The European Union reaffirms its strong opposition to capital punishment and urges Belarus, the only country in Europe still applying capital punishment, to commute the remaining death sentences and to introduce without delay a moratorium on the death penalty as a first step towards its abolition.

The EU-China Civil Society Round Table was established in 2007 following a decision taken by the 9th EU-China Summit in Helsinki. The delegations from the EESC and its Chinese counterpart, the China Economic and Social Council, meet regularly to discuss topics relating to economic and social issues relevant to both parties. By elaborating reports, discussing them and exchanging ideas, the representatives of the European Economic and Social Committee and the China Economic and Social Council contribute to the development of the overall EU-China relationship, from a civil society perspective.

ESMA provides market size calculations for MiFID II ancillary test

Under the revised Markets in Financial Instruments Directive (MiFID II) market participants are required to measure their own activity against total market sizes in commodity derivatives. Those market participants exceeding a certain market share are required to apply for an authorisation as an investment firm.

ESMA provides indication of market sizes

ESMA collected data for the calculation of the on-venue market size from the trading venues located in the European Economic Area (EEA), which it provides for the total year of 2015 and for the second half of the year 2016. In addition, ESMA also looked at the size of the OTC market for the second half of 2016 based on data from trade repositories. The exact methodology applied and the way market participants can use the data published by ESMA for their market share calculations are described in detail in the opinion.

Due to the lack of publicly available data for commodity derivatives and emission allowances, ESMA's intention behind this publication is to help market participants in performing the ancillary activity test in MiFID II.
