These notices explain:

- what the application is about
 - which Environment Agency offices you can visit to see the application documents on the public register
 - when you need to comment by
-

Official Statistics: Butterflies of the wider countryside, UK trends to 2016

Updated: Publication date amended. This publication is being delayed for statistical reasons.

Statistics comprise UK population trends of two groups of butterfly, those strongly associated with semi-natural habitats (habitat specialists), and those found in the wider countryside. Trends are based on results of the UK Butterfly Monitoring Scheme (UKBMS), and feed into the UK Biodiversity Indicators.

The UKBMS is run by Butterfly Conservation, the Centre for Ecology & Hydrology, and the British Trust for Ornithology, in partnership with a consortium of government agencies. The UKBMS is indebted to all volunteers who contribute data to the scheme.
