

Open consultation: Biowaste permits: review to improve environmental outcomes

The Environment Agency wants to work with the biowaste treatment sector to contribute to the government's:

- [25 Year Environment Plan](#)
- Clean Growth Strategy
- Clean Air Strategy

We want to make sure that any amendments made to the permitting of biowaste facilities:

- benefits society
- reduces environmental risk
- are affordable

We're asking for evidence to gather views about the permitting framework and some areas of the available guidance.

We'll use your responses to help inform changes to our permit conditions and standard rules requirements.

Notice: Parkers Farms NPS/WR/028633: application made to abstract water

The Environment Agency consult the public on certain applications for the abstraction and impoundment of water.

These notices explain:

- what the application is about
 - which Environment Agency offices you can visit to see the application documents on the public register
 - when you need to comment by
-

News story: LLWR awards multi-million pound contract to Orano TN

LLW Repository Ltd has signed a multi-million pound contract with Orano TN for the supply of packaging, professional services and equipment to facilitate the safe and cost effective transport of waste from UK nuclear sites to Sellafield for storage.

The scope of the contract includes the modernisation and maintenance of three TN Gemini packages, owned by the Nuclear Decommissioning Authority (NDA), and the supply of logistical equipment recently approved by the French Nuclear Safety Authority.

David Rossiter, LLWR's Head of Waste Management Services, who attended the contract launch event in Paris on behalf of the organisation, said:

Orano TN has deployed these market-leading containers in France for over two decades, and this contract marks a milestone in establishing a long term relationship with the UK.

It will facilitate the transport in TN Gemini packages of legacy waste stored on Magnox sites, and that is great news for the NDA estate.

The contract covers the requirements of multiple UK nuclear Site Licence Companies for up to six years.

LLWR Programme Manager Alan Jackson said:

LLWR's engagement with Orano TN for these supply and professional services contracts embodies a key part of our mission.

Not only does it represent LLWR's international outlook for the safest solutions to the UK's waste transport programme, but it also shows our commitment to gaining the best value for money for the UK taxpayer.

David Ohayon, Senior Vice President Waste of Orano TN, the logistics subsidiary of the global nuclear fuel cycle company, Orano, said:

Our ability to offer innovative and competitive products and services has been formally recognised by our partners LLWR and Magnox.

Orano TN is proud to contribute to this vital programme for the sustainability of nuclear energy in the UK.
