

Press release: Illegal angler hooks hefty fine

A fishing trip to Lincolnshire has landed a man from Manchester with £597-worth of penalties after he was found breaking angling laws.

Mr John Handley of Herristone Road, Manchester, left his rod in the water unattended and was fishing without a licence at Lakeside Fishery, Wragby, on 21 June 2016.

He was discovered by Environment Agency enforcement officers, who carry out patrols designed to catch illegal anglers in the act – and protect the sport for those who do follow the rules.

Mr Handley was proved guilty in absence at Lincoln Magistrates' Court on 13 March 2017. He was fined £440 – £220 for each offence – and ordered to pay costs of £127, as well as a victim surcharge of £30, bringing the total penalty to £597.

Adam Basham, Environment Agency enforcement team leader, said:

By leaving his rod unattended, Mr Handley could have injured wildlife, and his refusal to buy a fishing licence harms the future and protection of the sport, effectively cheating the tens of thousands of anglers who do follow the rules.

We never hesitate to take action against offenders.

Leaving a fishing rod unattended is an offence under Environment Agency byelaws because of the danger it poses to fish and other wildlife, which can become entangled in the line or swallow the hook.

Anyone who wants to go fishing needs to buy a fishing licence. A full yearly fishing licence costs from just £30 and are available online at www.gov.uk/get-a-fishing-licence, by calling the Environment Agency on 0344 800 5286, or from your local Post Office branch. Short-term and concessionary licences are also available.

The money from licence sales supports fish, fisheries and fishing, and protects the future of the sport. It funds a wide range of projects to improve facilities for anglers, including protecting stocks from disease and illegal fishing; restoring fish stocks through re-stocking; eradicating invasive species; and fish habitat improvements. The income is also used to fund the Angling Trust to provide information about fishing and to encourage participation in the sport.

A small number of anglers refuse to buy a licence, cheating the sport and their fellow anglers. For the minority who flout the rules, the most common offence is fishing without a valid licence, which could land them with a fine of up to £2,500 and a criminal conviction.

In 2015/16, Lincolnshire and Northamptonshire enforcement officers checked 3,710 licences and reported 73 for fishing illegally, bringing in fines and costs totalling £16,810.

Last year in England, the Environment Agency checked more than 62,000 fishing licences and prosecuted more than 1,900 anglers for rod and line offences, resulting in fines and costs in excess of £500,000.

To help crack down on illegal fishing, the Environment Agency urges people to report suspect activity by calling its incident hotline on 0800 80 70 60 or Crimestoppers on 0800 555 111.

National Statistics: Monthly sea

fisheries statistics January 2017

Updated: Text updated

The monthly landings statistics will be released at 9.30am on the 4th Friday of each month, or the next working day if this is a bank holiday.

Official Statistics: Point of first release: statistics on abundance of UK butterflies

Trends of UK butterfly species are based on results of the UK Butterfly Monitoring Scheme (UKBMS), presented at UK level, and at country level where there are sufficient data. The UKBMS helps the UK to meet its obligations under the European Habitats Directive (for Marsh Fritillary and Large Blue), and to report on, implement or deliver country biodiversity strategies and biodiversity indicators.

The UKBMS is run by Butterfly Conservation, the Centre for Ecology & Hydrology, and the British Trust for Ornithology, in partnership with a consortium of government agencies. The UKBMS is indebted to all volunteers who contribute data to the scheme.
