

Consultation outcome: Waste electrical and electronic equipment compliance fee 2016

Updated: Added a note on what happened after this consultation.

We want to know whether you think there should be a Waste Electrical and Electronic Equipment (WEEE) compliance fee set for 2016. We also want to know your thoughts on the two proposals we've received for how the fee should be managed in 2016.

The use of a compliance fee and how it is administered is agreed annually. Companies that don't meet their annual collection targets can comply with the 2013 WEEE Regulations by paying the compliance fee instead.
