

News story: Tyne and Wear man fined for waste offences

Jonathan Patrick Finn of Flaxtead Grange, Sunderland Road, Newbottle, was charged with illegally storing and treating mixed waste when he appeared before South Tyneside Magistrates' Court on 12 December 2017.

He admitted the charges brought by the Environment Agency and was handed a £200 fine with £1,530 costs.

The court heard how Finn leased a dead end area of land adjacent to the railway line on the north side of Sheepfolds Road, Sunderland, in January 2016.

The land had previously been fly tipped and Finn was offered six months' rent free and £3,000 in return for lawfully disposing of the waste. Instead, Finn added to it.

Between 4 and 8 January 2016, CCTV captured a red flat back lorry laden with waste approaching the site. Footage then shows the lorry, owned by Finn's father and being used by Finn at the time, leaving empty a short time later. On 4 January a fire was also photographed on the site.

When Environment Agency officers visited the site on 2 February 2016 they saw around five tonnes of waste, including construction waste, plastics and timber on the road outside. Inside they saw large amounts of mixed waste including household waste, sofas and plastics.

The court heard that Environment Agency officers visited the site twice more between 23 February and 24 March 2016, each time reporting an increase in waste.

Further photographic evidence taken during this time shows four loads of waste deposited on the back of a lorry registered in Finn's name.

In May 2016, the land owner was given four weeks to clear the waste after Environment Officers were informed that Finn had abandoned the site.

On a subsequent visit they discovered that the waste was being cleared to a site at the Pallion Industrial Estate in Sunderland owned by Finn's father, John Finn, who later confirmed that some of the waste had come from the Sheepfolds Road site.

Finn attended an interview on 17 October 2016 during which he admitted to burning waste and operating a waste recycling business without a permit.

Rachael Caldwell from the Environment Agency said:

Environmental laws are there to protect communities and the environment from pollution.

Anyone who operates outside of these laws is not only breaking them but is more likely to commit greater harm, which is why we will pursue them and, where repeated or significant breaches are found, we will prosecute.

A trial involving another defendant allegedly linked to the illegal storing and treatment of waste on the site is set to take place next year.

[Press release: New flood scheme in Rugeley officially opened](#)

Members of the Environment Agency, Cannock Chase District Council, the Stoke-on-Trent and Staffordshire Local Enterprise Partnership (LEP), Rugeley Town Council, Staffordshire County Council and the Trent Regional Flood & Coastal Committee visited Rugeley today (Monday 18 December) to mark the completion of the project.

The newly completed Rugeley flood scheme, which was delivered by the Environment Agency, will help to reduce the risk of flooding from the Rising Brook for 114 residential and 159 commercial properties. It also forms an integral part of Cannock Chase District Council's plans to regenerate parts of the town centre.

Work on the project, which started in December 2016, saw construction of a 350m long embankment, which is 4m high at its highest point, on Hagley playing fields. This embankment has created a flood storage area which will store water from the Rising Brook during times of heavy rainfall and then slowly release it back into the watercourse when levels no longer pose a flood risk.

Mark Swain from the Environment Agency said:

This scheme is fantastic news for the people of Rugeley as it will help reduce the risk of flooding to a significant number of residential properties and businesses. Not only that but it is an important step in unlocking Rugeley's potential for future investment, regeneration and growth, something which would be challenging if the town remained at risk of serious flooding.

Stoke-on-Trent and Staffordshire LEP chairman David Frost CBE said:

This impressive project is very good news for Rugeley, protecting town centre homes and businesses from flooding and making the town

a better place to live, work and visit.

This scheme means businesses will have a secure foundation when they make plans to expand, without the risk of their hard work literally being washed away. It is also creating an attractive green space for local people to enjoy.

Cllr John Kraujalis Corporate Improvement Portfolio Leader for Cannock Chase Council said:

This scheme is an excellent example of true partnership working in action. The improvements will provide protection and peace of mind to residents and commercial businesses alike that were at risk from flooding from the Rising Brook. The Environment Agency has also successfully procured and delivered a replacement footbridge on behalf of the Council which became unstable a number of years ago and was in desperate need of repair.

