

# Press release: Sunderland firm fined for waste offences

A Sunderland-based firm has been ordered to pay over £14,700 for breaking environmental laws, which contributed to the illegal dumping of 585 tonnes of waste.

Thompson Waste Ltd runs a waste transfer station at The Parade in Hendon. The company was handed the fine by Sunderland Magistrates' Court on 25 September 2017 after pleading guilty to charges brought by the Environment Agency for failing to comply with duty of care legislation. The legislation requires businesses to ensure their waste is transferred and disposed of legally.

Chris Bunting, prosecuting for the Environment Agency, told the court that a proportion of 585 tonnes of mixed waste, which was dumped illegally in a disused factory warehouse at Lisburn Terrace, Pallion, could be traced back to Thompson Waste Ltd. It cost the landlords of the site over £100,000 to dispose of lawfully.

Investigations showed that between September 2015 and January 2016, the company paid a local man below market rates to remove waste from their site without fulfilling their legal requirement to check it was being taken to a permitted destination. The paperwork completed failed to include required details such as the origin of the waste or an accurate description.

The Court ruled that the company had acted recklessly. In mitigation, Robin Patton, acting on behalf of the defendant, told the Court that the waste represented a tiny fraction of the company's business and that they had co-operated with the investigation.

Thompson Waste Ltd was fined £3,335 and ordered to pay compensation of £5,394 and costs of £6,000.

Rachael Caldwell, from the Environment Agency's Waste and Enforcement Department, said:

All producers and operators have a responsibility to ensure that their waste is disposed of lawfully. Those that don't are as liable for the detrimental impact it has on the environment and local communities as those that dump it.

Thompson Waste Ltd broke the law over several months, showing little regard for the environment. We hope this case demonstrates the importance of environmental compliance. Anyone who breaks the rules will be pursued, and where repeated or significant breaches are found, we will prosecute.

A trial involving other defendants allegedly linked to the illegal waste

dumping in Pallion is set to take place next year.

If you see waste crime taking place report it by calling our incident hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.

## **Press release: Waste criminals dump £750,000 clean-up bill on landowners**

Criminals who illegally dump thousands of tonnes of baled waste have cost land and property owners in the North East an estimated £750,000 in the last year, according to the Environment Agency.

The figure, which relates to the cost of removing waste dumped in fields and empty commercial properties lawfully, could be even higher if land is contaminated or insurance premiums rise as a result. Dumped waste is also a major fire risk.

In a bid to stop waste criminals in their tracks, the Environment Agency is reaching out to property and land owners, commercial property agents, trade associations and local authorities. Their aim is to warn of the dangers posed by waste criminals and advise them, their clients and their members how they can better protect themselves.

Jamie Fletcher, Area Environment Manager, from the Environment Agency said:

Waste criminals operate throughout the country, offering to remove waste cheaply and then dumping it in fields or empty warehouses. They tend to move to new areas as enforcement agencies become wise to their activities. We know it's only a matter of time before they target us again so we're sending out a strong message: Waste criminals are not welcome here and we're doing everything in our power to deter and catch them.

We can't do it alone. We work closely with partners to share intelligence on illegal waste activity. And we're encouraging everyone to do their bit: for property and land owners to be vigilant and better protect themselves and for all businesses,

organisations and individuals to manage their waste responsibly, preventing it from getting into criminal hands in the first place.

Land and property owners are advised to:

- Check any empty land and property regularly and make sure it is secure.
- Carry out rigorous checks on prospective and new tenants. Land and property owners have a responsibility to ensure anyone leasing their land/property complies with regulations. They may be committing an offence by allowing waste to be stored on land or property without the relevant permissions and could leave them liable to prosecution
- Be vigilant and report any unusual behaviour.

## **Advice for businesses**

There are around 4,000 commercial properties across the North East thought to be empty, which are owned by up to 1,500 businesses and organisations, including fund management companies and local authorities.

The Environment Agency is also advising businesses and organisations of their responsibility to ensure their waste is managed appropriately. Anyone who produces, stores and manages waste is obligated to ensure waste does not cause harm to human health or pollution to the environment under waste under Duty of Care legislation.

Waste crime diverts as much as £1 billion per annum from legitimate business and the treasury. Since April 2011 the Environment Agency has invested £65.2

million nationally to address it. Its specialist crime unit uses intelligence to track and prosecute organised crime gangs involved in illegal waste activity and to ensure any necessary action is taken against them.

The Environment Agency also works with partners to share intelligence on illegal waste activity and to put in place contingency plans to reduce the risk from a small number of abandoned sites at risk of fire.

Anyone who sees waste crime taking place is advised not to approach as these people can be dangerous. Report it by calling our incident hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.

## [News story: Decommissioning milestone at Oldbury nuclear site in Gloucestershire](#)

A total of 109 low level waste skips, the containers which were used to hold fuel elements once they had been removed from the reactor, have now been safely taken out of the ponds; processed and packaged for storage.

It marks a significant step along the journey to fully decommissioning the cooling ponds.

Work at the site will now focus on removing the pond furniture and remaining skips, which are currently storing other components, before the end of the year.

This will be followed by draining of the pond water and stabilisation of the surfaces, due to take place in 2018.

Rob Taylor, Magnox Ltd Ponds Campaign Manager at Oldbury, said:

The work was completed in challenging conditions but was delivered ahead of schedule.

The achievement is a significant one for the site as we work towards decommissioning the facilities that once allowed it to operate, in a safe and efficient manner.
