

EFSA panel renewal 2018: animal health and welfare

Are you an expert in microbiology, epidemiology, animal welfare or animal production? Do you have experience in risk assessment and modelling? Would you like to put your expertise at the service of hundreds of millions of European consumers? Then you should consider applying as an expert for EFSA's Scientific Panel on Animal Health and Welfare.

What does the Animal Health and Welfare Panel do?

The [Animal Health and Welfare Panel](#) provides scientific advice on all aspects of animal diseases and animal welfare. Its work chiefly concerns food producing animals, including fish.

Joint Statement by the European Commission and the U.S. Department of Homeland Security on aviation security cooperation

Today, European Commissioner for Migration, Home Affairs and Citizenship, Dimitris **Avramopoulos**, and European Commissioner for Transport, Violeta **Bulc**, hosted a delegation from the United States in Brussels, led by Deputy Secretary of Homeland Security Elaine Duke, to discuss issues related to aviation security and safety.

At the meeting, both sides exchanged information on the serious evolving threats to aviation security and approaches to confronting such threats. Participants provided insight into existing aviation security standards and detection capabilities as well as recent security enhancements on both sides of the Atlantic related to large electronic devices placed in checked

baggage.

The United States and the European Union reaffirmed their commitment to continue working closely together on aviation security generally, including meeting next week in Washington D.C. to further assess shared risks and solutions for protecting airline passengers, whilst ensuring the smooth functioning of global air travel.

eu-LISA-Technical-Expertise-to-Bring-Forward-Interoperability-of-IT-systems

The European Commission's seventh progress report on the headway made towards an effective and genuine Security Union, launched on 16 May, focuses on the ongoing work to improve information management for borders and security. Further to this, it sets out the Commission's new approach towards achieving the interoperability of EU information systems for security, border and migration management by 2020. The proposed approach would overcome the current weakness in the EU's data management architecture eliminating blind spots.

The EU Agency responsible for information system management, eu-LISA, would play a crucial role in providing technical expertise and bringing the work towards the interoperability of information systems forward. In order to allow eu-LISA to implement this new approach, the Commission will present a legislative proposal to strengthen the Agency's mandate in June 2017.

Commissioner for Migration, Home Affairs and Citizenship **Dimitris Avramopoulos** said: *"The value of our security information is maximised when our systems talk to each other. The complex and fragmented systems we have today make us vulnerable. Actionable information is not always available for the law enforcement officials that need it. Today, we present a clear vision on how to act to correct this. To connect the dots and to eliminate blind spots to step up the security of our citizens across the EU."*

Commissioner for the Security Union **Julian King** said: *"The recent tragic attacks in Europe have highlighted the importance of effective information sharing between Member State authorities. The approach we are outlining today sets out a targeted and intelligent way of using the existing data to best effect. What we propose would be a step-change in the way we manage data for security, helping national authorities better addressing transnational threats and detecting terrorists who act across borders."*

According to the Executive Director of eu-LISA **Krum Garkov** eu-LISA has the knowledge and readiness to provide its expertise and fully contribute to achieving the objectives set out in the approach.

Background

In April 2016, the Commission presented a Communication on stronger and smarter information systems for borders and security and launched the work of the High-Level Expert Group on Information Systems and Interoperability. The High-Level Expert Group delivered its [final report](#) on 11 May confirming the views expressed in the April 2016 Communication, and putting forward recommendations towards the interoperability of information systems. The seventh progress report of EC takes stock of the recommendations of the High-Level Expert Group, and proposes the way forward to address structural shortcomings under the three main areas:

1. maximising the utility of existing information systems;
2. where necessary, developing complementary systems to close information gaps; and
3. ensuring interoperability between our systems.

Statement by Federica Mogherini following the address by Antonio Guterres, at the European Parliament

The visit of the UN Secretary General, Antonio Guterres, to the European Parliament, one week after we celebrated together in New York the European Day, shows how deep the links and how strong the common work between the United Nations and the European Union are. Antonio Guterres delivered a powerful speech on the value of multilateralism and recognised the indispensable contribution the European Union is bringing to it.

In his words, the EU is playing a crucial role on the world stage when it comes to peace and security, development, humanitarian aid, climate change, human rights. The European Union and the United Nations cooperate on many crises from Syria to Libya, from Somalia to the Central African Republic, to Afghanistan. I will welcome the Deputy Secretary General of the United Nations Amina Mohammed at our Foreign Affairs Council (Development) on Friday in Brussels to work together on the implementation of the Sustainable Development Goals.

Antonio Guterres paid tribute to the European Union as a vital pillar of a functioning multilateral system, based on cooperation rather than confrontation, and rules that are a guarantee for all in this globalised world.

As EU, we will continue to be a strong and reliable partner for the United Nations, to bring peace and security, promote development and build together a more just and cooperative world order.
