# News story: Joint Nature Conservation Committee Members reappointed

The Government has reappointed Professor Ian Bateman and Professor Colin Galbraith as Independent Members of the Joint Nature Conservation Committee (JNCC) for second terms. The reappointments will take effect from 1 November 2017 for four years.

All appointments to the JNCC are made on merit and political activity plays no part in the selection process. The appointment complies with the Governance Code on Public Appointments. There is a requirement for appointees' political activity (if significant) to be declared. Professor Bateman and Professor Galbraith have not declared any significant political activity during the past five years.

The JNCC was established in the Natural Environment and Rural Communities Act (2006) as a non-departmental public body. The JNCC advises the UK Government and Devolved Administrations of Northern Ireland, Scotland and Wales on UK-wide and international nature conservation.

Remuneration is £9,836 per annum based on a time commitment of  $2\frac{1}{2}$  days per month.

### Professor Ian Bateman OBE

Professor Ian Bateman is a Professor of Environmental Economics and Director of the Land, Environment, Economics and Policy (LEEP) Institute at the University of Exeter. He is a member of the Natural Capital Committee, Member of the Environment Agency Long-Term Investment Scenarios Development Group (LTIS-DG), Member of the Scientific Advisory Board of the French National Institute for Agricultural Research (INRA), Member of British Standard Institute (BSI) Committee for establishing ISO standards for Evaluating Natural Capital and Determining environmental costs and benefits and Monetary valuation of environmental aspects and impacts, Member of the South West Water Legislative, Resilience and Environmental Investment Board, Chief Editor of the journal Environmental and Resource Economics and former member of the Defra Science Advisory Council. He is also Adjunct Professor of Agricultural and Resource Economics, University of Western Australia, Perth and Adjunct Professor in the Department of Economics in both the University of Waikato Management School, New Zealand and at Lincoln University, New Zealand. He was Head of Economics for the UK National Ecosystem Assessment from 2009-2011.

### Professor Colin Galbraith

Professor Colin Galbraith is Director of his environmental consultancy, dealing with a range of environmental issues in Scotland and at the global level. Colin was until early 2010 the Director of Policy and Advice in Scottish Natural Heritage. In this capacity he was the principal adviser on

policy, scientific and technical matters for the organisation for over twelve years. Colin has been involved with the United Nations for a number of years and has made contributions through the Convention on Migratory Species and to the Millennium Ecosystem Assessment in particular. This work area involves Colin in high profile nature conservation issues including the conservation of the African Elephant, developing new international agreements to assist the conservation of Albatross, and in reviewing the impact of climate change on the ecology of threatened species. Colin has been the Chairman and the Vice Chairman of the Scientific Council of the Convention on Migratory Species (CMS) and is presently the Appointed Councillor on Climate Change issues for the Convention. He has been an Honorary Professor in Conservation Science at the University of Stirling since 2002.
