

Downtown Beijing to increase underground parking lots

Dongcheng District and Xicheng District of downtown Beijing will build multi-floor car parking towers this year to help citizens park their cars more easily, as parking is often difficult in these densely populated areas.

Dongcheng District announced on Feb.15 that it would build 13 parking towers this year. The district is home to a huge number of cars but limited parking spaces, often resulting in difficulty parking. The parking lots will be built in Nanluoguxiang, Dongsì and other sub districts, with parking space both on the ground and underground. The district also decided to scrap parking locks in hutongs, or narrow alleyways.

The downtown area in Beijing also plans to create more space in its bypasses. The Xicheng District will smooth Shoubi Street, a narrow road which often impedes traffic as it links two main streets, and build an underground parking lot there which can provide 500 parking units.

Moreover, Dongcheng District is also drafting an agreement which enables residents to park their cars at night in the parking lots nearby office buildings, in order to make more use of the parking space. A total of 2,800 such parking units are expected to be open to the public this year.
