

Press release: Waste firm AWM fined £125,000 for causing odour pollution

Waste firm Associated Waste Management Ltd has been fined £125,000 for causing odour pollution at its sites in Leeds and Bradford.

The company was sentenced at Leeds Crown Court on 6 March 2017 after previously admitting two environmental offences relating to its waste transfer facilities in Gelderd Road, Leeds and Canal Road, Bradford.

The Environment Agency prosecuted the company following repeated odour problems that had a detrimental effect on local residents.

Austin Stoton, prosecuting for the Environment Agency, told the court that AWM's Leeds site caused repeated odour problems between June 2012 and October 2013. During this time, Environment Agency officers carried out around 75 odour assessments, and most of them recorded smells that were likely to cause offence to human senses.

In October 2013 the Environment Agency suspended the company's permit for the Leeds facility, preventing it from bringing any more waste onto the site until it had made improvements to its odour management plan. This new plan was approved that month and the permit was reinstated.

In the same year, between March and July, AWM's Bradford site was also the cause of odour issues. These prompted local residents to complain on 49 separate dates.

One resident had complained that the odour was so bad that it had made him feel sick. He also said that if there was a smell present, he couldn't open windows and his family couldn't spend time in the garden. Another resident said at the time that he and his family had found it virtually impossible to have any enjoyment from their garden.

An inspection visit in March 2013 revealed that the company was not closing the shutters on a tipping shed used by bin wagons, which allowed the smell of rotting waste to leave the site.

In July, the Environment Agency served an enforcement notice on the firm that required it to improve its odour management plan for the site. The company's first revision of this document, submitted in August, was rejected as inadequate and it wasn't until October that a new plan was approved.

A spokesperson for the Environment Agency said after the hearing:

Waste sites like those managed by AWM can have a detrimental impact on local communities if they are not managed properly. That's why it is vital that operators adhere to environmental regulations and the conditions on their environmental permits.

In this case, AWM failed to maintain high standards of odour management at its facilities in Leeds and Bradford, and local residents suffered as a result. We hope today's outcome demonstrates that odour pollution is not acceptable and that the Environment Agency will take action against businesses that fail to adhere to permitting rules.

In mitigation, the company told the court that it had relied upon an external company that had approached it regarding odour suppression equipment, which had not worked.

AWM was fined £75,000 for the Leeds offence, and £50,000 for the Bradford offence. It was also ordered to pay £75,000 in legal costs.

Press release: Work begins on £3.8million flood scheme in Totnes

The scheme involves improving existing flood defences along the River Dart from the mainline railway bridge to the Steam Packet Inn. Other measures include providing a new flood wall within Morrisons car park, raising Ashford slipway and providing flood resilience measures to individual properties and flood gates.

Work began on a section of the scheme which didn't need planning permission in January but now South Hams District Council has given the rest of the scheme the green light.

Dan Boswell, for the Environment Agency, said:

This is a fantastic milestone for us and the residents we have been working with to help us shape our designs.

Since the construction of the original defences flood risk has changed and in recent years there have been at least 2 occasions – 2008 and 2014 – where some properties in the town have come close to flooding from the River Dart.

We always ask people to stay flood aware. People can [check their flood risk online](#), by calling Floodline on 0345 988 1188 or by following @EnvAgency and #floodaware on Twitter for the latest flood updates.

Once work is completed on Broadmarsh Industrial Estate, work will move to the areas of New Walk, Throgmorton and the Morrisons car park.

March 2008

Designs for the scheme were drawn up following discussions with landowners and property owners and a public drop-in session in the town in April 2016 and follow-up discussions have been taking place since that time. The scheme is due to be completed by next winter.

Notes to editors

The project to improve flood defences in Totnes is separate from the planned work at Steamer Quay to repair the existing flood wall. It is hoped that this work will be completed in April 2017.

[Press release: Step up to the challenge as the South West flood committee's new chair](#)

The successful candidate will play a pivotal role in flood and coastal risk management across Devon and Cornwall, heading up a committee that works closely with other public bodies and interest groups.

In addition to leadership skills, the chair must be able to provide strategic direction, stimulate discussion and be an effective networker and influencer. He or she will also be required to work with other flood committee chairs and develop a good understanding of government priorities for flood management.

Ben Johnstone, Area Flood and Coastal Risk Manager for the Environment Agency, said:

This is a great role, working to reduce the risk of flooding and coastal erosion in one of the most beautiful parts of our country. The challenges are varied and will become more significant as our climate changes. We have a huge exposed coastline, rapid responding catchments, river and surface water flooding, not just in urban areas, but spread all across hundreds of rural communities.

How we think about managing risks is changing. We need to design to work with and co-exist with nature. As the committee chair you will be instrumental in making this happen.

The South West Regional Flood and Coastal Committee is one of 12 committees across the country that make key decisions on local priorities for flood and coastal risk management.

The committee is made up of members appointed by Lead Local Flood Authorities (LLFAs) and independent members with relevant experience and sets out to achieve the following goals:

- ensuring suitable plans are in place for identifying, communicating and managing flood and coastal erosion risks across catchments and shorelines
- encouraging the appropriate level of investment in flood and coastal risk management that provides value for money and benefits local communities.
- providing a link between the Environment Agency, LLFAs, other risk management authorities and relevant bodies to increase understanding of flood and coastal erosion risks in its area

People from a wide range of backgrounds are invited to apply for this post, especially those from black and minority ethnic backgrounds and women who are currently under-represented on regional flood and coastal committees.