Gordon Alcott Economic Development & Planning Portfolio Leader for Cannock Chase Council said:

The works that have been carried out will unlock new development opportunities in Rugeley that have previously been constrained by the flood risk. The Council have already received a planning application for industrial units which could create approximately 60 jobs in the area that would have been affected by flooding prior to this work being carried out.

The scheme has been developed in partnership with Cannock Chase District Council and Staffordshire County Council, and funded by Government Flood Defence Grant in Aid, Stoke-on-Trent and Staffordshire LEP and the Trent Flood and Coastal Committee.

[Press release: Directors of illegal waste operation ordered to pay £13,500](#)

On Friday 15 December 2017, Grimsby Magistrates sentenced Ali Al-Ahmad of Rodmarton Street, London, to a fine of £3,500 and Hassan Abdulrazak of Foxhills Road, Scunthorpe, to a fine of £3,500. In addition, both defendants were ordered to pay a contribution towards the prosecution costs of £2,500.

Al-Ahmad was also given an additional fine of £1,500 after he admitted the illegal deposit of construction and demolition waste that was partly contaminated with asbestos on the site.

The magistrates also imposed an order on both defendants requiring them to clear the site of waste within 3 months.

The court was told that the defendants operated a site on Wybeck Road, Scunthorpe, which did not have the necessary permit between 19 May 2014 and 12 October 2016.

The pair told officers from the Environment Agency that they were buying cars from local auctions and exporting them to the Middle East. However, site inspections revealed that they had started to dismantle vehicles, a practice which required an environmental permit.

Investigators saw that vehicle cutting operations were taking place and that vehicle parts, engines, electrical wiring and batteries were being stored on the site. The pair were told that the operations should stop, but further inspections showed that the advice had been ignored and that no application for a permit had been made.

In addition to this joint charge, Al-Ahmad admitted that construction and demolition waste contaminated with asbestos had been deposited on the site.

Inspectors discovered industrial bulk containers containing oily fluid, broken asbestos sheeting stored in a pile and remnants of a fire containing asbestos. Al-Ahmad was present at an inspection which detected chrysotile asbestos fibres in 19 samples taken from 3 separate locations on and outside the site boundary.

The court noted that neither defendant had any previous convictions and had pleaded guilty at the first opportunity.

Commenting after the hearing, an officer involved in the case said:

The defendants deliberately attempted to mislead us as the regulator. Through such illegal operations they unfairly undercut legitimate waste businesses, making it difficult for compliant firms to compete. This causes erosion of the legal waste sector and standards, resulting in an industry which is vulnerable to domination by illegal operators who have no concern for protecting the public or the environment.

We hope this case assures the legitimate waste industry and the public that we will investigate businesses who deliberately or recklessly flout the law, and that the sentences passed send a clear message that behaviour is unacceptable. □

We have brought this case to a successful outcome by dedicated hard work and professionalism.

The Environment Agency urges any landowners, farmers or members of the public who believe an illegal site is in operation to call them immediately on their 24-hour free incident hotline number 0800 80 70 60 or make an anonymous report to Crimestoppers on 0800 555 111.

Charges in the case

- Between 19 May 2014 and 12 October 2016 Ali Al Ahmad did operate a regulated facility namely a waste operation concerning the deposit, storage, depollution and disposal of waste vehicles and on land at Wybeck Road, Scunthorpe, North Lincolnshire when there was not in force an environmental permit authorising such activity contrary to Regulation 38 (1) (a) of the Environmental Permitting (England and Wales Regulations) 2010.
- Between 19 May 2014 and 12 October 2016 Hassan Abdulrazak did operate a regulated facility namely a waste operation concerning the deposit, storage, depollution and disposal of waste vehicles and on land at Wybeck Road, Scunthorpe, North Lincolnshire when there was not in force an environmental permit authorising such activity contrary to Regulation 38 (1) (a) of the Environmental Permitting (England and Wales Regulations) 2010.
- On or before 9 February 2016 Ali Al Ahmad did knowingly cause or knowingly permit the deposit of controlled waste namely construction and demolition waste contaminated with chrysotile asbestos on land adjacent at Wybeck Road, Scunthorpe, North Lincolnshire when there was not in force and environmental permit authorising such deposit contrary to Section 33(1)(a) Environmental Protection Act 1990 as amended.

