

Notice: EX20 3HT, Dawn Meats (UK): environmental permit application advertisement

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- how you can view the application documents
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)

News story: Nuclear decommissioning chief addresses oil and gas delegates

Mr Peattie was guest of honour at one of the oil and gas industry's most highly anticipated events at the Fairmont Hotel, in St Andrews, where he spoke to a 500-strong gathering about the challenges faced in the nuclear decommissioning and oil and gas sectors.

The Offshore Decommissioning Conference, which ran from November 27 to 29, saw some of the industry's leading figures listen to Mr Peattie's keynote speech on the similarities between the 2 sectors.

He addressed delegates on the parallels of decommissioning in nuclear and oil and gas, and spoke of collaboration, skills, standardising solutions and achieving the mission.

Mr Peattie, who took over as CEO at the Nuclear Decommissioning Authority in March, has extensive experience of the oil and gas industry with a 35-year career spanning the sector.

He started out as a young engineering graduate at BP in 1979.

The event, hosted by industry bodies Decom North Sea and Oil & Gas UK,

highlighted the continued importance of cross-sector learning via the nuclear and marine salvage sectors.

Mr Peattie shared his knowledge on the opportunities that arise from the synergies between the 2 industries.

He said:

As CEO of the NDA, I'm thrilled now to be able to have the opportunity to transfer learning and experience from my oil and gas years to nuclear. And maybe even facilitate some flowing back the other way too.

Being keynote speaker at such a prestigious event is an honour. Energy has been in my blood from a very young age and is still a passion of mine.

[Corporate report: Environment Agency 2016 data on regulated businesses in England](#)

Updated: Corrected data on the waste crime data spreadsheet. The tonnage of waste prevented and stopped at a loading site in 2016 to 2017 was 15,113 tonnes.

These datasets support the [2016 Regulating for the environment, people and growth report](#).

Opra (operational risk appraisal)

The [Opra datasets](#) on data.gov.uk contain the Opra compliance ratings and the full Opra profiles. Installations and waste operations were scored to show how compliant these regulated sites were in 2016. The [Opra risk assessment](#) provides a rating that the Environment Agency uses to assess the risk to the environment for sites we regulate. A and B indicates good performance whilst bands D, E and F indicate poor performance.

Pollution inventory

The [pollution inventory dataset](#) on data.gov.uk contains information from the [pollution inventory](#) for each release type (to air, land and waste transfers off-site). The data is grouped by sector for the industrial activities the

Environment Agency regulated in 2016.

Pollution incidents

The [pollution incidents dataset](#) provides information about incidents that met the Environment Agency category 1 and 2 impact criteria for those reported in 2016. These are the most serious environmental incidents we deal with.

Compliance assessment

The [national compliance assessment](#) and [compliance classification scheme](#) datasets on data.gov.uk contain details of compliance assessments and breaches of permits recorded by the Environment Agency in 2016.

Enforcement action

The [prosecutions dataset](#) on data.gov.uk contains details of all prosecutions carried out in 2016 against companies by the Environment Agency. It covers all regimes we regulate. The dataset covers January 2000 to June 2017. Find out more about our [position on enforcement and sanctions](#).

Waste crime

The [waste crime summary dataset](#) contains details of the numbers, types and activities associated with illegal waste sites, large-scale illegal dumping and illegal waste exports. The data covers each financial year from 2009 (where available) to the end of March 2017.

The [waste investigations dataset](#) on data.gov.uk contains information about the Environment Agency's waste crime investigation work and outcomes. The dataset covers January 1997 to September 2017.

The [proceeds of crime dataset](#) on data.gov.uk contains details of all post-conviction confiscation orders. These are where we've recovered unlawful profits from illegal operators. The dataset covers January 2007 to July 2017.

The [illegal dumping incidents dataset](#) on data.gov.uk contains all incidents of illegal dumping (fly-tipping) reported to the Environment Agency. Illegal dumping means the illegal deposit of liquid or solid waste on land, not covered by a permit or exemption. The dataset covers January 2011 to March 2017.

Remaining landfill capacity

The [remaining landfill capacity](#) dataset on data.gov.uk provides data for the calendar year 2016. It details the reported remaining landfill capacity by operators at permitted landfill sites.

Data

We've made the data on this page available to members of the public for information. We've published each dataset under either the [open government licence](#) or the [Environment Agency conditional licence](#). Each dataset states the licence it's published under. If you use the information you must meet the conditions of the relevant licence.

Corporate report: Regulating for people, the environment and growth

Updated: Added the 2017 report.

Annual reports on the Environment Agency's regulation work. The reports provide information and statistics about the:

- emissions to air from the businesses we regulate
- number of serious pollution incidents and sectors responsible
- compliance of businesses with their environmental permits
- reduction in costs for businesses we regulate
- enforcement action we take when businesses do not comply

The Environment Agency applies the regulatory framework set by government. We work with businesses to make sure they operate in a way that avoids harming people or the environment, without imposing unnecessary administrative burdens on them.

Corporate report: Environmental

performance: sector strategies

Updated: Minor changes to the oil and gas sector strategy 2016 to 2020.

These 14 sector strategy reports give an overview of each sector's performance and annual emissions. They also list the Environment Agency's top environmental objectives for each sector to 2020.

See the [2016 datasets that support these strategies](#).
