

Community testing centres to resume services

A spokesman for the Food and Health Bureau announced today (October 13) that as the Tropical Cyclone Warning Signal no. 8 has been cancelled, all community testing centres (CTCs) will gradually resume services. However, all mobile specimen collection stations will remain closed.

For persons who were unable to undergo testing during the service suspension of CTCs, they may make bookings again or go to the CTCs for walk-in service. There are still plenty of testing quotas at CTCs tomorrow and in the coming two weeks.
