

[EMSD organises E&M I&T Day 2024 \(with photos\)](#)

E&M I&T Day 2024, with the theme of "Artificial Intelligence (AI) Application in Electrical and Mechanical (E&M) Industry", is being held today (July 9) and tomorrow (July 10) at the Hong Kong Science Park.

Organised by the Electrical and Mechanical Services Department (EMSD), with support from the Hong Kong Science and Technology Parks Corporation, the event provides the trade with a platform for interactive exchanges and experience sharing on AI applications.

At today's event, the EMSD announced the launch of the E&M InnoCatalogue on E&M InnoPortal (inno.emsd.gov.hk). The catalogue shares the EMSD's remarkable innovation and technology (I&T) trials with the industry and the public to promote wider application and commercialisation of innovative E&M technologies.

Speaking at the launching ceremony, the Deputy Director (Trading Services) of Electrical and Mechanical Services, Mr Richard Chan, said that as the Government's innovation facilitator, the EMSD fully supports the Government's policy in promoting I&T development and leverages innovative technologies to enhance services in support of the national initiative of promoting "new quality productive forces" and the "AI Plus" initiative.

E&M I&T Day 2024 brings together about 20 Hong Kong, Mainland and overseas exhibitors to showcase their I&T achievements and solutions in AI applications in the E&M industry. Representatives from government departments, public organisations, E&M and I&T sectors, and tertiary institutions are also sharing their experiences in AI applications in the E&M industry.