[Press release: New floating moorings on River Great Ouse to last 50-plus years](#)

The floating moorings replace ones on the relief channels at Stowbridge, Wiggshall St Mary and the Denver Complex, all in Norfolk.

Expected to last at least 50 years, the new platforms feature non-slip mesh decking and galvanised steel frames.

Andy Bennison, Anglian Waterways engineer, who has managed the project said:

The existing landing stages have been taken away to be refurbished and re-used elsewhere on the River Great Ouse. The new frames and decking will improve safety, as well as look better and reduce maintenance costs.

It's all part of our ongoing efforts to protect and improve our cherished waterways.

The work to replace the landing stages is part of the Environment Agency's [£1.4m Capital Investment Programme](#). Announced in November, the programme sets out the investments being made into [Anglian Waterways'](#) 353-mile network.

Projects in the pipeline include improvements to eight locks, and take place from November to March – avoiding the peak boating season to minimise disruption for those on the river.

The Environment Agency cares for more than 353 miles of navigable waterways in the Anglian region, as well as a vast network of associated facilities such as bridges, locks, moorings and toilets.

[Press release: Joint Nature Conservation Committee appointed three new independent members](#)

The Government has appointed Professor Melanie Austen, Charles Banner and Professor Marian Scott as Independent Members of the Joint Nature Conservation Committee. The appointments took effect from 15 December 2017 for three years.

All appointments to the JNCC are made on merit and political activity plays no part in the selection process. The appointment complies with the Governance Code on Public Appointments. There is a requirement for appointees' political activity (if significant) to be declared. The appointees have not declared any significant political activity during the past five years.

The JNCC was established in the Natural Environment and Rural Communities Act (2006) as a non-departmental public body. The JNCC advises the UK Government and Devolved Administrations of Northern Ireland, Scotland and Wales on UK-wide and international nature conservation.

Remuneration is £9,836 per annum based on a time commitment of 2½ days per month.

Professor Melanie Austen

Melanie is a marine ecologist and interdisciplinary marine researcher who is Head of Science for the 'Sea and Society' science area at Plymouth Marine Laboratory. She has recently completed a 3 year term as the Chief Scientific Advisor to the UK's Marine Management Organisation. For the last fifteen years she has been developing and leading UK and EU funded collaborative marine research. Through her interdisciplinary research she has examined and quantified the societal consequences and policy relevance of changes to the marine environment and its ecosystems. She has been an Honorary Professor at the University of Exeter medical school since 2014. Melanie is currently a member of UK JNCC's South Atlantic Natural Capital Assessment Technical Advisory Group. She has previously been a member of other Expert Advisory Groups and has chaired an EU Marine Board ecosystem valuation working group.

Charles Banner

Charles is a barrister at Landmark Chambers. He was called to the Bar in England and Wales in 2004, then to Northern Ireland in 2010. He practices across both jurisdictions and internationally specialising in environment and planning law and government and regulation. In 2015 Charles became Co-founder of Landmark International establishing a bespoke platform for barristers offering their services to the international legal market. In 2016 Charles became a trustee and council member of the UK Environmental Law Association which aims to make the law work for a better environment and to improve the understanding and awareness of environmental law. He has recently been announced as 'Environment & Planning Junior of the Year' at the Chambers Bar Awards 2017.

Professor Marian Scott

Marian is Professor of Environmental Statistics in the School of Mathematics and Statistics at the University of Glasgow; an elected member of the International Statistical Institute (ISI) and a Fellow of the Royal Society of Edinburgh (RSE) and a chartered statistician of the Royal Statistical Society (RSS). Marian's research interests include model uncertainty and sensitivity analysis; modelling the dispersal of pollutants in the environment, radiocarbon dating and assessment of animal welfare. She was awarded an OBE in 2009 for services to social science.
