

Guidance: Maintain permanent grassland with very low inputs

Find out how land managers can benefit wildlife, and improve soil and water quality, by managing grassland without artificial fertiliser and pesticides.

Guidance: Harvest seeds or take green hay to restore other grassland sites

Find out how land managers can take green hay and harvest seeds to help create or restore species-rich grassland.

Guidance: Maintain species-rich grassland

Find out how land managers can provide habitat for plants and invertebrates by maintaining species-rich grassland.

Guidance: Make field-dried hay or haylage

Find out how land managers can use haymaking and aftermath grazing to maintain species-rich grassland.

Press release: Better welfare conditions for millions of farm animals during transit

New rules on maximum journey times and more headroom will raise welfare of farm animals during transport.
