

# Staatliche Beihilfen: Kommission genehmigt öffentliche Unterstützung in Höhe von 600 Mio. EUR für innovative Solarenergieanlagen in Frankreich

27/11/2018 – Business, taxation and competition / Employment and social rights / Enlargement, external relations and trade

EU exports to the world are more important than ever, supporting 36 million jobs across Europe, two thirds more than in 2000. 14 million of these jobs are held by women. In addition, EU exports to the world generate €2.3 trillion of value added in the EU.

## State aid: Commission approves €600 million in public support for innovative solar power installations in France

Commissioner Margrethe **Vestager**, in charge of competition policy, said: *“Our future will be powered by renewable energy. The French initiative the Commission is approving today will encourage investment in innovative solar installations. It will contribute to France’s transition to low carbon, environmentally sustainable energy supply, in line with the EU environmental objectives and our state aid rules.”*

The measure is designed to encourage the production of renewable electricity from innovative solar installations in France.

The scheme has an indicative budget of €600 million and is financed from the French State budget. It will support the deployment of 350 megawatts of additional generation capacity.

The support is available for innovative solar installations (at ground level or on buildings), with a capacity between 100 kilowatts and 5 megawatts. The beneficiaries will be selected through tenders organised until 2019.

The selected installations will receive support in the form of a feed-in tariff (i.e., a guaranteed price) or of a premium on top of the market price

(so-called “complément de rémunération”) for a period of 20 years.

The Commission assessed the scheme under EU State aid rules, in particular the Commission’s [2014 Guidelines on State Aid for Environmental Protection and Energy](#). The Commission found that the French scheme will encourage the development of innovative solar renewable energies and avoid overcompensation for the beneficiaries of the public support, in line with the requirements of the Guidelines.

On this basis, the Commission concluded that the measure will help France boost the share of electricity produced from renewable energy sources to meet its climate targets, in line with the [environmental objectives of the EU](#), without unduly distorting competition.

## **Background**

The Commission’s [2014 Guidelines on State Aid for Environmental Protection and Energy](#) (see full text [here](#)), allow Member States to support the production of electricity from renewable energy sources, subject to certain conditions. These rules are aimed at meeting the EU’s ambitious energy and climate targets at the least possible cost for taxpayers and without undue distortions of competition in the Single Market. The [Renewable Energy Directive](#) established targets for all Member States’ shares of renewable energy sources in gross final energy consumption by 2020. For France that target is 23% by 2020. The scheme aims to contribute to reaching that target.

More information on today’s decision will be available, once potential confidentiality issues have been resolved, in the [State aid register](#) on the Commission’s [competition](#) website under the case number SA.48642. The [State Aid Weekly e-News](#) lists new publications of State aid decisions on the internet and in the EU Official Journal.

## **[EASO successfully completes its special support in Bulgaria](#)**

### **EASO successfully completes its special support in Bulgaria**

The long-standing support that EASO has been providing to the Bulgarian authorities was formally concluded on 27 November 2018 on the sidelines of the meeting of the 30<sup>th</sup> EASO Management Board, held in Vienna.

Signed on 5 December 2014, the Special Support Plan focused on capacity building in a number of areas, such as unaccompanied minors; vulnerability assessment; reception; quality of the asylum procedure; country of origin information and supporting the asylum decision process. The Special Support Plan replaced the Operating Plan signed by Bulgaria and EASO in 2013.

The Special Support Plan was amended and extended three times over the past four years in order to adapt to the changing needs of the Bulgarian authorities. More details can be found [here](#).

The successful conclusion of EASO's operations in Bulgaria comes as a result of the reduced pressures on its asylum and reception system, as well as the strong enhancement registered in the country's capacity.

EASO welcomes the excellent cooperation which has been fostered with the Bulgarian authorities over the past years, both in the context of the Agency's operational support, as well as in the many other areas of collaboration to improve the implementation of the Common European Asylum System.
