

# Research and analysis: Hen harriers: tracking programme update

*Updated:* Satellite tracked data spreadsheet updated.

The hen harrier is one of England's rarest and most spectacular birds of prey.

Hen harriers currently breed on heather moorland in the uplands across the UK and in a range of upland and lowland habitats across Europe. For the latest data read the [tracking update](#) document attached to this page.

Natural England is working with a range of organisations to conserve the species and this work contributes to one of these actions. See the Defra [hen harrier action plan](#) for more information.
