

Press release: Environmental charities receive over £1.5 million from businesses which broke environmental laws

Updated: Change of tense in one paragraph

Companies which broke environmental laws – either by polluting rivers, breaching permit conditions designed to protect communities or avoiding recycling – have agreed to make payments to a range of charities and have pledged to make improvements to avoid future offences.

30 charities and projects will benefit from the bumper pay-out of £1,564,761.09. The money will be spent by local groups on projects that will make a direct positive impact on the environment. Stretches of rivers will be cleaned up, native species will be restocked into rivers and communities groups will invest in parkland for everyone to enjoy.

There are 26 Enforcement Undertakings on the new list with payments ranging from £1,500 – £375,000, including 6 companies that have agreed to make 6 figure payments:

- Northumbrian Water Limited (£375,000) for pumping raw sewage into a tributary of the River Tyne.
- Filippo Berio UK Limited (£253,906.91) for failing to recover or recycle packaging waste.
- Anglian Water Services Limited have made two separate payments (£100,000 and £100,000) both for causing pollution incidents which killed fish.
- Heineken UK Limited (£160,000) for causing a pollution incident which killed fish.
- Kerry Ingredients UK Limited (£127,975) for causing a pollution incident which killed fish.
- Sandoz Limited (£120,932.23) for failing to recover or recycle packaging waste.

As well as making a suitable payment to an appropriate environmental charity, each company has accepted liability, demonstrated restoration of harm and invested to reduce the risk of similar breaches occurring in future.

The Environment Agency's ability to accept Enforcement Undertakings was extended in 2015 to a far wider range of offences. The Environment Agency is increasingly using this method of enforcement for suitable cases to swiftly restore the environment, improve practices of the offending company and avoid longer criminal court cases. However prosecutions will still be taken, particularly in the most serious cases.

Peter Kellett, Legal Director for the Environment Agency said:

We take pollution incidents very seriously and the payments of £1.5 million we're announcing today are the result of our firm but fair enforcement action and will benefit people and the environment across the country.

Enforcement Undertakings allow those who commit offences to restore the environment and to take steps to prevent a recurrence. When appropriate, they allow a quicker resolution than a prosecution and help offenders who are prepared to take responsibility for their actions to put things right with their local communities.

Stephen Trotter, Director, The Wildlife Trusts England, said:

The principle that a polluter should make amends for the damage they've caused makes good sense. We all depend on a healthy environment and this positive scheme allows some natural improvements to be funded which otherwise wouldn't happen. Clearly it would be better if these incidents hadn't happened in the first place – but at least something positive has come out of it.

Hertfordshire & Middlesex Wildlife Trust will use the money to help conserve and protect rare chalk streams and Surrey Wildlife Trust will support a range of projects including care of their heathlands through conservation grazing and Hedgerow Heroes, a citizen science project, to restore the remarkable network of hedges across the county that act as green corridors for wildlife.

The Wildlife Trusts also welcome the deterrent effect that these Enforcement Undertakings should have. It's really important that people understand their responsibilities and care for the natural world – it's also cheaper and makes business sense to do things cleanly than risk causing damage and pollution.

Restoration projects are in addition to work initially carried out to minimise environmental damage caused by pollution. Companies or members of the public are urged report pollution to the Environment Agency's 24/7 hotline on 0800 80 70 60. Environment Agency officers respond to limit damage to the environment and protect people and wildlife.

Several six-figure payments have been made for not recovering and recycling packaging. All companies producing packaging have a responsibility to recycle or pay for recycling to compensate and failure to follow packaging regulations will result in enforcement action and financial penalties.

Guidance: Algal blooms: advice for the public and landowners

Algae naturally occur in inland waters, estuaries and the sea. Blooms can form when their numbers become excessive. This guide describes the features of algal blooms, how they can affect you and what you should do if you see one.

Press release: Tata Steel make amends with £73,000 donation, following pollution

Tata Steel UK Ltd (TSUK) paid the money to the Humber Nature Partnership, an organisation that delivers projects resulting in environmental, economic and community benefits. The payment follows a pollution incident on the Bottesford Beck.

On the 22 May 2015 after a call from the TSUK Environment Manager, Environment Agency officers found a heavy red coloured lubricating oil on Seraphim lagoon, the Bottesford Beck and in wetland channels of Ashby Ville Local Nature Reserve.

Following investigations it appears that the oil overflowed from an industrial bulk container as oil was being drained from a lubricating tank on the TSUK site.

Under the terms of this Enforcement Undertaking (EU), Tata Steel UK Ltd accepted an obligation to make a donation of £73,000 to the Humber Nature Partnership. Final plans for how the money will be used are still underway, but tree planting creation of wildlife ponds and ground works for an outdoor classroom that could be used by local schools are some schemes under consideration.

As part of the EU, Tata Steel UK Ltd has also agreed to take action to ensure that a similar incident does not recur and paid the costs of the Environment Agency.

Elizabeth Cooper, environment officer with the Environment Agency, said:

We work hard to protect people and the environment. In this case, we considered that the Enforcement Undertaking was an appropriate way to sanction the company while creating a benefit for the local environment.

Serious pollution can have devastating effects on rivers, fields and wildlife.

Along with prosecutions, the Environment Agency use enforcement notices, stop notices and civil sanctions to either improve performance or stop sites from operating. It is making better use of the wide range of measures that are available to bring sites back into compliance as quickly as possible.

The Environment Agency's use of civil sanctions is in line with recent legislation extending their availability for more offences.

Civil sanctions such as these can be a proportionate and cost-effective way for businesses to make amends for less serious environmental offences.

The Enforcement Undertaking requires Tata Steel UK Ltd to:

- Make a donation of £73,000 to the Humber Nature Partnership
- Implement pollution prevention and restoration works
- Review refresher training for staff
- Site improvement works
- Pay Environment Agency costs

Failure to comply with an EU may result in the offender being prosecuted for the original offence. Details of Enforcement Undertakings accepted by the Environment Agency between can be found on [GOV.UK](https://www.gov.uk)
