

Press release: Flood sirens in Grimsby and Cleethorpes to be tested on 24 August

The Environment Agency (EA) is conducting its annual test of its flood sirens in Grimsby and Cleethorpes on Friday, 24 August.

Installed after the summer floods of 2007, 17 of the 18 sirens help the EA warn over 25,000 households and local businesses of imminent tidal flooding while one also warns of flood risk from the river.

Testing will take place on Friday, 24 August between 10am and 12pm. If you hear the sirens during this time, you do not need to take any action. If flooding is expected on the day, the test will be rescheduled and flood warnings will be issued through the Environment Agency's free Flood Warning Service (FWS).

Environment Agency staff will be at Freshney Place shopping centre in Grimsby together with representatives from North East Lincolnshire Council between 9am and 5pm on the day of the tests. They'll be on hand to answer questions about the sirens and provide information about how to manage your flood risk, including what steps you can take to prepare for an emergency.

The sirens in Grimsby and Cleethorpes were installed over a decade ago, and since then the Environment Agency has made great strides in how it can warn people when flooding may be possible. The EA now offers a free Flood Warning Service, which provides targeted flood warnings via phone call, text or email. The EA encourages all residents in Grimsby and Cleethorpes to check their flood risk and sign up for flood warnings if they've not done so yet, by visiting www.gov.uk/sign-up-for-flood-warnings or by calling 0345 988 1188.

Although the Flood Warning Service is now the EA's primary warning tool, the flood sirens in Grimsby and Cleethorpes add value as they can help provide people with crucial time to prepare for flooding. The siren on the Willows Estate in Grimsby is used to warn residents about flooding from the New Cut Drain and the River Freshney, while the others warn of flooding from the Humber.

Greg Smith, Flood Resilience team leader with the Environment Agency, said:

The flood sirens we own and operate in Grimsby and Cleethorpes help us warn over 25,000 households and local businesses. It's important that we conduct these annual tests to make sure the sirens still work as they should.

Although our flood defences reduce the risk of flooding to thousands of homes and businesses in Grimsby and Cleethorpes, we

can never remove the risk of flooding entirely. This is why it is crucial that we can warn people when there is a risk of flooding, by using tools such as the sirens or our free Flood Warning Service.

It is important that everyone plays their part to protect themselves from the risk of flooding. Find out what you can do to protect yourself and your family by coming to talk to us at Freshney Place on 24 August.

Cllr Matt Patrick, portfolio holder for the environment with North East Lincolnshire Council said:

On the flood siren testing day, North East Lincolnshire Council staff and its partner Engie will be joining the Environment Agency in Freshney Place Shopping Centre between 9am and 5pm.

Officers will be available to answer any questions on flood risk and how you can prepare.

[News story: New fees for permission to enter or disturb mining interests](#)

The changes to fees will take effect from 1 October 2018 and all fees will be inclusive of VAT.

Fees are determined by:

- the area of application
- the number of boreholes
- the number of mine entries to be investigated or treated

The minimum fee for any application will be £111.00.

Area of application

For the area of application, the cost will be £111.00 per 0.1 hectare, up to a maximum of £2775.00 for 2.5 hectares or above.

Any number of shafts or adits within this area are included within the area fee.

Number of boreholes

Where boreholes are planned for initial investigation purposes only, these will be charged at £55.50 per borehole.

Should treatment then prove necessary, then a further application would be required to cover the whole treatment area at £111.00 per 0.1 hectare, but the initial application fee will be deducted from this.

Mine entries to be investigated or treated

Shaft and adit investigation or treatment will be charged at £111.00 each, when not included within the above applications.

Further information about fees

For further information regarding fees in connection with applications for permission to enter or disturb coal mining interests, please contact:
