52 Village Road, Happy Valley

The CHP's epidemiological investigations and relevant contact tracing on the confirmed cases are ongoing. For case details and contact tracing information, please see the Annex or the "COVID-19 Thematic Website" (www.coronavirus.gov.hk).

â€‹The spokesman for the CHP stressed, "The global situation of COVID-19 infection remains severe and there is a continuous increase in the number of cases involving mutant strains that carry higher transmissibility, and there are also reports of breakthrough infections in some vaccinated individuals. The CHP strongly urges members of the public to avoid all non-essential

travel outside Hong Kong, in particular to specified places with high risk under the Prevention and Control of Disease (Regulation of Cross-boundary Conveyances and Travellers) Regulation (Cap. 599H)."
