

Collection: Environment Agency corporate scorecard

Updated: Environment Agency corporate scorecard quarter four, 2017 to 2018 has been added.

Our corporate scorecard shows a high level overview of our performance against our environmental and business aims.

The scorecard is reported every 3 months to executive directors, the board, Defra, and is made public on GOV.UK.

Targets are set for each of these measures. For each measure, we show how we're currently performing and whether or not we're on track to achieve our target performance by the end of the year. Each measure has a more detailed 'insight report' that tells the story of how we're performing as well as showing trends and future forecasts.
