

Engineering company fined after two workers suffer serious injuries

An engineering company has been fined after two workers were seriously injured after being thrown from the chuck of a large vertical boring machine.

Birmingham Magistrates' Court heard that on 5 September 2018, two employees of Sulzer Electro Mechanical Services (UK) Limited, were standing on the chuck of a large vertical boring machine at a site in Bordesley, Birmingham, to set it. The start button was inadvertently pressed and, despite the interlocked perimeter fencing access doors being open, the chuck started to rotate.

An investigation by the Health and Safety Executive (HSE) into the incident found that the interlocks on the perimeter fencing access doors were not working, and there were no safety checks in place to ensure that the interlocks were in working order.

Sulzer Electro Mechanical Services (UK) Limited of Camp Hill, Bordesley, Birmingham pleaded guilty to breaching Section 2(1) of the Health and Safety at Work Act 1974. The company has been fined £86,000 and ordered to pay costs of £2,111.48.

Speaking after the hearing, HSE inspector Christopher Maher said "We hope that as a result of this case, industry will better understand the importance of maintaining effective control measures.

"It is important that guarding arrangements, including interlocks, are checked regularly, to ensure that they are in good repair and efficient working order."

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported

by globally recognised scientific expertise. hse.gov.uk^[1]
