

Consultation outcome: Revised requirements for radiological protection: regulation of public exposures and the justification of practices

Updated: Government consultation response.

The 2013 Euratom Basic Safety Standards Directive (2013/59/EURATOM) lays down safety standards for protecting against the dangers arising from exposure to ionising radiation.

We're seeking views on the proposals for implementing the requirements of the Directive in relation to planned and existing public exposure situations and the justification of practices involving ionising radiation.

The proposals will be of particular interest to a wide range of commercial and public sector organisations, including hospitals, universities, the nuclear industry and other industries that work with radioactive substances or which generate or manage radioactive waste.

There are a number of supporting documents included with this consultation:

- the impact assessment details the economic and environmental benefits associated with the government's regulatory decisions
- Schedule 23 to the Environmental Permitting (England and Wales) Regulations 2016, marked with proposed draft amendments for comment, to be read alongside the consultation proposals
- BEIS will also publish during the course of this consultation the proposed draft amendments to the Justification of Practices Involving Ionising Radiation Regulations 2004 for comment

Policy proposals setting out changes to the Radioactive Contaminated Land (RCL) regime are presented in this consultation. BEIS will consult separately on updated RCL statutory guidance and amendments to the RCL legislation following consideration of the results of this consultation.

A further set of regulations, implementing a handful of miscellaneous policy proposals in this consultation, will also be prepared. We don't propose to consult on these regulations.

We will notify interested parties when the draft amendments to the Justification of Practices Involving Ionising Radiation Regulations are released and when the consultation on the RCL statutory guidance and amendments to the RCL regime is launched.

Open consultation: Revised requirements for radiological protection: emergency preparedness and response

This consultation is relevant to those working with radiological material, in particular where an emergency as a result of that work with radiological material might have an impact on the public.

Emergency planners working in local authorities will also have an interest in the topics on which we are consulting.

Press release: Vital renovation for sea wall at Walton on the Naze

The sea wall at Walton on the Naze helps to protect a wetland site of designated international importance under the Ramsar Convention.

The repair work will ensure the wall remains an effective flood defence for years to come and prevent any further deterioration.

Starting later this month, a section of the tidal defence embankment will be refurbished over a 3 month period.

The project will see the renovation of a 1.7 kilometre stretch of the embankment, running north up the coast from Foundry Lane.

The work is being carried out by civil engineering contractors Breheny and will take place on the crest and seaward sides of the embankment.

Work is due to begin in the week commencing 9 October 2017 and normal working hours will be from 7:30am to 5pm, Monday to Friday.

Kerry Bentley, Asset Performance Officer for the Environment Agency, said:

This is very important work and will ensure the sea wall can continue to provide an effective level of protection in the area for years to come.

The damaged sections of existing sea wall will be removed and new sections will be added.

The old blocks will be placed at the toe of the sea wall as habitat and to help reduce wave impact.

In order to ensure the safe delivery of these works we will need to redirect short sections of the footpath to the rear of the wall.

In order to ensure the safe delivery of these works we will need to redirect short sections of the footpath to the rear of the wall.

[Notice: AL7 4SR, The Honeywagon Co Ltd: environmental permit issued](#)

Updated: Uploaded an amended variation and consolidation notice

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: The Honeywagon Co Ltd
- Installation name: Welwyn Garden City Hazardous Waste Treatment and Transfer Facility
- Permit number: EPR/ZP3535TP/V009
