

Press release: Man given suspended jail term over illegal Wakefield waste site

A Dewsbury man has been handed a 26-week prison sentence, suspended for 12 months, for illegally dumping waste on disused land in Horbury, Wakefield.

Samuel Joseph Stringer Hunter, 25, of Boothroyd Lane, Dewsbury, was sentenced by Kirklees Magistrates' Court on 27 January following an Environment Agency investigation.

Hunter had denied two environmental offences but was found guilty after a trial.

Lorna Matchett, prosecuting for the Environment Agency, told the court that investigating officers discovered the illegal activities in July 2014.

Hunter had been storing waste on land near Bridge Road, near the River Calder behind the Horbury Bridge Industrial Estate, although no environmental permits were in place for the operation.

There were several piles of mixed waste containing treated and untreated wood waste and plastics, and skips belonging to the Hunter Group or Huddersfield Skip Services, both of which Hunter was involved with at the time.

The defendant claimed that these waste activities were allowed because they were covered by waste permitting exemptions. But the Environment Agency said the waste was being stored in breach of the exemptions: there was too much waste, it was of a type not compliant with the exemptions and it was stored for too long.

Hunter was told to clear the waste from the site, but inspections between October 2014 and January 2015 revealed that much of it remained. There were also signs that waste had been deposited into the ground, which was contaminated with plastic, glass, a trainer and mixed construction and demolition waste.

The court heard that through running the site illegally, Hunter avoided £4,120 in permitting fees and £5,148 by not installing the correct surfacing to prevent pollution to the ground. It is estimated that Hunter received between £6,400 and £18,720 for the waste he brought onto the site.

In sentencing, the chair of the bench said:

These offences were so serious that custody was the only option.

A spokesperson for the Environment Agency said after the hearing:

Environmental permitting regulations exist to protect the environment and local communities from the risk of harm. Hunter's activities on this site posed a pollution risk and a fire risk that could have affected the nearby railway line. Hunter also undercut legitimate businesses by avoiding mandatory permitting and infrastructure costs.

We hope this case demonstrates the importance of environmental compliance. Anyone who breaks the rules will be pursued. Anyone who believes waste is being dumped illegally is urged to report the matter to our incident hotline on 0800 807060 so we can investigate.

Prior to sentencing, Hunter told the court in mitigation that he had cleaned up the waste in the shortest possible time.

In addition to the suspended jail term, he was ordered to undertake a rehabilitation activity of 15 days under supervision, and to carry out 300 hours of unpaid work within the next 12 months. Hunter must also pay legal costs of £4,640 and a victim surcharge of £150.

Press release: Over 300 volunteer bailiffs help fight against illegal fishing

From Cornwall to Cumbria, an army of dedicated anglers is helping the fight against illegal fishing and fish theft. They are the recruits of the Angling Trust and Environment Agency's Voluntary Bailiff Service (VBS) who act as the "eyes and ears" on riverbanks and lakes, reporting suspicious incidents and providing crucial information to the Environment Agency and the police.

VBS began as a pilot project in the South East in 2012 following a formal partnership between the Environment Agency and the Angling Trust. It was rolled out across the country in spring 2015 and, following inductions last autumn, proudly boasts more than 300 volunteers.

Bailiffs are unpaid and rigorously vetted before they are selected. Successful candidates receive an intensive training course on what is expected of them from enforcement professionals, including the Angling Trust, the Environment Agency and the Head of the UK National Wildlife Crime Unit.

Volunteers are trained on fisheries enforcement law, signs of illegal fishing and how to record information in a way that could be used as evidence. First-hand learning includes attending joint patrols with the police and Environment Agency.

Volunteers recently gained valuable experience when they joined police and Environment Agency Fisheries Enforcement Officers on a joint patrol of the River Severn and at a number of stillwaters. Even at a relatively quiet period of the year they found reports of illegal fishing.

It's not just rod licence offenders that are being reported either. On other patrols people have been cautioned by the police for going equipped for poaching, motoring offences and possessing drugs and weapons.

Dilip Sarkar MBE, the Angling Trust's National Enforcement Manager, said:

All of our volunteers are valued and we now have the sound foundation to move forward, increase engagement and provide more practical training. We have come a very long way, since the formal partnership and although we still have far to go, this activity is already making a difference.

Graeme Storey, National Fisheries Manager at the Environment Agency, said:

All money raised through rod licence sales is used to protect and improve fish stocks and fisheries benefiting anglers. The Voluntary Bailiff Service is our latest move to tackle illegal fishing and to protect that revenue. The vast majority of anglers who fish legally deserve to see those who flout the law brought to account but to that criminal minority our message is clear: we won't hesitate to take action.

The Angling Trust and Environment Agency are appealing for more anglers to join the VBS. Induction and training days are being run this spring and anyone interested in joining the VBS should email karen.sarkar@anglingtrust.net

News story: More people to receive help to stay warm in their homes thanks to new energy reforms

Homes across the UK will get extra support to keep warm during the colder months [thanks to reforms published today](#). Changes to the Energy Company Obligation (ECO) will make sure energy companies provide necessary support to people struggling to meet their heating bills. Plans to extend the scheme from April 2017 to September 2018 were also published today.

The reforms which were consulted on last year will usher in a simplified scheme, with energy companies required to provide struggling households with free energy efficiency measures to make their homes warmer and bring their bills down.

Minister for Energy and Industry, Jesse Norman said:

The Government is committed to tackling fuel poverty, and a key part of that is to help people keep bills down by living in more energy efficient homes. These changes will move the UK a further step towards the goal of insulating a further 1 million homes by 2020.

As well as an increased focus on low income and vulnerable homes, eligibility will be extended to social housing tenants in EPC bands E, F and G, and local authorities will also be able to help match people with energy suppliers.

Suppliers will also be required to install a minimum 21,000 solid wall insulations per year, up from the consultation figure of 17,000.

There will be continuing protection for the delivery of energy efficiency measures in rural areas, with a requirement that 15% of suppliers' Carbon Emission Reduction Obligation be delivered in these areas.

ECO has proved a very effective delivery mechanism with over 2 million measures installed in around 1.6 million properties between 2013 and the end of November 2016.