Further information is available from the [Cabinet Office](#). The closing date for applications is 20 March 2017.

Press release: Flood relief for villages in Worcestershire

Construction will start this summer on a £4 million flood storage area which will reduce the risk of flooding to nearly 300 homes and businesses in Broadway, Childswickham and Murcot.

The Environment Agency, Worcestershire County Council, Wychavon District Council, Broadway Parish Council and Childswickham Parish Council have been working in partnership and have now secured over £2 million Government Grant in Aid funding, enabling the scheme construction to begin. The Environment Agency's English Severn and Wye Regional Flood and Coastal Committee have also contributed over £1 million. To enable access to the Government Grant in Aid funding under Defra's Flood Partnership Funding Model, Worcestershire County Council and Wychavon District Council are contributing £555,000 and the local parishes have raised £312,000.

Broadway, Childswickham and Murcot were severely flooded in 2007 following record breaking rainfall across the area. The new flood storage area in Broadway will be able to hold up to 135,000 cubic metres of water during times of flood and will only allow a set amount of water to flow downstream at times of intense and high rainfall. This will reduce flood risk along the Badsey Brook downstream of Broadway.

The English Severn and Wye Regional Flood and Coastal Committee (RFCC) continues to support the scheme and provided funding which allowed the Environment Agency to purchase the 18 acre field where the majority of the flood storage area is to be located.

As a condition of the planning application detailed archaeological investigations, part funded by Worcestershire County Council, are being carried out. This involves excavation work and will reduce the risk of delays during construction. These ground works are almost complete.

Specialist contractors are currently on site carrying out tree clearance in preparation for the main flood scheme works.

Daniel Wilkinson, from the Environment Agency, said:

Flooding has a devastating impact on people's lives and livelihoods, so it's great that by working together with our partners we have managed to find a solution which means we are now one step closer to reducing the risk of flooding for residents living in Broadway, Childswickham and Murcot.

Cllr Anthony Blagg, Worcestershire County Council's cabinet member for environment, said:

Now that the archaeological work is nearing completion, this project can move on to the next stage and closer to protecting homes and businesses with this innovative flood alleviation scheme.

Cllr Emma Stokes, portfolio holder for environment and street scene on Wychavon District Council, said:

It's almost 10 years since the floods of 2007 but none of us will forget the devastating impact they had. This scheme will help reduce the risk of future flooding and provide greater protection to communities in Broadway, Childswickham and Murcot.

Kevin Beasley, from Broadway Parish Council, said:

We are very pleased that the flood alleviation scheme is progressing well and that the residents of both Broadway, Childwickham and Murcot will be more reassured that the properties are safer from flooding and the devastation that they have previously experienced, once the work is completed.

County Cllr for Broadway in Worcestershire, Liz Eyre BEM, said:

This project represents an enormous amount of hard work behind the scenes. I am simply delighted that sticking by the project, working with talented county and district officers at all levels and the Environment Agency has led to this, a real outcome for my residents.

[Press release: Environment Agency unveils new paintings to promote fishing](#)

The Environment Agency has unveiled three paintings by top wildlife artist David Miller to promote angling. The images front the 2017/18 fishing licences which go on sale today (1 March). The three fishing licence designs depict salmon (*Salmo salar*), mirror carp (*Cyprinus carpio*) and brown trout (*Salmo trutta*) in their natural habitats.

You can see the images, and download posters here:

<https://www.gov.uk/government/publications/rod-fishing-licence-campaign>

The Environment Agency has also launched "Get a Fishing Licence" on GOV.UK to simplify the process of buying a fishing licence:

www.gov.uk/get-a-fishing-licence. This is part of a series of improvements to the service, which include:

- Free licences for junior anglers, up to the age of 17, announced in November 2016
- The fishing licence now lasts for 12 months from the day it is bought, rather than expiring at the end of March each year
- The use of three rods now needs just one licence, rather than two.

People are required to buy a fishing licence in order to fish legally in England, Wales and along the Border Esk in Scotland. Sales of licences for the 2015/16 season raised [£21 million](#). The money was used to restock rivers with 452,220 coarse fish, encourage over 35,000 people to try angling for the first time and bring 2,043 successful prosecutions against crimes like poaching.

Artist David Miller said:

I'm delighted to have provided the images for the fishing licences again this year, not only because it gave me the opportunity to paint three species for the first time but also because all the money raised goes back into supporting fisheries. Of the three I was particularly pleased with the brown trout, my favourite UK game fish, and one I love to fish for on small rivers and streams.

Judy Proctor, Head of Fisheries at the Environment Agency, said:

We hope David's stunning images encourage people to give fishing a go. Angling creates over 37,000 full time jobs and generates over £1 billion for the UK economy, but at its heart it's a much loved outdoor sport connecting people with nature. We've listened to anglers' concerns and improved the fishing licence to make the process of getting out and fishing legally simpler.

People who don't buy a fishing licence are not only cheating other anglers and the future of the sport but running the risk of criminal conviction and a fine. The Environment Agency urges anyone to report fisheries crime as quickly as possible by calling our incident hotline on 0800 80 70 60.

For those who can't access the internet, fishing licences can still be bought by phoning 0344 800 5386 or over the counter in the Post Office.

ENDS

Notes:

The Environment Agency publishes a detailed breakdown of how fishing licence money is spent in the annual fisheries report on GOV.UK. Read it here:
